Trademarks Journal
Vol. 71 No. 3651

General Information

The *Trademarks Journal* (the "*Journal*") is published on the website of the Canadian Intellectual Property Office (http://cipo.gc.ca). The *Journal* lists trademark applications advertised under subsection 37(1) of the *Trademarks Act* (the "*Act*"), public notices of prohibited marks under section 9 of the *Act*, statements of the Minister in respect of geographical indications under subsection 11.12(2) of the *Act*, as well as erratums to previous volumes.

Electronic *Trademarks Journal*

The *Journal* is available in PDF format and can be downloaded free of charge and viewed and printed with Adobe Acrobat Reader. The *Journal* is also available in a printable HTML format as an alternate official version that contains a search function to narrow and customize the content. The electronic form of the *Journal* is the official version.

Official Languages

The *Journal* is available in English and French. The details displayed for each application are based on the language of the application. If the language of the application is English, the goods, services, or other text and description appearing in the English version of the *Journal* are in the language filed by the applicant. If the language of the application is French, the goods, services, or other text and description appearing in the English version of the *Journal* have been translated. Any registration resulting from the application will be restricted to these goods or services as described in the language of the application.

Filing Dates

The filing date of each trademark application (including those to extend the statement of goods or services of an existing registration) is shown in the YYYY-MM-DD format.

Nice Classification

Where applicable and required, the *Journal* lists the goods or services of each application grouped according to the classes of the Nice Classification, each group being preceded by the number of the class of the Nice Classification to which that group of goods or services belongs and presented in the order of the classes of the Nice Classification.

Opposition

Any person who has a valid ground of opposition (see section 38 of the *Act* for the grounds of opposition) to any application for registration of a trademark or to any application for registration of a trademark extending the statement of goods or services advertised in this *Journal* may file a statement of opposition with the Registrar of Trademarks within two months from the date of issue of this publication. The prescribed fee must accompany the statement of opposition.

Class 02

(1) Coatings in the nature of electrically conductive inks for use in the manufacture of printed circuits

Class 07

(2) Generators of electricity; thermoelectric generators; printing cylinders; industrial inkjet printers for use in printing resistors and heaters using electrically conductive inks; printing rollers for machines; printing plates; inking apparatus for printing machines; rolling mills; adhesive tape dispensing machines; blade holders, being parts of machines; die-cutting and tapping machines; die-stamping machines; stitching machines; sealing machines for industrial purposes; riveting machines; punches for punching machines; electroplating machines; forging moulds; injection molding machines; painting machines; spray guns for paint; industrial robots for working metal; road rollers; road building machines, namely, road paving machines, concrete paving machines, asphalt paving machines, road rollers, ground surface finishing and compacting machines, road scrapers, earth moving scrapers, tracked and wheeled tractors equipped with attachments, namely, mowers, augers, drills, compactors, spraying equipment, snow blowers, snow plows, buckets, and shovels, rock trucks, off-road mobile cranes, off-road excavators, and low-speed street sweepers; railroad constructing machines, namely, assembly of electrically heated railroad ties

Class 08

(3) Punch pliers; hand tool punches; hand held cutting tools; crimping iron hand tools; hand tools.

Class 09

(4) Printed circuits; electric cables; heat regulators; sheaths for electric cables; protective sheaths for electric heaters; ground-fault protection devices for electric heaters; circuit breakers; electrically controlled contactors; electric relays; electric limiters; distribution boards; distribution consoles; electrical switch panels; electric transformers; DC/AC inverters; distribution boxes for electrical power; electrical distribution boxes; junction boxes; covers for electric outlets; battery boxes; automotive batteries; capacitors; electric accumulators integrated into electric heaters for static

charge and discharge of leakage current; plug adapters; electric current switches; electric plugs; current rectifiers; computer network switches; electric ducts; cathodes; electric cables; insulated copper wire; terminals for interfacing with conductors; electricity conduits connectors; connections for electric lines couplings, electrical connectors; mechanical wire connectors; junction sleeves for electric cables; electric sockets identification threads for electric wires;identification sheaths for electric wires; electric installations for the remote control of heating operations of flexible and rigid electric heating panels; control panels for measurement, temperature and power regulation, protection, and metering; meters for monitoring electrical consumption; climate control digital thermostats; electric ohmmeters; ammeters; thermostats; digital thermometers, not for medical purposes; rheostats; hydrometers; water level indicators; meteorological instruments; accelerometers; infrared detectors; piezoelectric sensors; time switches; photovoltaic cells; fluorescent screens; flashing safety lights; luminous and mechanical signals; organic light-emitting diodes [OLED]; quantum dot light-emitting diodes [QLED]; light-emitting diodes [LED]; GPS receivers; GPS transmitters; radio signal antennas; theft alarms; anti-theft alarms, other than for vehicles; filters for radio interference suppression; solenoid valves [electromagnetic switches]; integrated circuits; computer operating programs; computer monitors; computer display screens; video screens; computer programs for controlling human input/output interfaces, namely, electronic display interfaces and control panels; electronic tags for goods, fire blankets, traffic cones, printers for use with computers; electrical ground fault detectors; electrical conductors for electric motors; blank integrated circuit cards; electronic chips for the manufacture of integrated circuits.

Class 10

(5) Draw-sheets for sick beds; electric blankets for medical purposes.

Class 11

(6) Heating elements; heating installations using planar electric heaters; heat accumulators; heat exchangers; thermoelectric cells using semiconductor inks; electric radiators for heating buildings; electric radiators for heating surfaces; heaters for vehicles; water heaters; immersion heaters; heaters for heating irons; electric footwarmers; plate warmers; hot plates; cooking stoves; electric deep fryers; electrical elements for a cooking apparatus, namely, fryers, grills, steamers, roasters, pots, cookers, broilers; defrosters for vehicles; bread toasters; electrical elements for ovens; heating plates; heat regulators being parts of heating installations; electric heaters for feeding bottles; solar thermal collectors; pocket warmers; electric heating cushions; electric heating pads; electric snow melting and de-icing pads; sauna bath installations; electric bed warmers; electric blankets; aquarium heaters; electrically heated carpets; electric dryers for fabrics and clothes; electric cooktops; USB-powered hand warmers; USB-powered cup heaters; electric griddles; electric grills; electric resistance heating panels.

