---

### General Information

---

The *Trademarks Journal* (the “*Journal*”) is published on the website of the Canadian Intellectual Property Office (<http://cipo.gc.ca>). The *Journal* lists trademark applications advertised under subsection 37(1) of the *Trademarks Act* (the “*Act*”), public notices of prohibited marks under section 9 of the *Act*, statements of the Minister in respect of geographical indications under subsection 11.12(2) of the *Act*, as well as erratums to previous volumes.

---

### Electronic *Trademarks Journal*

---

The *Journal* is available in PDF format and can be downloaded free of charge and viewed and printed with Adobe Acrobat Reader. The *Journal* is also available in a printable HTML format as an alternate official version that contains a search function to narrow and customize the content. The electronic form of the *Journal* is the official version.

---

### Official Languages

---

The *Journal* is available in English and French. The details displayed for each application are based on the language of the application. If the language of the application is English, the goods, services, or other text and description appearing in the English version of the *Journal* are in the language filed by the applicant. If the language of the application is French, the goods, services, or other text and description appearing in the English version of the *Journal* have been translated. Any registration resulting from the application will be restricted to these goods or services as described in the language of the application.

---

### Filing Dates

---

The filing date of each trademark application (including those to extend the statement of goods or services of an existing registration) is shown in the YYYY-MM-DD format.

---

## Nice Classification

---

Where applicable and required, the *Journal* lists the goods or services of each application grouped according to the classes of the Nice Classification, each group being preceded by the number of the class of the Nice Classification to which that group of goods or services belongs and presented in the order of the classes of the Nice Classification.

---

## Opposition

---

Any person who has a valid ground of opposition (see section 38 of the *Act* for the grounds of opposition) to any application for registration of a trademark or to any application for registration of a trademark extending the statement of goods or services advertised in this *Journal* may file a statement of opposition with the Registrar of Trademarks within two months from the date of issue of this publication. The prescribed fee must accompany the statement of opposition.

(5) Aerospace vehicle sensors for engine control units to increase engine performance; aerospace vehicle sensors for determining the rate of motion; photo-electric cells; television lamps; military computer mobile systems comprised of computer central processing units and displays, electronic and mechanical shock absorbers and shock isolators; active and passive countermeasure equipment comprising signal transmitters and receivers, and computer central processing units for generating communication data for aircraft and vehicles; communication computers for aircraft and vehicles; electronic transmitters for jamming signals for aircraft and ground vehicles; aerials, namely, radio aerials and satellite aerials; laser perimeter awareness systems comprised of lasers, optical receivers and associated controls; aerospace ice detectors; aerospace sensors for monitoring angle of sideslip, gas path engine pressure, current-to-heater system interruptions, brake temperatures, air data, altitude, pitot pressure, static pressure, angle of attack, temperature, engine exhaust, inlet pressure, engine temperature, fuel and oil temperature, navigation; aerospace sensors for flight crew safety and security; air traffic control systems comprised of radio equipment, radar transmitters and receivers, global positioning systems consisting of computers, computer software, transmitters, receivers, and network interface devices, and computer central processing units for image display and analysis; radar transmitters, detectors, receivers; global positioning systems consisting of computers, computer software, transmitters, receivers, and network interface devices; aircraft navigation and landing systems, namely, automatic direction finders, radio altimeters, distance measuring equipment, global position sensors, navigation receivers, multimode receivers, VHF omni-directional range marker beacon receivers; aerospace communication systems comprised of receivers and transmitters, and computer central processing units for processing communication information; aircraft interior products, namely, emergency oxygen systems for aircraft passengers and flight crews comprised of oxygen masks not for medical use, chemical oxygen generators, empty oxygen storage vessels, gas pressure regulators, oxygen distribution circuits and controls, and protective breathing equipment being oxygen breathing units; aircraft navigation and landing systems comprised of high frequency signal transmitters and receivers, global positioning units and central computer processing units for image display and analysis; aircraft intrusion and fire alarm systems comprised of sensors, sound emitting devices and circuitry for aircraft; ally or enemy identification systems comprised of signal transmitters and receivers, data processing equipment for signal identification, specifically for coding and decoding of signals, and hardware and downloadable software to process images and sound; antenna tuning apparatus being radar antennas and radio antennas; microwave communications transmitter; battery accumulators; optical fiber; downloadable computer operating software for the analysis of aerospace vehicle operation and operation of computer networks; radio-frequency modulators for wireless networks and cellular communication and modulators for monolithic microwave integrated circuits; space suits; antennas, namely, microwave antennas, panel antennas, parabolic antennas, satellite antennas; downloadable computer operating programs for the management of tactical robots for use in military operations on the battlefields; computerized aircraft engine analyzers; power controllers for fuel cells; avionics systems for aircraft and aerospace vehicles consisting of communication and navigation hardware for use in airborne applications comprising computer hardware, software and displays for communications and navigation for aircraft and aerospace vehicles and for head-up display guidance systems, namely, flight situational awareness; rechargeable electric storage batteries; solar batteries;

