All correspondence in respect of this registration must indicate the name of the registered owner and either the registration number or the number of the application that resulted in the registration.

Please note this is an automated letter and is not a renewal notice.

There is no deadline to respond to this correspondence.

The goods or services in this registration have been subject to an automated analysis since they do not appear to be grouped according to the classes of the Nice Classification. Please note that the automated analysis is based on how the statement of goods or services currently appears on the Register.

In an effort to reduce uncertainty during the renewal process, the registered owner is encouraged to provide the Nice Classification information prior to renewal, preferably by using [the online service](#) on the Canadian Intellectual Property Office (CIPO) website.

To facilitate grouping the statement of goods or services according to the classes of the Nice Classification, the result of the analysis is provided below.

Of note, if more than one class of the Nice Classification is suggested for some of the goods or services, this means that either:

- one or more classes would be acceptable (i.e. “statues” could fall within Class 6, 14, 19, 20, or 21); or
- the applicable goods or services should be split between the classes indicated (i.e. “clothing accessories, namely purses and scarves” should be split between “clothing accessories, namely purses” in Class 18 and “clothing accessories, namely scarves” in Class 25).

This determination will need to be made by the registered owner.

For further guidance on grouping goods or services according to the classes of the Nice Classification, please see the *Goods and Services Manual*.