Class 17

(7) Electrical insulation; insulating refractory materials; pipe jackets; plastic films for electrical insulation; foils of metal for insulating; paper for electrical capacitors; insulators for cables; insulators for electric mains; fibreglass for insulation; fibreglass fabrics for insulation; soldering threads of plastic; insulating tapes; insulating paper; insulating felt; insulating plaster; insulating fabrics; insulating varnish; insulating paints; mica; slag wool for insulation; mineral wool for insulation; glass wool for insulation; aerogel blankets for insulation; non-metal pipe jackets; padding materials of rubber or plastics for the mounting of electric heating apparatus onto surfaces; rubber solutions; weatherstripping compositions; metal gaskets; synthetic rubber; shock-absorbing buffers of rubber; latex rubber; liquid rubber; caulking materials; expansion joint fillers; vulcanized fiber; rubber thread and covered rubber yarn; carbon fibers; sealant compounds for

joints; semi processed synthetic resins; semi-processed plastic substances; artificial resins, semi-processed; semi processed acrylic resins; plastic filaments for 3D printing.

Class 19

(8) Roofing shingles; non-metal stair-treads; geotextiles; fireproof cement coatings; road marking sheets and strips of synthetic material; concrete; concrete blocks, paving stones, pipes, pillars, piles, bricks, slabs; mortar for building; grout; plaster; clay for use as building material; gravel; gypsum; lime; limestone; binding material for road repair; asphalt; asphalt paving bitumen; bitumen paper for building; bituminous coatings for roofing; shingles; non-metal roof coverings for electric heating apparatus and installations; non-metal roofing incorporating photovoltaic cells, agglomerated cork for building; non-metal wall claddings for electric heating apparatus and installations, namely electric water heaters; flooring underlay for thermal, insulation, sound insulation, surface uncoupling and heat generation.

Class 24

(9) Bed covers; bed blankets; mattress covers; sheets; sleeping bag liners; pillowcases; tablemats of textile; fabrics for textile use; non-woven textile fabrics; cotton fabrics; fibreglass fabrics for textile use; fiberglass fabrics for textile use; filtering materials of textile; printers' blankets of textile.

Class 27

(10) Bath mats; gymnastic mats; door mats; anti-slip floor mats, anti-slip mats for outdoor use; fire-resistant floor mats; yoga mats; tatami mats; carpets; carpet underlay; wallpaper.

Services

Class 37

(1) Construction and repair of buildings; building construction supervision; electric appliance installation and repair; heating equipment installation and repair; kitchen equipment installation and repair; snow removal equipment installation and repair; roofing services; installation of utilities in construction sites; maintenance and repair of computer hardware; refilling of ink cartridges.

Class 40

(2) Screen printing; silkscreen printing; flexographic printing; lithographic printing; offset printing; laminating; applying finishes to textiles; permanent-press treatment of fabrics; window heating treatment; surface coating for thermal insulation, electrical grounding, and electric resistance heat generation; applying finishes to textiles; paper finishing; cloth edging; cloth cutting; textile dyeing; cloth dyeing; cloth waterproofing; fabric waterproofing; cloth fireproofing; fabric fireproofing; textile fireproofing; metal plating; electroplating; silver plating; cadmium plating; chromium plating; tin plating; nickel plating; gold plating; metal casting; laser scribing of plastic, metals and ceramics; galvanization; magnetization; rental of electricity generators; sandblasting services, welding services, soldering, custom 3D printing for others.

Class 41

(3) Publishing of books, magazines, reviews, textbooks, instruction manuals, and technical documentation; providing training in the fields of building and construction materials.

Class 42

(4) Industrial design; engineering in the field of materials science; construction drafting; scientific research in the field of materials science; technological research in the field of materials science; product design consulting services; construction project engineering; research and development for new products for others; research in the field of building construction; providing quality assurance in the construction industry; calibration of electronic equipment; material testing; textile

testing; laboratory research in the field of chemistry; chemical research; chemical analysis; laboratory testing of materials; scientific and technological research relating to patent mapping; consultancy in the field of energy-saving, urban planning, advice and consultancy in relation to carbon offsetting, energy auditing, research in the field of telecommunications technology, consultancy in the design and development of computer hardware, computer programming, computer software design, installation of computer software, rental of computer software, maintenance of computer software, updating of computer software, monitoring of computer systems by remote access, off site data backup, cloud computing provider services for general storage of data; hosting web sites; server hosting; packaging design; graphic design of promotional materials; weather forecasting.

(1) Safety products for fleets and vehicles, namely turn signal warning systems, comprised of computer hardware and embedded operating software for turn signal waring, back-up sensors and cameras, alarm horns, and computer hardware for electric vehicles waring sound generators, and gas sensors

(2) Road safety products including vehicle, pedestrian, and cyclist safety products, namely temperature sensor

(3) Sensors, lasers, and guidance systems for vehicles, namely computer hardware with embedded operating software, motion sensors, proximity sensors, distance sensors, temperature sensors, laser object detectors for use on vehicles, visual alert system comprised of a laser beam for use as visual indicator for use in controlling and driving snow plows

(4) Safety products for stationary systems, namely, audio frequency amplifiers, electronic warning signal chimes, and white noise signal processors

(5) Weather and environmental safety products namely, products for providing information on road conditions and weather conditions such as rain, snow, and ice accumulation, namely, electronic LED signs