battery eliminators for providing backup power for electric storage batteries and solar batteries; cabin pressure control systems comprised of cabin pressure controller, control panel, pressure relief valve, outflow valve and structural and replacement parts therefor; calculators; data processing equipment, namely, central processing units, computer motherboards, computer daughterboards, computer expansion boards, circuit boards, cables for electrical and optical signal transmission, computer hardware, word processors, digital signal processors, sound processors, digital voice signal processors, graphics processor units, video processors, signal processors, computer memory expansion modules, computer monitors, computer operating systems, computer touch screens, external computer hard drives, supercomputers, and computers; cameras; climate and weather monitoring and forecasting systems comprised of radar transmitters and receivers and computer central processing units for processing climate and weather data; climate control systems for aerospace vehicles consisting of thermostats, air conditioning, heating, ventilation and drying control devices; climatological surveillance systems comprised of radar transmitters and receivers; collective radio communication apparatus for ships, aircraft, vehicles being broadband radios; portable communications equipment, namely, modems, receivers, transceivers, and waveforms for use in air-to-ground secure communication networks; downloadable computer operating software for radio frequency transmitters for tracking and disturbing radio communication; downloadable computer operating software for computer network-attached storage [NAS] hardware for the secure storage of digital files on computers; missile launch systems comprising downloadable software for analyzing a target's location and actuating warheads, motors and propulsion systems for deploying warheads, and warheads for destroying targets; communications computers and systems for aircraft, namely, receivers, transmitters, amplifiers, transceivers, jammers, couplers, audio distribution units, satellite communication units, automatic control computer central processing unit for gas turbine engines, radar and GPS systems used for the transmission of interrogation signals and the reception of response signals, and downloadable software for analyzing such signals to enable communication between aircraft; electric compensating cables; computer hardware for telecommunications; downloadable computer programs for military surveillance; downloadable computer programs for organizing and viewing digital images and photos; downloadable computer operating programs for analyzing computer software and networks for use for use with aviation, space and military vehicles; downloadable computer operating programs for the wireless transfer of content from the bridge to the tower in the field of aviation, space and military; downloadable computer programs for integrated bridge control systems for positioning and propulsion control of rudders and thrusters in the field of aviation, space and military; downloadable computer software used in oxygen delivery systems for aircraft; downloadable operating software for military mobile computers; computerized analyzers to monitor the condition of oxygen concentrators and ventilators for life support equipment; computers; electric motor speed and direction controls; electronic controls for engines for aerospace vehicles; electronic throttle controllers; electronic brake monitoring controls and fuel controls for aerospace vehicles; electrical and electronic controls, namely, electro-hydraulic transducers and electrical sensors and replacement parts therefor; data collection and data processing systems comprised of computer central processing units and antennas for military information; deep ocean control systems comprised of sonar; gyroscopes for maritime use; oceanic depth finding systems comprised of pressure sensors, temperature sensors and computer processing unit for signal analysis and image display; electronic simulators for digital weapon systems for tactical military training; echo sounders; electric power distribution units, power supplies, power switches, power distribution and generation sensors for power generation all for airplanes, space ships, missiles, rockets and military drones; electric power distribution systems comprised of automatic power management unit, solid state power controls and secondary power distribution assemblies for airplanes, space ships, military vehicles and military tactical robots;

