Trademarks Journal

Vol. 71 No. 3620

General Information

The *Trademarks Journal* (the “*Journal*”) is published on the website of the Canadian Intellectual Property Office (<http://cipo.gc.ca>). The *Journal* lists trademark applications advertised under subsection 37(1) of the *Trademarks Act* (the “*Act*”), public notices of prohibited marks under section 9 of the *Act*, statements of the Minister in respect of geographical indications under subsection 11.12(2) of the *Act*, as well as erratums to previous volumes.

Electronic *Trademarks Journal*

The *Journal* is available in PDF format and can be downloaded free of charge and viewed and printed with Adobe Acrobat Reader. The *Journal* is also available in a printable HTML format as an alternate official version that contains a search function to narrow and customize the content. The electronic form of the *Journal* is the official version.

Official Languages

The *Journal* is available in English and French. The details displayed for each application are based on the language of the application. If the language of the application is English, the goods, services, or other text and description appearing in the English version of the *Journal* are in the language filed by the applicant. If the language of the application is French, the goods, services, or other text and description appearing in the English version of the *Journal* have been translated. Any registration resulting from the application will be restricted to these goods or services as described in the language of the application.

Filing Dates

The filing date of each trademark application (including those to extend the statement of goods or services of an existing registration) is shown in the YYYY-MM-DD format.

Nice Classification

Where applicable and required, the *Journal* lists the goods or services of each application grouped according to the classes of the Nice Classification, each group being preceded by the number of the class of the Nice Classification to which that group of goods or services belongs and presented in the order of the classes of the Nice Classification.

Opposition

Any person who has a valid ground of opposition (see section 38 of the *Act* for the grounds of opposition) to any application for registration of a trademark or to any application for registration of a trademark extending the statement of goods or services advertised in this *Journal* may file a statement of opposition with the Registrar of Trademarks within two months from the date of issue of this publication. The prescribed fee must accompany the statement of opposition.

(1) Phosphor for cathode-ray tubes; phosphor for lighting; phosphor for x-ray; phosphor for light-emitting diodes; phosphor for laser diodes; magnetic metal oxides; chemical preparations, namely rare-earth metal salts for industrial purposes; chemical preparations for scientific purposes for use in the manufacture of food; chemicals for chemical industry, namely calcium salt, iron salt, and gallium; chemical additives for use in the manufacture of food; desiccants for absorbing moisture; catalyst for use in the manufacture of industrial chemicals; catalyst agents, namely, catalysts for chemical and biochemical processes for use in the manufacture of industrial chemicals; polymerization initiator as chemicals for use in the semiconductor industry; salts for galvanic battery; lithium salts for use in the manufacture of secondary cell electrode; rare earth iron nitride; pellets made of mixtures of rare earth iron nitride and macromolecular compounds for injection molding; ferromagnetic chemical materials used in the manufacture of magnets, namely, magnetic powders made of mixtures of rare earth iron nitride; magnetic substance made of mixtures of rare earth iron nitride; sintered phosphor; chemicals, namely, sintered phosphor and inorganic oxides

for chemical, industrial and manufacturing processes; phosphorescent complex chemical compounds coordinated with rare earth schiff base; salts from rare earth metals.

Class 02

(2) Fluorescent paints; fluorescent pigments.

Class 07

(3) Ultraviolet irradiator being parts of semiconductor manufacturing machines; Lithography machines for semiconductor production, Etching apparatus for semiconductor production, Photolithography equipment for semiconductor production; machines for accelerating ultraviolet irradiation to cure ultraviolet curing resin in manufacturing of semiconductor; lithography machines for flat panel display manufacturing; etching apparatus for flat panel display manufacturing; photolithography machines for flat panel display manufacturing; laser glass processing machines and non-laser glass processing machines; laser plastic processing machines and non-laser plastic processing machines; laser marking machines for fabrics; 3D printer; electric vacuum cleaners for domestic use; vacuum cleaners for commercial use; machines to improve surface of resins using ultraviolet light emitting diodes in manufacturing of semiconductor wafers, electronic components or resin parts.