(6) Vehicle and equipment back-up cameras; safety products for mobile equipment and vehicles, namely internal warning systems comprised of motion, distance, and proximity sensors, radar detectors, laser object detectors for use on vehicles, visual alert system comprised of a laser beam for use as visual indicator for use in controlling and driving snow plows, and vehicle parking assist system comprised of parking sensors for vehicles and embedded operating software

Class 11

(7) Sensors, lasers, and guidance systems for vehicles, namely, visual alert system comprised of laser light beam projectors for vehicles

Services

Class 37

(1) Installation and maintenance services of safety products for fleets and vehicles, namely turn signal warning systems, comprised of computer hardware for turn signal waring, back-up sensors and cameras, alarm horns, and computer hardware for electric vehicles waring sound generators, and gas sensors; installation and maintenance services of road safety products including vehicle, pedestrian, and cyclist safety products, namely temperature sensor; installation and maintenance services of vehicle and equipment back up cameras; installation and maintenance services of Safety products for mobile equipment and vehicles, namely internal warning systems comprised of motion, distance, and proximity sensors, radar detectors, laser object detectors for use on vehicles, visual alert system comprised of a laser beam for use as visual indicator for use in controlling and driving snow plows, and vehicle parking assist system comprised of parking sensors for vehicles; Installation of safety products for mobile equipment and vehicles, namely Internal warning Systems comprised of motion, distance, and proximity sensors, radar detectors, laser object detectors for use on vehicles, visual alert system comprised of a green laser beam for use as visual effects for use in controlling and driving snow plows, snow throwers, and snow blower, and vehicle parking assist system comprised of parking sensors for vehicles

(2) Installation and maintenance services of sensors, lasers, and guidance systems for vehicles and equipment, namely computer hardware with embedded operating software, motion sensors, proximity sensors, distance sensors, temperature sensors, laser object detectors for use on vehicles, and visual alert system comprised of a laser beam for use as visual indicator for use in controlling and driving snow plows

(3) Installation and maintenance services of safety products for stationary systems, namely, audio frequency amplifiers, electronic warning signal chimes, and white noise signal processors

(4) Installation and maintenance services of weather and environmental safety products including products providing information on road conditions and weather conditions such as rain, snow, and ice accumulation, namely, digital weather stations, weather radar, computer software applications for mobile phones and vehicle onboard computers for accessing weather information for road safety

Class 40

(5) Custom manufacture of sensors, lasers, and guidance systems for vehicles and equipment, namely computer hardware with embedded operating software, motion sensors, proximity sensors, distance sensors, temperature sensors, laser object detectors for use on vehicles, and visual alert system comprised of a laser beam for use as visual indicator for use in controlling and driving snow plows

(6) Custom manufacture of safety products for fleets and vehicles namely turn signal warning systems, comprised of computer hardware for turn signal waring, back-up sensors and cameras, alarm horns, and computer hardware for electric vehicles waring sound generators, and gas sensors; custom manufacture of road safety products including vehicle, pedestrian, and cyclist safety products, namely temperature sensor; custom manufacture of vehicle and equipment back-up cameras; custom manufacture of safety products for mobile equipment and vehicles, namely Internal warning systems comprised of motion, distance, and proximity sensors, radar detectors, laser object detectors for use on vehicles, visual alert system comprised of a green laser beam for use as visual effects for use in controlling and driving snow plows, snow throwers, and snow blower, and vehicle parking assist system comprised of parking sensors for vehicles

(7) Custom manufacture of safety products for stationary systems, namely, audio frequency amplifiers, electronic warning signal chimes, and white noise signal processors

Class 42

(8) Safety product development services for fleets and vehicles; product development services of road safety products including vehicle, pedestrian, and cyclist safety products; product development services of vehicle and equipment back-up cameras; product development services of safety products for mobile equipment and vehicles; product development services of safety products for mobile equipment and vehicles

(9) Product development services of safety products for stationary systems

(10) Product development services of transit safety products

(11) Product development services of weather and environmental safety products including products providing information on road conditions and weather conditions such as rain, snow, and ice accumulation; custom manufacture of weather and environmental safety products including products providing information on road conditions and weather conditions such as rain, snow, and ice accumulation, namely, digital weather stations, weather radar, computer software applications for mobile phones and vehicle onboard computers for accessing weather information for road safety

Computer hardware; computer software for controlling and operating computer hardware for data processing; computer software for database management; central processing units (CPU); integrated circuits; microprocessors; microcontrollers; semiconductors; modems; Sensors, namely, proximity sensors, motion sensors, temperature sensors, thermal sensors, timing sensors, touchscreen sensors, ultrasonic sensors, and vibration sensors; lithium-ion battery chargers; accelerometers; applications processors, namely, computer hardware for data processing; computer hardware accelerators; circuit boards; circuit board assemblies; electronic data conversion circuits; data storage devices, namely transponder chips and tags and card packages containing same; development electrical circuit boards, evaluation electrical circuit boards and reference design kits of electrical circuit boards for use in manufacture of semiconductors, sensors and software; digital signal controllers in the nature of digital signal processors; digital signal processors; direct digital synthesizers; earbuds; electronic access cards in the nature of electronic identification cards; electronic identification cards; electronic labels, electronic stickers and electronic tags for identification and security purposes; electronically encoded identity wristbands; headphones; high power electronics, namely radio frequency (RF) amplifiers, high side power switches and battery sensors for detecting and provide real time status of battery's state of charge and performance; microcircuits; microcomputers; mobile phones; radio frequency transistors; downloadable computer software for customizing computer application user interfaces for managing computer hardware for telecommunications; wireless communication computers and computer hardware with embedded operating software for recording, organizing, transmitting, receiving, manipulating, and reviewing voice, text, data, image, and audio files; computer hardware, computer software and firmware for remote monitoring of function of hardware and computer network, central processing units (CPU), semiconductors, integrated circuits, microcontrollers, and sound and signal processors, all for telecommunications; computer hardware, computer software and firmware for remote monitoring of function of hardware and computer network, central processing units (CPU), semiconductors, integrated circuits, microcontrollers, and sound and signal processors, all for mobile computing devices, computer hardware and embedded operating software for wireless content delivery; computer hardware and embedded operating software for data networking; computer hardware and software for