electric power distribution unit for aircraft; electrical circuits; electronic compass for navigation; emergency signal transmitters; weapons locators, namely, acoustic detection and computer-based signal processing unit for sensing and determining the location of weapon detonation; fire extinguishers; laser warning receivers for use in detecting, analyzing and locating the direction of laser; optical communication instruments and components, namely, optical and digital transmitters and receivers; satellite connection systems comprising downloadable security-enhanced software establishing secure connections between ground stations and satellites; satellite navigation devices, namely, GPS receivers for communicating with GPS satellites, and downloadable anti-jamming software providing uninterrupted signal communications; satellite receiver; military training systems, namely, battlefield and flight simulation; submarine surveillance systems, namely, radar systems used for detection, imaging and classification of underwater submarines; thermal imaging sensors and equipment, namely, sensors for detecting infrared radiation to enable vision in darkness, dust or inclement weather, and sensors used for imaging, targeting and tracking of guided missiles; torpedo components and systems, namely, power supply, namely, batteries, electronic controls, electronic sensors, electronic navigational and positioning apparatus, namely GPS transmitters and GPS receivers; electronic aircraft touchdown protectors; undersea surveillance systems, namely, systems comprised of hydrophones, optical telemetry devices, and computer central processing unit for image display and analysis; optical telemetry devices for image display and analysis; wireless communications devices namely smart phones, two-way radios, mobile telephones, satellites, radars, radio-frequency transmitters and receivers, radio frequency repeaters, all for recording, organizing, transmitting, receiving, manipulating, and reviewing voice, text, data, image, and audio files; digital forensics, namely, electronic aircraft integrated data acquisition units for collecting, integrating and recording data for monitoring, diagnosing and prognosticating aircraft subsystems, overall aircraft performance and performance of the aircraft crew; downloadable software for predictive analysis concerning maintenance and repair of individual aircraft engines and fleets of aircraft engines using operational data downloadable computer software for cybersecurity; video modulators; video tape recorders; compass systems, namely, gyroscopes; imaging and targeting systems for military vehicles and weapon systems comprised of radar transmitters and receivers, and computer central processing unit for image display and analysis; ground-based radar sensors; infrared sensors and infrared sensing systems comprised of infrared transmitters and detectors, optical lenses, video monitors, and computer central processing unit for image display and analysis; thermal vision systems for vehicles comprised of signal transmitters and detectors, cameras, and computer central processing unit for image display and analysis; radar systems comprised of antennas and computer central processing unit; weapon locating systems comprising electro-optical sensors, radar transmitters and receivers, and computer central processing unit for image display and analysis; laser warning systems comprised of laser sensors, computer central processing unit for sensor signal analysis, and alarms; remote sensing and surveillance instruments for aircraft and space applications comprised of satellite receivers and transmitters, optical sensors, spectral filters, and computer central processing unit for image display and analysis; active and passive countermeasure equipment comprising signal transmitters and receivers, and computer central processing unit for generating communication data for aircraft and vehicles; mobile military computer systems comprised of computer central processing unit and displays, electronic and mechanical shock absorbers and shock isolators; satellite communication systems comprised of satellite receivers and transmitters, and computer central processing unit for processing communication information; sonar systems comprised of sonar transducers, and computer central processing unit for sonar signal analysis and image display; undersea surveillance systems comprised of hydrophones, optical telemetry devices, and computer central processing unit for image display and analysis; aircraft navigation and landing systems comprised of high frequency

signal transmitters and receivers, global positioning systems consisting of computers, computer software, transmitters, receivers, and network interface devices, and computer central processing unit for image display and analysis; aircraft communication systems comprised of high frequency signal transmitters and receivers, and computer central processing unit for generating communication information; multi-party radio communication systems comprised of radio frequency signal transmitters and receivers, and computer central processing unit for analyzing and modulating frequency signals; roadway toll collection systems comprised of signal transmitters and receivers, cameras, video recorders, and computer central processing unit for performing toll collection; roadway vehicle tracking systems comprised of signal transmitters and receivers, cameras, video recorders, and computer central processing unit for processing and tracking vehicle license plates; identification of friend or foe systems comprised of signal transmitters and receivers, and computer central processing unit for performing signal encryption and decryption; environmental weather and climatological surveillance monitoring and forecasting systems comprised of radar transmitters and receivers, and computer central processing unit for signal analysis and image display; military intelligence data gathering and processing systems comprised of radar transmitters and receivers, and computer central processing unit for signal analysis; wireless network systems comprised of wireless modems and satellite communication receivers and transmitters; integrated circuit systems being circuit boards provided with integrated circuits; oceanic depth finding systems comprised of pressure sensors, temperature sensors, and computer central processing unit for signal analysis and image display; electronic compasses for maritime use; electric transformers; power transformers; uninterruptible power supplies; and electronic modulators for wireless networks and cellular communications equipment; monolithic microwave integrated circuits; computer hardware; downloadable computer software, namely, downloadable software for the creation of firewalls; downloadable software for security analytics; downloadable software for use by security analysts to facilitate the search and analysis of data related to cyber and real-world threats; downloadable software for network security, load balancing, and routing; downloadable software for web, hardware, network, computer and internet security; downloadable software for monitoring and/or controlling access to sites and locations on a global computer network; downloadable computer software for data security that enables safe, secure and simultaneous data movement within and between computer networks; downloadable security software that enables, controls and audits sharing of information across computer networks; downloadable software that enables users to enable and control access to computers, computer networks, data, documents and other software applications with multiple and differing access criteria; downloadable software that provides users with simultaneous access to multiple computer networks; downloadable computer software for security and protection, namely, downloadable software for providing web security and protection, providing e-mail messaging security and protection, and for data loss prevention; downloadable computer software for the security and protection of data, networks and communications; downloadable software for analyzing radar system inputs and directing interception of missiles; telecommunications apparatus, namely, radio transmitters, transceivers, and audio-frequency amplifiers; radio monitoring apparatus, namely, monitors for monitoring radio current and signals; electronic flight control surface actuators; machine, engine or motor control device, namely, electronic engine controls and full authority digital engine controls for aerospace vehicles; battery chargers for airplanes, space ships, military vehicles, military drones and military tactical robots, electric transformers, and electric discharge tubes other than for lighting; lights specifically made for protective tactical vests; missile defense systems, namely, radar systems detecting and analyzing incoming missiles and artillery launchers to deploy interceptors to destroy incoming missiles; automatic distribution machines, namely, electrical power distribution units; electronic fluid control valves for gas turbine engines and temperature and pressure sensors for gas turbine engines