Class 09

(4) Semiconductor elements, namely, chips, wafers and computer memories; semiconductors; semiconductor wafers; semiconductors chips; light emitting diodes; light emitting diode chip on board; micro light emitting diodes; mini light emitting diodes; organic light emitting diodes; laser diodes; applied electronic machines, apparatus and parts thereof, namely, computer displays screens, computer monitors, televisions, GPS navigation receivers and transmitters, digital signage display panels; telecommunication machines, apparatus and parts thereof, namely, mobile phones; light emitting diode [LED] displays; personal computers; tablet computers; laptop computers; smartphones; AR/VR headsets; smart watch; smart glasses; smart rings; personal digital assistants; portable media players, namely, radios, MP3 players, DVD players; portable and handheld digital apparatus for reviewing image files, namely, smartphones, digital picture frames; portable video cameras with built-in videocassette recorders; video telephones; interphones; telephone sets; telephone receivers; answering machines; phototelegraphy apparatus, namely, computers, phototelegraphy receivers; teletypewriters; teleprinters; facsimile machines; video cameras for broadcasting; communications apparatus for ships, namely, intercoms, telephones, modems, on-board computers; satellite navigation equipment; communications apparatus for vehicles, namely, telephones, on-board computers; communications apparatus for aircraft, namely, intercoms, telephones, modems, on-board computers; portable communications apparatus, namely, tablet computers, mobile phones, smartwatches; radar apparatus, namely, radar antennas, radar detectors, radar receivers; direction finders; navigation apparatus for vehicles, namely on-board computers; satellite navigational apparatus, namely, GPS transmitters and receivers; telemetering controllers; sound recorders (except for movies); video disc players; video recorders; mpeg audio layer-3 (mp3) players; portable music player; portable video player; mobile phone; PHS(personal handy-phone system); television receivers (TV sets); projectors; digital photo frames; dot-matrix light emitting diodes displays; display with light emitting diodes; light emitting diodes display for cars; display with laser diodes; display with micro light emitting diodes; display with mini light emitting diodes; head mounted displays; heads up displays for use in military and commercial aircraft, namely, fixed and helmet mounted transparent electronic displays for providing aircraft crew members with navigational and operational information; display monitors for shelf or rack of products; shelf or rack display monitors for shops; road signs with light emitting diodes; traffic light with light emitting diodes; back light for liquid crystal display with light emitting

diode; panel-type electronic displays, namely, digital signage; electric meters; industrial magnets; liquid crystal display (LCD) projectors; fiber laser with optical fiber doped with rare earth elements for industrial use; counterfeit money detectors; optical inspection apparatus for analysing defects on surfaces of wafers and printed circuits for industrial use; inkjet printers.

Class 10

(5) Medical and dental equipment and devices, namely, surgical devices and instruments used by dentists and medical doctors; endoscopes for medical use; catheters; dialysis machines; flow cytometers for blood testing; medical equipment and devices using laser, namely, surgical devices and instruments; ultraviolet radiator units for therapeutic purposes used for phototherapy in dermatotherapy; DNA and RNA blood analyzer for medical use; medical diagnostic apparatus for testing DNA and RNA for medical use; medical genetic testing devices for medical use; testing devices for nuclear medicine, namely, nuclear medicine diagnostic imaging apparatus; closed system cell isolation equipment for use in the production of advanced cells for medical therapy purpose; medical examination devices, namely, AR headsets for medical use, and various monitors, namely, heart monitors, respiration monitors, pulse rate monitors; therapeutic devices in the nature of an allergy treatment device that emits a mixture of ultraviolet light and visible light for atopic dermatitis and pollen allergy; accelerating devices in the nature of bio-photo-therapy immunostimulation devices for anti blood infection and immune stimulation using ultraviolet light emitting diodes.