processing images, graphics, and text; computer hardware and software to enable augmented reality and virtual reality applications; computer hardware and software for battery charging; computer hardware and computer software for data security; computer hardware and software for the operation and control of drones; computer hardware and software for the operation and control of automobiles; Computer chipsets and computer software for operating and enabling computer server functionality; computer anti-virus and anti-spam software; computer chips, software, and hardware for wireless power transfer for use in charging vehicles; computer hardware and computer software based development tools, namely, compilers, debuggers, integrated development environments, run control, event analysis and trace, all for use in the development of stand-alone software programs used in devices such as network switches, engine control modules, cat-scan machines, industrial automation controllers, avionics and wireless handsets; computer hardware and computer software based development tools, namely, compilers, debuggers, integrated development environments, run control, event analysis and trace, all for use in the development of stand-alone software programs used in industrial, consumer and automotive applications; computer software for charging smart phones, tablets, and mobile electronic devices; computer software for enabling functionality of safety and testing systems of computers and computer hardware; computer software for enabling functionality of sensors, namely, proximity sensors, motion sensors, temperature sensors, thermal sensors, timing sensors, touchscreen sensors, ultrasonic sensors, and vibration sensors all for use in automotive, consumer, industrial and medical applications; computer software for managing computer networks; computer software for tracking computer hardware users' activity and location; computer operating system software, hardware and computer chipsets for use in transmitting data to and from a central processing unit for use with wireless communication apparatuses, consumer electronic devices, smart phones, digital cameras, IP cameras, drones, unmanned aerial vehicles (UAVS) and wearable mobile computers; computer hardware for processing digital signals, for processing background data and information on computer operating systems, for tracking user activity and location, for enabling activation by speech and touch and for detecting sensory cues and launching applications that correspond to specific sensory cues and computer operating software, hardware and computer chipsets for use in transmitting data to and from a central processing unit for use with these goods; computer software, hardware, and chipsets for streaming music and for synchronizing audio speakers in consumer electronics devices; computer software, namely compilers, linkers, support software to assist in the development of stand-alone programs, and software for assisting in the development of object oriented software applications, such as database systems; computer software, namely operating systems, board support packages (BSPS), virtualization technology software, hypervisor software, embedded software, applications programming interface (API) software, software libraries used to create other computer software; applications software for automotive, consumer, health care, medical, aerospace, military, cellular and mobile communications, networking, motor control, smart energy, and industrial applications, protocol stacks, configuration software, and optimization software; content filtering software, namely, computer software for controlling the access of content made available to a user on computers and computer networks; control plane software, namely, computer programs for network management; data plane software, namely computer software for managing, operating, and controlling computer hardware for telecommunication, communication computers, and smart phones; deep packet inspection software, namely, computer security software for network traffic analysis and network security management systems; downloadable computer software for developing computer hardware and software for chipsets for wireless devices; enterprise security software for use in gateway and other networking devices to provide network security; firewall software; integrated networking, security software, and collaboration software; internet security software; intrusion detection and prevention security software; load balancing network traffic management computer

software; VPN (virtual private network) operating software; integrated circuits, computer hardware and embedded operating software for signal processing in wireless communication apparatuses, consumer electronics devices, portable media devices, mobile gaming devices, pocket computing devices, and smart phones; apparatus for recording, transmission or reproduction of sound or images, namely computers, computer hardware, cameras, smart phones, and computer tablets; blank magnetic discs; recording discs, namely, blank digital computer discs, blank compact discs, and blank digital versatile discs; computer network interfaces hubs, switches and routers; electronic, electro technical and electromagnetic modules comprised of semiconductors, integrated circuits and microprocessors all for use in data transmission and radio-frequency identification (RFID) application; data processing computer hardware; Computer hardware for data storage; Interface boards and cards for computers; identification smart cards; smart card integrated circuits; RFID chips and tags; computer hardware and software for creating, programming, controlling, encoding, scanning, reading and interpreting RFID chips and tags; contactless identification smart cards; dual interface identification smart cards; dual interface integrated circuits that provide a link between contactless cards and contact cards; writers and readers for wireless transmission to and from transponder chips; computer hardware with embedded operating software for writing and reading of wireless transmission to and from transponder chips; computer programs for controlling transmission and reading of signals to and from transponder chips; data processing computers for fare determination using transponder chips; encoded identification smart cards; computer hardware, embedded operating software used for access control and authentication purposes; wearable activity trackers; smartphones; wearable telecommunication apparatus, namely, smart watches, virtual reality glasses, virtual reality headsets, smart sports eyewear, smart clothing being computer hardware incorporating telecommunication functions, smart footwear being wearable activity trackers, smart headsets, wearable activity trackers, wearable activity trackers with heart rate monitoring function; multicore micro processors; application-specific integrated circuits (ASICs); integrated circuits embedded with software; signal processors; digital signal processors (DSPs); vector processors; vector signal processors; communications processors being computer hardware; network call processors used in network and telecommunications equipment; application-specific hardware accelerators; wireless baseband computer hardware for data processors; base stations on a chip, namely wireless base stations on a chip multiprocessors; integrated circuits, namely system basis chips and systems on a chip (SOC); multicore microcontrollers; semiconductor chip sets comprised primarily of semiconductor chips; integrated circuit modules in the form of semiconductor packages and packaging, namely redistributed chip packaging (RCP), and systems-in-package (SiP); radio frequency (RF) power transistors; radio frequency semiconductors; sensors, namely, inertial sensors, pressure sensors, magnetic sensors, touch sensors all for use in automotive, consumer, and industrial applications; proximity sensors; radar sensors; capacitive sensors; acceleration sensors; gyro sensors; sensors for computer interfaces featuring software, firmware and electronic integrated circuit chips, namely, proximity sensors, motion sensors, temperature sensors, thermal sensors, timing sensors, touchscreen sensors, ultrasonic sensors, and vibration sensors; sensor systems comprised of sensors, computer software, microprocessors, microcontrollers, and logic or wireless protocols for enabling functionality of sensors for use in automotive, consumer, and industrial applications; electronic test instruments for developing and testing microprocessor-based systems; semiconductor memories; semiconductor devices, microcontrollers, integrated circuits, circuit boards, chipsets, all for management of operating frequency, voltage and power, optimization of static and dynamic power, power management, power optimization or power reduction; semiconductors, sensors being computer hardware and embedded operating software for use in automotive, consumer, aerospace, military, cellular and mobile communications, networking, motor control, smart energy, and industrial applications; semiconductors and software for use in healthcare and medical