automatic valves; nozzles, namely, automatic nozzles for spraying fuel; auxiliary power units for supplying electrical power to airplanes, space ships, military vehicles, military drones and military tactical robots; electronic controllers for toilet valves

### **Class 11**

(6) Electric lamps; lights for aircraft; lights for aerospace vehicles; aircraft interior products, namely, environmental control equipment in the nature of air conditioners, heat exchangers not being parts of machines, cold plates in the nature of heat sinks for cooling electronic equipment; aircraft interior products, namely, food preparation structures, appliances and equipment in the nature of galley heating and cooling appliances, beverage makers, and galley chillers; electric food and beverage equipment for airplane galleys, namely, coffee makers, water boilers, cooking and warming ovens, refrigerators and freezers, hot water dispensers, beverage dispensers, hot beverage makers, and food and beverage heating units; aircraft toilets and associated systems and components, namely, toilet bowls, toilet seats, toilet frames, toilet flush valves, toilet rinse valves, electronic controllers for toilet valves, vacuum generators, wastewater storage tanks, and wastewater pipes and pipe fittings, sold together as a unit; aircraft interior products, namely, lavatory compartments sold equipped with sanitary facilities in the nature of toilets and sinks; aircraft interior products, namely, aircraft potable water and vacuum waste systems comprised of lavatory compartments, toilets, sinks, plumbing fittings in the nature of valves and couplings and plumbing fixtures in the nature of sinks, sink traps and faucets; aircraft vacuum waste system consisting of a lavatory and waste holding tank; aircraft interior products, namely, aircraft interior structures and monuments, namely, galleys sold equipped with food preparation apparatus in the nature of heating and cooling appliances

### **Class 12**

(7) Aircraft and structural parts for aircrafts, namely, seats, engines, brakes, wing, tail, rudder, aileron, and stabilizers, engine bay doors, water tanks, chassis and enclosures, aeronaves; unmanned aircraft; aviation fuel truck joint; apparatus for locomotion by land, air or water, namely, gas turbine engines; aircraft landing gear; aircraft; aircraft propellers and structural parts for aircraft propellers

### **Class 13**

(8) Missiles, namely, cruise missiles, pyrotechnic missiles, ballistic missiles, guided missiles, ship-to-air missiles; firearms; ammunition and projectiles being armour-piercing incendiary projectiles, guided projectiles, rocket projectiles; explosives; fire flare; fireworks; torpedoes; firearm sights and scopes

### **Class 17**

(9) Rubber seals for aircrafts and gas turbine engines; weather stripping compositions, packing and insulation in the nature of non-metal weather strips for use in aircrafts

## **Services**

### **Class 35**

(1) Business management and operations consulting and advisory services; business consulting services in the field of cybersecurity; business consulting services in the field of data security

### **Class 37**

(2) Aerospace vehicle maintenance, repair and overhaul; maintenance, repair, and servicing of pumps, blowers, and compressors; installation of complex electronic equipment and systems for airplanes, space ships, military vehicles, military drones and military tactical robots

### **Class 38**

(3) Emergency and disaster communications services via telephone, wireless network and satellite; aeronautical communications services via telephone, wireless network and satellite; teleprocessing, namely, email services, text messaging services, telegraph services; railroad telecommunications via telephone, wireless network and satellite; satellite communications services being satellite transmission of messages and data for navigation by air; providing Internet services to airline passengers; aeronautical air-ground-air-radio service

#### **Class 39**

(4) Providing travel information from an online computer database and an online interactive map

#### **Class 41**

(5) Training in servicing and repair of aircraft and global navigation systems and components, in use of electronic navigation equipment/ and systems for space ships, military vehicles, military drones and military tactical robots, pumps, blowers, and compressors; training on how to operate unmanned aircraft; training in the field of chemical and biological incident response; training of first responders on use of unmanned aerial vehicle equipment and distribution of service manuals and video materials therewith; training in the use of complex electronic equipment and systems for airplanes, space ships, military vehicles, military drones and military tactical robots

