### Attention!

The prescribed fees for an application for the registration of a trademark are adjusted every year on the first of January. To find out the exact amount of a fee, please consult the list of fees on CIPO's website.

The amount for the first class of goods or services depends on the date on which the payment is received by the Registrar. Similarly, the amount for any additional Nice classes also depends on the date on which the payment is received, even if the prescribed fee for the first class of goods or services to which the application relates was paid prior to the annual adjustment.