applications; semiconductors, sensors being computer hardware and embedded operating software for use in wireless connectivity, battery management, smart grid, smart metering applications, engine control units (ECUs) and tire pressure monitoring systems (TPMS); microcontrollers, firmware for remote monitoring of hardware, sensors, and radio frequency (RF) connectors, amplifiers, receivers, repeaters, and transmitters, and analog -to-digital converters all for use with energy efficient wireless chargers; printed circuit boards namely evaluation boards and reference design kits consisting of software for semiconductors, sensors and software; computer application software, namely, computer software for editing images, sound, and video for use in applications for multimedia, graphics video, audio and numerically intensive computations; computer network switching software; computer convergence network software; computer network collaboration software, namely, computer programs for network management; quality of service software, namely, software to control and improve audio equipment sound quality; network access software; networking software for operation of chipsets; network management computer software for content processing; computer software, namely, firmware, applications and development tools, for searching the contents of computers and computer networks by remote control; failover prevention security software; stateful packet inspection software, namely computer firewall software to determine computer network packets; stateful application inspection software, namely computer firewall software that monitors the state of active connections of computer networks; enterprise security software; wireless radio controller software; command line management software, namely computer software for processed text commands to interact with computer operating system software; voice over IP software; video over IP software; network management computer software and security software for use with unified threat management equipment, gateways, integrated access devices, routers, switches, controllers, base stations, hubs, and security appliances; utility software for facilitating computer use at remote locations and for facilitating communications among mobile users over networks; computer security software for providing security to remote users and for implementing computer, software, and network security measures for remote users; component-based software modeling tool featuring a graphical user interface, automatic code generators and built-in knowledge-base for use in the rapid design, development, implementation, verification and optimization of embedded applications; software for use in developing other software titles; downloadable, searchable electronic publications, namely reference manuals, user guides, application notes and product specifications on the subject of semiconductors, sensors and software; user manuals in electronic format supplied with the foregoing; (2) Near field communication (NFC) technology-enabled readers; internet or things (IOT) devices, and industrial IOT devices, namely computer hardware with embedded operating software for data transmission and processing over the internet and computer networks; communication apparatus, instruments and equipment for near field communication (NFC), namely, near field technology-enabled devices, namely, mobile phones, smart phones, tablet computers, computers, computer printers, routers, headphones, audio speakers, digital cameras, televisions, remote controls for televisions and stereos, home and office electrical power automation systems comprising wireless controllers; communication apparatus, instruments and equipment for near field communication (NFC), namely electronic key cards, key fobs, near field communication (NFC) tags, near field communication (NFC) technology-enabled readers and integrated circuits for near field communication (NFC) applications; computer hardware and software for creating, programming, controlling, encoding, scanning, reading and interpreting RFID and NFC chips and tags; Computer hardware for data processing and embedded operating software for enabling, controlling, managing and monitoring all aspects of a paperless payment and access system employing RFID (radio frequency identification) and NFC (near field communication) technology, including allowing users to recharge their payment accounts remotely.

Services

Class 38

(1) Providing information in the field of telecommunications and telecommunications information relating to wireless communications and mobile technologies, namely providing access to databases via telecommunications networks; consulting in the field of telecommunication services, namely, transmission of voice, data, and documents via telecommunications networks, namely providing access to databases via telecommunications networks.

Class 42

(2) Providing technical information in the field of computers, computer software and computer systems design and development; providing information in the field of design and development of computer data networking; providing information in the field of network security and computer security; design for others of integrated circuits, semiconductors, microprocessors, computer hardware and software, and communications software and networks; developing, designing and testing semiconductors, semiconductor devices, integrated circuits, microcontrollers, processors, radio frequency (RF) devices, sensors and software, electro technical and electromagnetic modules and their parts and building elements, data storage apparatuses, interfaces, smart cards, controllers for smart cards, controllers for RFID chips and tags for others; computer software development in the field of mobile applications; design and development of wireless communications systems for transmission and reception of voice, data and video; design and development of battery charging technology; design and development of data networking systems; design and development of network security and computer security systems; design and development of computer hardware and software for the operation and control of drones; design and development of computer hardware and software for the operation and control of robots; design and development of computer hardware and software for the operation and control of automobiles; developing wireless power transfer technology for use in charging vehicles; providing technical information in the fields of semiconductors, semiconductor devices, integrated circuits, microcontrollers, processors, radio frequency (RF) devices, sensors and software; providing temporary use of online non-downloadable software applications, development platforms, and development tools that enable software developers to develop, program, build, and prototype software for integrated circuits, chips and data processing equipment; computer programming services; research and design of antennas for scanning, reading and interpreting RFID chips and tags; advisory services in relation to all the above; Platform as a service (PAAS) featuring computer software platforms for use in developing, programming, building, and prototyping IOT (internet of things) devices namely computer hardware with embedded operating software for data transmission and processing over the internet and computer networks; consulting in the field of computer hardware and software for use in telecommunications technology; design and development of wireless communications systems for authentication purposes; research and design of NFC (near field communications) apparatus, instruments and equipment; advisory services in relation to all the above.