#### **Class 42**

(6) Mechanical engineering and computer programming services for aircraft and aerospace vehicles, parts and components; aircraft product development; providing weather and meteorological information; providing Internet search engine services for retrieving data; research consultation services namely research and development of new products for others specifically for airplanes, space ships, military vehicles, military drones and military tactical robots; mechanical engineering and industrial engineering research services; mechanical engineering and industrial engineering; mechanical engineering and industrial engineering counselling; providing online, non-downloadable software to protect users from cyber intrusions; cybersecurity services in the nature of preventing unauthorized computer access; mechanical engineering services for the operation of complex electronic equipment and systems; cybersecurity services; providing online non-downloadable computer software services, namely, web, hardware, network, computer and internet security services by restricting and monitoring access to unauthorized areas in a global computer network or any other publicly accessible computer network for the purposes of promoting security and the computer user's productivity, by restricting access to and by computers to web sites, and by providing email messaging security and electronic data security; providing temporary use of non-downloadable computer software, namely, software for the creation of firewalls, software for security analytics, software for use by security analysts to facilitate the search and analysis of data related to cyber and real world threats, software for network security, load balancing, and routing, software for web, hardware, network, computer and internet security, software for monitoring and/or controlling access to sites and locations on a global computer network, software that enables safe, secure and simultaneous data movement within and between computer networks, software that enables, controls and audits sharing of information across computer networks, software that enables users to enable and control access to computers, computer networks, data, documents and other software applications with multiple and differing access criteria, and software that provides users with simultaneous access to multiple computer networks; providing temporary use of non-downloadable computer software for security and protection, namely, software for use in maintaining and monitoring web security, data security and e-mail security; software as a service (SaaS) services, namely, hosting cloud and data center infrastructure software for use by others in relation to security and protection computer software; cloud-based data protection services featuring computer software for use in security and

protection; providing online non-downloadable computer software services for the security and protection of data, networks, and communications

**Class 45**

(7) Airport security control services for persons and luggage

### Goods

#### Class 02

(1) Anti-reflective optical coatings

#### Class 04

(2) Fuel propellants for use in rocket motors

#### Class 06

(3) Metal ball mats and ball mats comprised primarily of metal for use in cargo loading spaces of aerospace vehicles; roller tracks for loading cargo; metal couplings and manifolds for aerospace construction

#### Class 07

(4) Impact machines for breaching concrete; rocket motors for use in spacecraft and missiles, structural parts therefor and controls sold as a unit; aircraft jet and marine engines and replacement and structural parts therefor; electric roller devices, namely, roller conveyors used to transport and place portable storage containers; power winches and lifts and hoists for aerospace vehicles; cargo winches; aerospace vehicle parts, namely, transmissions, blowers, valves, starters; turbine power systems comprised of a hot gas turbine and a pump for auxiliary and hydraulic power for use in aviation and space vehicles; ram air turbines for use in aviation and space vehicles; hydromechanical actuators for aircraft flight controls; air cycle machines and water separators for aircraft; fuel pumps for rocket engines and replacement parts and controls sold as a unit; stationary machine tools, namely, electric duplicating machines for following the contour of an object and or automatically duplicating the same or shaping a work piece in accordance therewith; electric vibratory drilling and/or abrading machines for applying vibration to an object to remove portions of said object or another object therefrom; generators of electricity, namely, wind-powered electricity generators and hydroelectric generators; shock absorbing cylinders being parts of machines; engine starters; couplings and belts transmission for machines (except for vehicles); machines for vulcanization of tires; temperature controlled compressors being parts of machines; industrial machines, namely, electric motors; resistance welding machines; machine parts, namely, dust filters; valves, namely, hydraulic and pneumatic valves being parts of machines for aircraft

and spacecraft construction and gas turbine engines; hydraulic and pneumatic valves as machine components; valves for pumps; exhaust nozzles for gas turbine engines for use with aviation and space vehicles; metal hydraulic and pneumatic valves for aerospace construction; vacuum generators for aircraft toilets; elevators for aircrafts; nozzles, namely, automatic nozzles for spraying fuel; automatic suction nozzles for industrial machinery for use in the manufacturing or processing of goods; metallic seals for gas turbine engines