Class 11

(6) Light bulbs and other lighting apparatus, namely, electric lighting fixtures; penlights; penlights with keyrings; headlamp; reading lamps for vehicles or domestic use; headlamps and headlights for vehicles; interior lights for vehicles; lighting equipment, namely, light fixtures; led lighting fixtures; lighting apparatus, especially electric lamps and luminaires; lighting equipment, namely, illumination lamps for accelerating light-growth reaction and increasing useful components in plants using ultraviolet light emitting diodes; flashlights; spotlights; electric nightlights; lighting equipment, namely, lighting fixtures with light emitting diodes; electric lamps for cars; electric lamps for lighting fixture; lights for cars; headlights for cars; fog lamps for cars; lights for cars using light emitting diodes lamp; lamps for vehicles; tail lights for land vehicles; interior lighting fixture for vehicles; light bulbs for directional signals for vehicles; vehicle turn-signal lights bulbs; light bulbs and lamps of turn signals for cars; interior lighting fixtures and lights bulbs for cars; lighting fixtures using light emitting diodes for cars; ceiling lights; fishing lights; lighting fixtures using light emitting diodes or laser diodes; lighting fixtures for underwater use; lighting fixtures with light emitting diodes for underwater use; lighting fixtures with fiber optics; fiber optic lighting fixtures; air cleaning units; air conditioners; refrigerators; water purifiers for domestic use; water purifiers for commercial use; ultraviolet lamps not for medical purposes to cure artificial nails for commercial use; ultraviolet lamps not for medical purposes to cure ultraviolet curable resin for commercial use; tanning booths using ultraviolet lamps for commercial use; tanning lamps; disinfection device in the nature of ultraviolet LED for a container or cover for disinfecting objects placed therein of fungus, bacteria or virus using ultraviolet light emitting diodes.

Colour Claim

Colour is claimed as a feature of the trademark. The mark consists of two yellow concentric circles depicted to be symmetrically flanked from the right side and from the left side by two yellow lions with a brown outline. An area between the two yellow concentric circles is depicted in a darker shade of yellow and brown colours to create a three-dimensional effect. The words EXTRA MAGNIFICENT are in black. Within the inner concentric circle, the letter "M" is white with yellow shading, creating a three-dimensional effect. The background of the inner circle is red with a darker red shading to create a three-dimensional effect. Directly above the capital letter "M" and within boundaries of the inner yellow concentric circle depicted is a small crown in yellow color.

Colour Claim

Colour is claimed as a feature of the trademark. The mark consists of a black geometrical enclosure comprising two straight vertical lines parallel to each other and interconnected by two horizontally oriented wavy lines consisting of more than one curve. The said black geometrical enclosure comprises a yellow border line identifying a perimeter of the enclosure and a plurality of horizontally oriented wavy lines consisting of more than one curve overlaying the black background within the enclosure. The stylized word MELANIE is depicted in white with yellow shading creating a three-dimensional effect. The mark further comprises two yellow concentric circles positioned at the bottom of the black enclosure overlaying the bottom horizontally oriented wavy line consisting of more than one curve. The said two yellow concentric circles are depicted to be symmetrically flanked from the right side and from the left side by two yellow lions with a brown outline positioned in the upright position while "holding" the said yellow concentric circles with their front paws. The area between the two yellow concentric circles is depicted in a darker shade of yellow and brown colors to create a three-dimensional effect. In the said area are comprised the words "EXTRA MAGNIFICENT" in black. Within the inner yellow concentric circle, on red background, depicted is the capital letter "M" in white, grey and yellow colors, wherein said colors create an effect of a three-dimensional letter. The area between the capital letter "M" and the inner yellow concentric circle is presented in the darker shade of the red color to create a three-dimensional effect for the red background. Directly above the letter "M" and within boundaries of the inner yellow concentric circle is depicted a small crown in yellow color.