Colour Claim
Colour is claimed as a feature of the trademark. The colours yellow, red, orange and dark blue are claimed as a feature of the mark. The mark consists of a yellow open circle with the thickness of the circle increasing from the lower right side to the upper left side and two angular tapered lines wrapping around the upper left side of the circle and extending through the middle and ending before they touch the lower right inside of the circle. The two lines are red on the left side and then proceed in a gradient to orange and then yellow as they move towards the right. The portion of the two lines that wrap behind the circle on the left side are dark blue.

Trademark Description
The mark consists of the literal element ILE DE FRANCE written on a banner featured under the design of a boat. The boat, which is sailing on white waves, features an anchor and portholes and is set inside a geometric element. Below the words ILE DE FRANCE are the words MINI ROLL, along with a broken horizontal line made up of three rectangles of varying lengths, all of which are set inside a larger rectangle. The words MINI ROLL and the series of horizontal lines are enclosed in a geometric shape with curved sides on the left and right. A larger geometric shape, with slanted corners, frames the words ILE DE FRANCE and MINI ROLL, as well as the series of horizontal lines. A rectangle featuring an image of two rolls extends from the bottom of the larger geometric figure. All of the aforementioned verbal and figurative elements appear on a larger rectangle with horizontal bands at the top and bottom. The horizontal band above the mark has ridges along its upper edge, while the horizontal band at the bottom of the mark has ridges along its lower edge. The object shown in dotted lines does not form part of the trademark and is merely included to show the positioning of the sign.

Goods

Class 01

(1) Oil and gas wellhead chemical drilling fluids; reservoir fluids, namely, chemicals for use in oil drilling and oil well construction; reservoir chemicals, namely, chemicals for use in oil drilling and oil well construction; chemicals for use in oil drilling; chemicals for use in oil well construction; chemical additives for oil well drilling fluids; chemicals for use with exploring, drilling, and transporting oil and gas; chemicals used in oil and gas production; water treatment chemicals; organic chemicals for treatment of cooling water systems, water boiling systems, water waste systems, chemical waste systems, for preventing scaling, corrosion, and fouling of equipment; chemicals for use in the production of chlorine dioxide; chemicals used in oil and gas well stimulation; chemicals used in oil and gas well fracturing; chemicals for use in enhancing oil recovery from wells; chemicals, namely, polymers, used in oilfield applications; chemicals for oil pipeline and midstream oil production applications; chemical additives for hydrocarbon removal and degassing, namely, in the refining and petrochemical industries.

Class 07

(2) Artificial lift systems, namely, mechanical and hydraulic lifts and gas powered mechanical and hydraulic lifts used in wellsite automation; artificial lift systems, namely, mechanical and hydraulic lifts with electrical submersible pumps for use in wellsite automation; artificial lift systems, namely, power-operated lifting equipment for lifting rods used in wellsite automation; drill bits for rock drilling; power drill accessories, namely, non-electrical adapters for use in joining extensions and power drill bits; mechanical power drill bits in the nature of polycrystalline diamond cutter drill bits for drilling machines; polycrystalline diamond compact drill bits for drilling machines; cutters, compactors, bearings and valves, made from polycrystalline diamond being parts of oil exploration

and drilling machines; pressure transducers as parts of machines; oil-well pumping machines; gas-well pumping machines; high-pressure pumps for use in oil or gas well hydraulic fracturing operations; water-well pumping machines; parts of oil, gas, and water well machines, namely, valve balls and seats, flapper valves, and pollution control stuffing boxes; structural components of artificial lifting power-operated lifting machines for use in oil and gas wells, namely, electric motors and protectors comprised of labyrinth chambers, elastomer bags, and/ or metal bellows to secure the electrical submersible pump from the surrounding fluids; snap pilots, namely, pneumatic valve actuators for level controllers; machine parts, namely, bearings and bushings; machine parts for gas-lift and plunger-lift equipment used to lift liquids from hydrocarbon wells, namely, plungers and plunger valves as machine components; weighted sinker bars for oil well pumps; machine parts for oil and gas well pumps, namely, sucker rods and their couplings; machines and machine parts for use in oil and gas well deliquification and production optimization, namely, gas-lift and plunger-lift downhole equipment in the nature of surface lubricators, plungers, bumper springs, standing valves, and gas lift valves for use in oil and gas well operations; machine parts for oil and gas well equipment being machines, namely, pump barrels, sucker rod pump balls and sucker rod pump seats used for sealing pressure, cages, oil and gas well pump anchors which optionally anchor the sucker rod pump in the tubing, polished rods, polished rod clamps for connecting polished rods to the reciprocating oil or gas well machinery at the surface, polished rod liners for sealing pressure around the polished rods and through the stuffing box, polished rod alignment tools, spiral sucker rod guides for centering the rod string in tubing, valve rods for connecting the rod string to the sucker rod oil and gas well pumps, pull tubes for connecting the rod string to the sucker rod oil and gas well pumps, seating cups for sealing static fluid pressure between sucker rod pump and oil and gas reservoir, seating nipples, seat valves for use as shutoff devices in oil and gas well pipelines, injectable packing stuffing boxes, rotationally operated on and off tools, namely, key and socket mechanisms actuated by rotation, for connecting and disconnecting sucker rods to and from well pumps, which are remotely actuated from the surface when the oil and gas well pumps are pulled for servicing; non-metal rod centralizing guide for use in subterranean oil and gas wells, whereby the guide attaches to a cylindrical rod before the rod is placed within a well bore and prevents the rod from moving sideways or wobbling within the well bore; crude oil refining machines; oil-well pumping machines; modular units comprising industrial systems comprised of chemical analyzers, pumps, chemical injectors, contractors, and separators for controlling and removing toxic gases and toxic vapors from fluids in the oil and gas industry.

Services

Class 35

(1) Business consulting in the field of oil and gas.