### **Class 09**

(5) Aerospace vehicle sensors for engine control units to increase engine performance; aerospace vehicle sensors for determining the rate of motion; photo-electric cells; television lamps; military computer mobile systems comprised of computer central processing units and displays, electronic and mechanical shock absorbers and shock isolators; active and passive countermeasure equipment comprising signal transmitters and receivers, and computer central processing units for generating communication data for aircraft and vehicles; communication computers for aircraft and vehicles; electronic transmitters for jamming signals for aircraft and ground vehicles; aerials, namely, radio aerials and satellite aerials; laser perimeter awareness systems comprised of lasers, optical receivers and associated controls; aerospace ice detectors; aerospace sensors for monitoring angle of sideslip, gas path engine pressure, current-to-heater system interruptions, brake temperatures, air data, altitude, pitot pressure, static pressure, angle of attack, temperature, engine exhaust, inlet pressure, engine temperature, fuel and oil temperature, navigation; aerospace sensors for flight crew safety and security; air traffic control systems comprised of radio equipment, radar transmitters and receivers, global positioning systems consisting of computers, computer software, transmitters, receivers, and network interface devices, and computer central processing units for image display and analysis; radar transmitters, detectors, receivers; aircraft navigation and landing systems, namely, automatic direction finders, radio altimeters, distance measuring equipment, global position sensors, navigation receivers, multimode receivers, VHF omni-directional range marker beacon receivers; aerospace communication systems comprised of receivers and transmitters, and computer central processing units for processing communication information; aircraft interior products, namely, emergency oxygen systems for aircraft passengers and flight crews comprised of oxygen masks not for medical use, chemical oxygen generators, empty oxygen storage vessels, gas pressure regulators, oxygen distribution circuits and controls, and protective breathing equipment being oxygen breathing units; aircraft navigation and landing systems comprised of high frequency signal transmitters and receivers, global positioning units and central computer processing units for image display and analysis; aircraft intrusion and fire alarm systems comprised of sensors, sound emitting devices and circuitry for aircraft; antenna tuning apparatus being radar antennas and radio antennas; microwave communications transmitter; battery accumulators; optical fiber; downloadable computer operating software for the analysis of aerospace vehicle operation and operation of computer networks; radio-frequency modulators for wireless networks and cellular communication and modulators for monolithic microwave integrated circuits; space suits; antennas, namely, microwave antennas, panel antennas, parabolic antennas, satellite antennas; downloadable computer operating programs for the management of tactical robots for use in military operations on the battlefields; computerized aircraft engine analyzers; power controllers for fuel cells; avionics systems for aircraft and aerospace vehicles consisting of communication and navigation hardware for use in airborne applications comprising computer hardware, software and displays for communications and navigation for aircraft and aerospace vehicles and for head-up display guidance systems, namely, flight situational awareness; rechargeable electric storage batteries; solar batteries; battery eliminators for providing backup power for electric storage batteries and solar batteries; cabin pressure control systems comprised of cabin pressure controller, control panel, pressure relief

valve, outflow valve and structural and replacement parts therefor; calculators; data processing equipment, namely, central processing units, computer motherboards, computer daughterboards, computer expansion boards, circuit boards, cables for electrical and optical signal transmission, computer hardware, word processors, digital signal processors, sound processors, digital voice signal processors, graphics processor units, video processors, signal processors, computer memory expansion modules, computer monitors, computer operating systems, computer touch screens, external computer hard drives, supercomputers and computers; cameras; climate and weather monitoring and forecasting systems comprised of radar transmitters and receivers and computer central processing units for processing climate and weather data; climate control systems for aerospace vehicles consisting of thermostats, air conditioning, heating, ventilation and drying control devices; climatological surveillance systems comprised of radar transmitters and receivers; collective radio communication apparatus for ships, aircraft, vehicles being broadband radios; portable communications equipment, namely, modems, receivers, transceivers, and waveforms for use in air-to-ground secure communication networks; downloadable computer operating software for radio frequency transmitters for tracking and disturbing radio communication; downloadable computer operating software for computer network-attached storage [NAS] for the secure storage of digital files on computer; missile launch systems comprising downloadable software for analyzing a target's location and actuating warheads, motors and propulsion systems for deploying warheads, and warheads for destroying targets; communications computers and systems for aircraft, namely, receivers, transmitters, amplifiers, transceivers, jammers, couplers, audio distribution units, satellite communication units, automatic control computer central processing unit for gas turbine engines, radar and GPS systems used for the transmission of interrogation signals and the reception of response signals, and downloadable software for analyzing such signals to enable communication between aircraft; electric compensating cables; computer hardware for telecommunications; downloadable computer programs for military surveillance; downloadable computer programs for organizing and viewing digital images and photos; downloadable computer operating programs for analyzing computer software and networks for use with for use with aviation, space and military vehicles; downloadable computer operating programs for the wireless transfer of content from the bridge to the tower in the field of aviation, space and military; downloadable computer programs for integrated bridge control systems for positioning and propulsion control of rudders and thrusters in the field of aviation, space and military; downloadable computer software used in oxygen delivery systems for aircraft; downloadable operating software for military mobile computers; computerized analyzers to monitor the condition of oxygen concentrators and ventilators for life support; computers; electric motor speed and direction controls; electronic controls for engines for aerospace vehicles; electronic throttle controllers; electronic brake monitoring controls and fuel controls for aerospace vehicles; electrical and electronic controls, namely, electro-hydraulic transducers and electrical sensors and replacement parts therefor; data collection and data processing systems comprised of computer central processing units and antennas for military information; deep ocean control systems comprised of sonar; gyroscopes for maritime use; oceanic depth finding systems comprised of pressure sensors, temperature sensors and computer processing unit for signal analysis and image display; electronic simulators for digital weapon systems for tactical military training; echo sounders; electric power distribution units, power supplies, power switches, power distribution and generation sensors for power generation all for airplanes, space ships, missiles, rockets and military drones; electric power distribution systems comprised of automatic power management unit, solid state power controls and secondary power distribution assemblies for airplanes, space ships, military vehicles and military tactical robots; electric power distribution unit for aircraft; electrical circuits; electronic compass for navigation; emergency signal transmitters; weapons locators, namely, acoustic detection and computer-based