Class 37

(2) Maintenance and repair of gas and oil equipment, machinery and automation systems; consultancy relating to the maintenance and repair of oil and gas equipment, machinery, technology and automation systems; oil and gas drilling; pipeline maintenance; installation of apparatus for the production of oil; oil production services, namely, extraction of oil.

Class 40

(3) Custom manufacturing of oil and gas equipment, machinery, automation systems and controllers; oil and gas well treatment, namely, intervention services for oil and gas wells to remove liquids and optimize production, namely, chemical injection optimization and nitrogen generation services in the nature of downhole nitrogen injection to enhance productivity by managing well pressure; oil refinery services; processing of natural gas; oil and gas well treatment; production of energy; filtration and purification of natural gas; processing of oil and natural gas;

technical consulting in the field of oil and gas wells treatment; technical consulting in the field of oil and gas production and processing; technical consultation in the field of hydrocarbon removal and degassing, for the refining and petrochemical industries; processing of oil.

Class 42

(4) Technological services related to equipment, technology, automation systems and controls, in each case, in the oil and gas field, namely, providing technological information related to equipment, automation systems and controls in the oil and gas industries, and engineering services related to equipment, technology, automation systems and controls in the oil and gas field; industrial design services for pressure vessels, modular process, production, and filtration equipment skids; well management services, namely, remote monitoring of electrical submersible pumps (esp) and associated artificial lift system equipment for oil and gas well production optimization; remote monitoring of single or multi-well oil and gas assets to provide advance alarming, diagnostics, data analysis, performance prediction; scientific chemical analysis of digital oil and gas field data; oil-field surveys; oil-well testing; analysis for oil research; analysis of oil fields; inspection of oil fields; industrial research relating to the oil and gas industry; technical research relating to the oil and gas industry; chemical research and analysis; laboratory research services relating to the oil and gas industry; research, development, and consulting services for the oil and gas industry, namely, product research and development and technological consultancy in the field of oil and gas production and processing; diagnostic services for the oil and gas industry, namely, identifying issues with equipment, machinery, apparatus, and chemicals used in the recovery, production, processing, and refining of oil and gas; quality control auditing services for the oil and gas industry, namely, examining recovery, production, processing, and refining practices and making recommendations for improved safety and efficiencies; pipeline inspection services; testing, analysis and evaluation of the goods of others, namely, umbilical systems used for chemical delivery to subsea oil wells, for purposes of certification.

(1) Common metals and their alloys, ores of metal; metal materials for building and construction, namely, reinforcing materials of metal for building, metal molds for forming wall panels, not of metal, and wall panels of metal; transportable buildings of metal, namely, transportable metal sheds, transportable metal stables; non-electric cables and wires of common metal; metal hardware, namely, reinforcing pins of metal for formwork, carabiners of metal; storage and transport containers of metal; safes; materials of metal for railway construction; metal worked goods being wire of common metal; pipes and tubes of metal, namely, branching pipes of metal, drain pipes of metal, gutter pipes of metal, collapsible tubes of metal, ground tubes of steel; vaults, namely, metal bank vaults, burial vaults of metal; goods of metal for building purposes, namely, silos of metal; ores of metal; uncoated and coated wires, namely, non-electric cables and wires of common metal; wire for ropes, namely, steel wire rope, wire rope; wire for strands, namely, non-electric single-strand wire; metal wires, namely, aluminium wire, iron wire, metal guy wire, steel wire; wire ropes for guying purposes; wire ropes for cable transport; coils made of common metal; metal wire cloths; meshes of common metal; metal gabions; alloyed steel wire [non-electric]; non-electric multi-strand wires; wire stretchers [tension links]; spelters for welding; composite wires, namely, non-electric multi-strand wire; redraw wires, namely, copper wire, not insulated; spring wires, namely, alloyed steel wire; metallic wire cloth; woven wires, namely, metal wire fencing; welding wires; soldering wires; welding rods; hard soldering rods with flux core; spray wires in all alloys namely, metal cable wire; welding bronzes; metal ropes and strands; wires of common metal alloys, except fuse wires; wire strands, namely, non-electric single-strand wire; welding rods made of copper and copper alloys; metal masts [other than aerials or for watercraft], metal bars; metal profiles for building; steel rods; steel in sheet, rod, bar and billet form; hollow profiles of metal for building; rods made of non-ferrous metal alloys; bars made of non-ferrous metal alloys; profiles of non-ferrous metal alloys, namely, metal profiles for use in further manufacture; tubes of non-ferrous metal alloys, namely, aluminium tubes for machinery; hollow profiles of non-ferrous metal alloys, namely, aluminium profiles for building.

Class 09

(2) Apparatus and instruments for conducting, switching, transforming, storing, regulating or controlling the distribution or use of electricity, namely, voltage limiters, conventional electricity meters; apparatus and instruments for recording, transmitting, reproducing or processing sounds, images or data, namely, data transmission cables, digital sound processors;; computer software for use as a spreadsheet and for word processing; blank digital or analogue recording and storage media, namely, blank tapes for storage of computer data; cash registers; calculating devices, namely, calculating machines; computers and computer peripheral devices, namely, computer mouse, computer keyboards, computer display monitors; diving suits, diver's masks, diver's ear plugs, nose clips for divers and swimmers, gloves for divers, breathing apparatus for diving; fire extinguishers; electric wires; electric cables; wire diameter measuring devices; plastic coated electrical wire; insulated wires [electric]; insulated electrical wires; rubber coated electrical wires; markers for electrical wires; sheaths for electrical wires; electronic tags for identifying electrical wires; wires of metal alloys for electrical fuse wires; materials for electricity mains, namely, electric wires, electric cables; electric wires for spark erosion; electric wire electrodes; insulated electrical cables for transmitting high frequency currents; electric wires for electrical discharge machining (EDM); graphite electrodes; electrodes for spark erosion machines; fuel cell electrodes; electrodes for laboratory research; PH electrodes; cables and wires for communications technology, data technology, measuring, controlling, regulating technology, energy technology and entertainment electronics, namely, insulated copper wire, fuse wire, magnetic wires, resistance wires, power wires, audio/video cables, data cables; fiber optic cables; optical cables; broadband communication cables, namely, coaxial cables; underground, bearer and indoor installation cables, namely, telephone cables; cables for radio devices, namely, radio relay cables; low-frequency cables, namely, low-frequency data cables, low-frequency electric cables; high voltage electric cables; trailing cables; bore hole cables of metal for electric purposes; coaxial cables; plug-in connectors for data transmission cables and optical cables; optical cables for transmitting laser beams; light conducting filaments [optical fibers]; optical cables; lightning conductor cables; wire of unalloyed and alloyed precious and common metal types, uncoated or coated with other types of metal and wire strands, all for electrical purposes , namely, plastic-coated electrical wires, rubber covered electrical wires; electric wires for pin connectors, coil formers and circuit boards; electric strips for pin connectors, coil formers and circuit boards; resistance wires; optical wires.