signal processing unit for sensing and determining the location of weapon detonation; fire extinguishers; laser warning receivers for use in detecting, analyzing and locating the direction of laser; optical communication instruments and components, namely, optical and digital transmitters and receivers; satellite connection systems comprising downloadable security-enhanced software establishing secure connections between ground stations and satellites; satellite navigation devices, namely, GPS receivers for communicating with GPS satellites, and downloadable anti-jamming software providing uninterrupted signal communications; satellite receiver; military training systems, namely, battlefield and flight simulation; submarine surveillance systems, namely, radar systems used for detection, imaging and classification of underwater submarines; thermal imaging sensors and equipment, namely, sensors for detecting infrared radiation to enable vision in darkness, dust or inclement weather, and sensors used for imaging, targeting and tracking of guided missiles; torpedo components and systems, namely, power supply, namely, batteries, electronic controls, electronic sensors, electronic navigational and positioning apparatus, namely GPS transmitters and GPS receivers; electronic aircraft touchdown protectors; undersea surveillance systems, namely, systems comprised of hydrophones, optical telemetry devices, and computer central processing unit for image display and analysis; optical telemetry devices for image display and analysis; wireless communications devices, namely smart phones, two-way radios, mobile telephones, satellites, radars, radio-frequency transmitters and receivers, radio frequency repeaters, all for recording, organizing, transmitting, receiving, manipulating, and reviewing voice, text, data, image, and audio files; digital forensics, namely, electronic aircraft integrated data acquisition units for collecting, integrating and recording data for monitoring, diagnosing and prognosticating aircraft subsystems, overall aircraft performance and performance of the aircraft crew; downloadable software for predictive analysis concerning maintenance and repair of individual aircraft engines and fleets of aircraft engines using operational data downloadable computer software for cybersecurity; video modulators; video tape recorders; compass systems, namely, gyroscopes; imaging and targeting systems for military vehicles and weapon systems comprised of radar transmitters and receivers, and computer central processing unit for image display and analysis; ground-based radar sensors; infrared sensors and infrared sensing systems comprised of infrared transmitters and detectors, optical lenses, video monitors, and computer central processing unit for image display and analysis; thermal vision systems for vehicles comprised of signal transmitters and detectors, cameras, and computer central processing unit for image display and analysis; radar systems comprised of antennas and computer central processing unit; weapon locating systems comprising electro-optical sensors, radar transmitters and receivers, and computer central processing unit for image display and analysis; laser warning systems comprised of laser sensors, computer central processing unit for sensor signal analysis, and alarms; remote sensing and surveillance instruments for aircraft and space applications comprised of satellite receivers and transmitters, optical sensors, spectral filters, and computer central processing unit for image display and analysis; active and passive countermeasure equipment comprising signal transmitters and receivers, and computer central processing unit for generating communication data for aircraft and vehicles; mobile military computer systems comprised of computer central processing unit and displays, electronic and mechanical shock absorbers and shock isolators; satellite communication systems comprised of satellite receivers and transmitters, and computer central processing unit for processing communication information; sonar systems comprised of sonar transducers, and computer central processing unit for sonar signal analysis and image display; undersea surveillance systems comprised of hydrophones, optical telemetry devices, and computer central processing unit for image display and analysis; aircraft navigation and landing systems comprised of high frequency signal transmitters and receivers, global positioning systems, consisting of computers, computer software, transmitters, receivers and network interface devices, and computer central processing