Class 14

(3) Precious metals and their alloys; jewelry, precious and semi-precious stones; clocks and horological instruments, namely, watches; wire thread of precious metal; threads of precious metal [jewelry]; flexible wire bands for wear as a bracelet [jewelry]; wire of unalloyed and alloyed precious metal types, uncoated or coated with other types of metal and wire strands, namely, jewelry cable.

Class 17

(4) Rubber, gutta-percha, latex [rubber], asbestos, mica and their substitutes, unprocessed or semi-processed; plastic or resins in extruded form for use in manufacture; sealing, packing and insulation material, namely, composite seals, caulking sealant, adhesive packaging tapes, cotton wool for packing, extruded polystyrene pellets for packing; flexible tubes, namely, extruded plastics in the form of flexible tubes for use in manufacture; flexible plastic pipes for plumbing purposes; flexible plastic hoses for use in manufacture; threads of plastic for soldering; plastic materials, semi-finished, namely, plastic in bars, blocks, pellets, rods, sheets, tubes or extruded form for manufacturing use; flexible plastic hoses with wire braiding for use in manufacture; flexible cotton hoses with wire braiding, namely, garden hoses; flexible plastic hoses with wire inserts for use in manufacture; insulating wrap for the electrical shielding of wires; transparent acrylic resin sheets [semi-finished] with conductive wire braiding; plastic technical threads for sieving and weaving

technology [semi-finished]; plastic monofilaments and multifilaments as semi-finished goods, including with plastic coating, for 3D printing; plastic rods (semi-finished); plastic bars (semi-finished); plastics in the form of sheets, films, blocks, rods and tubes; extruded plastic in the form of bars, blocks, pellets, rods, sheets and tubes for use in manufacturing; plastics materials in the form of rods (semi-finished); artificial resins in the form of rods for use in manufacture (semi-finished); extruded plastics in the form of rods for use in manufacture; plastics materials in the form of sections (semi-finished), namely, carbon fibre reinforced plastic profiles; threads of plastic for soldering; plastic welding rods; plastic soldering threads; plastic rods; rubber sheets for insulating purposes; semi-worked plastic substances in the form of blocks, sheets, strips, films, rods, profiles, tubes and tube fittings; extruded plastics in the form of sheets and rods for use in manufacture; formed plastic, semi-processed, namely, plastic in bars, blocks, pellets, rods, sheets, tubes or extruded form for general commercial purposes; plastic material in extruded form for use in production in the form of trestles, sheets, film rolls, rods; sealing profiles, namely, carbon fibre reinforced plastic profiles; flexible pipes, namely, flexible plastic pipes for conveying water, flexible plumbing pipes of plastic; connectors, namely, junctions and fittings, not of metal, for flexible pipes.

Colour Claim
Colour is claimed as a feature of the trademark. The colours red, white, silver, beige-grey, and gold are claimed as a feature of the trademark. The background, beginning from the top to bottom is dark red and light red in a marble-like effect with the bottom sixth portion being a white colour separated by an inverted chevron design in a metallic silver topped by a smaller chevron design in a metallic gold. On top of the red background there is a design of a coat of arms containing the word "CHIVAS" in white on a red ribbon. The outline of the ribbon is in a metallic silver and gold. Beneath the word "CHIVAS" is a design that is similar to a combination of a crown and pretzel-like heart in the colour gold. The ribbon appearing at the bottom of the coat of arms is red with a silver outline and contains the word "REGAL" in white with two white linear designs to the side of the word. The coat of arms is outlined in metallic silver and gold and the interior of the coat of arms is in red with a marble-like effect. The lances with flags that cross the coat of arms are red. The coat of arms located at the top portion of the larger coat of arms is in a metallic silver colour.

Certification Mark Standard
The certification mark, as used or intended to be used by persons authorized by the certifier, certifies that the services comply with the safety standards for automotive lift use, inspection and maintenance, promulgated by the certifier. Please see document ANSI/ALI ALOIM:2020, entitled "Standard for Automotive Lifts - SAFETY REQUIREMENTS FOR OPERATION, INSPECTION AND MAINTENANCE", available for the public within the Canadian Intellectual Property Office, for a full description of the standards. The standard covers the safety requirements for the operation, inspection and maintenance of installed automotive lifts, regardless of age, country of origin, or certification status. Lifts that are not "automotive lifts" are outside the scope of the standard. The purpose of the standard is to provide a basis for common understanding among owners, users, service personnel, qualified lift inspectors, the general public and the regulatory community as to the minimum requirements, the responsibilities, the qualifications, and the documentation for operating, inspecting and maintaining automotive lifts. Automotive lifts shall not be labelled or otherwise described as conforming or as having been inspected in accordance with the standard unless all applicable requirements of sections 5 through 11, pertaining to the operation, inspection, maintenance, and modification of automotive lifts, as well as approved replacement parts, accessories, and attachments for automotive lifts, have been investigated and documented.

Services

Class 45