unit for image display and analysis; aircraft communication systems comprised of high frequency signal transmitters and receivers, and computer central processing unit for generating communication information; multi-party radio communication systems comprised of radio frequency signal transmitters and receivers, and computer central processing unit for analyzing and modulating frequency signals; roadway toll collection systems comprised of signal transmitters and receivers, cameras, video recorders, and computer central processing unit for performing toll collection; roadway vehicle tracking systems comprised of signal transmitters and receivers, cameras, video recorders, and computer central processing unit for processing and tracking vehicle license plates; identification of friend or foe systems comprised of signal transmitters and receivers, and computer central processing unit for performing signal encryption and decryption; environmental weather and climatological surveillance monitoring and forecasting systems comprised of radar transmitters and receivers, and computer central processing unit for signal analysis and image display; military intelligence data gathering and processing systems comprised of radar transmitters and receivers, and computer central processing unit for signal analysis; wireless network systems comprised of wireless modems and satellite communication receivers and transmitters; integrated circuit systems being circuit boards provided with integrated circuits; oceanic depth finding systems comprised of pressure sensors, temperature sensors, and computer central processing unit for signal analysis and image display; electronic compasses for maritime use; electric transformers; power transformers; uninterruptible power supplies; and electronic modulators for wireless networks and cellular communications equipment; monolithic microwave integrated circuits; computer hardware; downloadable computer software, namely, downloadable software for the creation of firewalls; downloadable software for security analytics; downloadable software for use by security analysts to facilitate the search and analysis of data related to cyber and real-world threats; downloadable software for network security, load balancing, and routing; downloadable software for web, hardware, network, computer and internet security; downloadable software for monitoring and/or controlling access to sites and locations on a global computer network; downloadable computer software for data security that enables safe, secure and simultaneous data movement within and between computer networks; downloadable security software that enables, controls and audits sharing of information across computer networks; downloadable software that enables users to enable and control access to computers, computer networks, data, documents and other software applications with multiple and differing access criteria; downloadable software that provides users with simultaneous access to multiple computer networks; downloadable computer software for security and protection, namely, downloadable software for providing web security and protection, providing e-mail messaging security and protection, and for data loss prevention; downloadable computer software for the security and protection of data, networks and communications; downloadable software for analyzing radar system inputs and directing interception of missiles; telecommunications apparatus, namely, radio transmitters, transceivers, and audio-frequency amplifiers; radio monitoring apparatus, namely, monitors for monitoring radio current and signals; electronic flight control surface actuators; machine, engine or motor control device, namely, electronic engine controls and full authority digital engine controls for aerospace vehicles; battery chargers for airplanes, space ships, military vehicles, military drones and military tactical robots, electric transformers, and electronic discharge tubes other than for lighting; lights specifically made for protective tactical vests; missile defense systems, namely, radar systems detecting and analyzing incoming missiles and artillery launchers to deploy interceptors to destroy incoming missiles; automatic distribution machines, namely, electrical power distribution units; electronic fluid control valves for gas turbine engines and temperature and pressure sensors for gas turbine engines automatic valves; auxiliary power units for supplying electrical power to airplanes, space ship, military vehicles, military drones and military tactical robots; electronic controllers for toilet valves

**Class 11**

(6) Electric lamps; lights for aircraft; lights for aerospace vehicles; aircraft interior products, namely, environmental control equipment in the nature of air conditioners, heat exchangers not being parts of machines, cold plates in the nature of heat sinks for cooling electronic equipment; aircraft interior products, namely, food preparation structures, appliances and equipment in the nature of galley heating and cooling appliances, beverage makers, and galley chillers; electric food and beverage equipment for airplane galleys, namely, coffee makers, water boilers, cooking and warming ovens, refrigerators and freezers, hot water dispensers, beverage dispensers, hot beverage makers, and food and beverage heating units; aircraft toilets and associated systems and components, namely, toilet bowls, toilet seats, toilet frames, toilet flush valves, toilet rinse valves, electronic controllers for toilet valves, vacuum generators, wastewater storage tanks, and wastewater pipes and pipe fittings, sold together as a unit; aircraft interior products, namely, lavatory compartments sold equipped with sanitary facilities in the nature of toilets and sinks; aircraft interior products, namely, aircraft potable water and vacuum waste systems comprised of lavatory compartments, toilets, sinks, plumbing fittings in the nature of valves and couplings and plumbing fixtures in the nature of sinks, sink traps and faucets; aircraft vacuum waste system consisting of a lavatory and waste holding tank; aircraft interior products, namely, aircraft interior structures and monuments, namely, galleys sold equipped with food preparation apparatus in the nature of heating and cooling appliances

**Class 12**

(7) Aircraft and structural parts for aircrafts, namely, seats, engines, brakes, wing, tail, rudder, aileron, and stabilizers, engine bay doors, water tanks, chassis and enclosures, aeronaves; unmanned aircraft; aviation fuel truck joint; apparatus for locomotion by land, air or water, namely, gas turbine engines; aircraft landing gear; aircraft; aircraft propellers and structural parts for aircraft propellers

**Class 13**

(8) Missiles, namely, cruise missiles, pyrotechnic missiles, ballistic missiles, guided missiles, ship-to-air missiles; firearms; ammunition and projectiles being armour-piercing incendiary projectiles, guided projectiles, rocket projectiles; explosives; fire flare; fireworks; torpedoes; firearm sights and scopes

**Class 17**
