Trademarks Journal

2024-01-31 — Vol. 71 No. 3614

Trademarks Journal

Vol. 71 No. 3614

General Information

The *Trademarks Journal* (the “*Journal*”) is published on the website of the Canadian Intellectual Property Office (<http://cipo.gc.ca>). The *Journal* lists trademark applications advertised under subsection 37(1) of the *Trademarks Act* (the “*Act*”), public notices of prohibited marks under section 9 of the *Act*, statements of the Minister in respect of geographical indications under subsection 11.12(2) of the *Act*, as well as erratums to previous volumes.

Electronic *Trademarks Journal*

The *Journal* is available in PDF format and can be downloaded free of charge and viewed and printed with Adobe Acrobat Reader. The *Journal* is also available in a printable HTML format as an alternate official version that contains a search function to narrow and customize the content. The electronic form of the *Journal* is the official version.

Official Languages

The *Journal* is available in English and French. The details displayed for each application are based on the language of the application. If the language of the application is English, the goods, services, or other text and description appearing in the English version of the *Journal* are in the language filed by the applicant. If the language of the application is French, the goods, services, or other text and description appearing in the English version of the *Journal* have been translated. Any registration resulting from the application will be restricted to these goods or services as described in the language of the application.

Filing Dates

The filing date of each trademark application (including those to extend the statement of goods or services of an existing registration) is shown in the YYYY-MM-DD format.

Nice Classification

Where applicable and required, the *Journal* lists the goods or services of each application grouped according to the classes of the Nice Classification, each group being preceded by the number of the class of the Nice Classification to which that group of goods or services belongs and presented in the order of the classes of the Nice Classification.

Opposition

Any person who has a valid ground of opposition (see section 38 of the *Act* for the grounds of opposition) to any application for registration of a trademark or to any application for registration of a trademark extending the statement of goods or services advertised in this *Journal* may file a statement of opposition with the Registrar of Trademarks within two months from the date of issue of this publication. The prescribed fee must accompany the statement of opposition.

(1) Adhesive materials and adhesive sealants for use in the construction industry; adhesive compositions for use in the construction industry; adhesive materials and adhesive sealants for use in the building industry; adhesive compositions for use in the building industry; adhesives for use in building.

Class 17

(2) Seals, silicone sealants and fillers for expansion joints; sealant compounds for joints; adhesive sealant and caulking compounds; general purpose silicone rubber sealants; adhesive sealants for general use; rubber sealant for caulking and adhesive purposes; weather stripping sealants in the nature of caulk; adhesive tapes and adhesive strips for use in the building industry; sealant for use in forming a flexible membrane on flooring.

Class 19

(3) Adhesive mortar for building purposes; flooring screed; sealants for driveways.

Services

Class 35

(1) Retail sale, wholesale, online sale and mail order of paints, adhesives and sealant materials.

Class 37

(2) Building maintenance and building repair services, installation, maintenance and repair services of plumbing and hot water, installation services of heating, ventilation and air conditioning, glass, windows and blinds, plumbing, ceiling, roofing, flooring, electrical, insulating materials in buildings, roofs and structures, fixtures and fittings for buildings, ship interiors, yacht interiors, parts and fittings for vehicles, painting and decorative painting services, building sealing, building construction and maintenance services using adhesives or sealants, and information, advisory and consultancy services relating to all the aforesaid services.

Goods

Class 09

Computer software for connecting to remote computer networks and computers; recorded or downloadable computer software for interacting with blockchain platforms; communication software for connecting global computer networks and blockchains; software and computer programs for the electronic trading of securities; software for the administration of computer networks.

Services

Class 35

(1) Advertising agency services; business management; business administration; office services.

Class 36

(2) Insurance services; financial affairs, namely financial management, financial analysis, expert consulting in financial analysis and financial management; real estate affairs, namely real estate agencies; services in the field of cryptocurrency, namely provision of financial information online; provision of information by electronic means related to financial and investment risk assessment, real-time online currency trading, computerized financial services, namely foreign exchange services in real time, trading of financial instruments and commodities namely financial investments in the field of commodities and trading of investment products, electronic stock exchange services, conduct of foreign exchange transactions for others, conduct of financial transactions online namely provision of secure commercial transactions and secure payment options, electronic funds transfer, management, brokerage and advisory services related to investment, trading of securities options and securities options contracts (overseas markets), asset and portfolio management, merchant and investment banking services, trading of futures, stock and bond trading, online brokerage for trading and transactions related to currency and other financial products, namely brokerage of bonds and other securities, brokerage of currency, brokerage of financial derivatives, financial investment brokerage, financial brokerage services for cryptocurrency trading, payment services namely payment of bills, debit and credit card payment

processing services and electronic funds transfer, electronic funds transfer, electronic payment processing, namely cryptocurrency payment processing, money transfer services, online financial transactions, namely clearing of financial transactions, and electronic payment gateway services, provision of information online related to financial management and insurance from a computer database or global communication network, provision of information in the field of finance, namely financial management, cryptocurrency, financial investment and financial risk management, consultant services and dispensing of advice, all in the field of finance, namely financial management advice, financial advice in the field of cryptocurrency, financial investment consulting and financial risk management advice, funds transfer for the purchase of goods through electronic communications networks, business banking services, provision of information related to the issuance of value tokens, issuance of tradable securities, issuance and redemption of value tokens, issuance of value tokens to reward customer loyalty.

Class 38

(3) Electronic transmission of documents for the trading of securities options through peer-to-peer networks; provision of access to global computer networks; provision of access to web, messaging and news platforms and portals on the Internet; provision of Internet, specifically for the electronic transmission of securities and financial information for others; provision of access to a website providing users with a secure remote access to private computer networks for electronic commercial transactions.

Class 42

(4) Scientific and technological services, namely scientific research, analysis and design in the field of blockchains, electronic trading of securities and computer network management, as well as related research and design; industrial analysis and research services, namely industrial research in the field of blockchains; design and development of computers and software; temporary online provision of non-downloadable operating software enabling access to a cloud computing network as well as its use; temporary provision of non-downloadable software applications for the provision of a cryptocurrency blockchain for the exchange of accessible digital currency through a website.

software featuring libraries for developing, testing and simulating virtual reality, augmented reality, extended reality, and mixed reality applications; computer graphics software development tools for advanced graphics processing, for managing and implementing virtual desktop infrastructures, for virtual desktops and applications, and for virtualization technology software; software for performing computer graphics operations and improving graphical and video display capabilities; downloadable computer software for use as an application programming interface (API) for use in the field of artificial intelligence; application programming interface (API) for computer software for ray tracing and image rendering, modeling, and image manipulation and processing; application programming interface (API) for use in building software applications; artificial intelligence computers; artificial intelligence supercomputers; computer game software; computer graphics firmware for enhancement of graphical and video display; computer graphics software for improving display quality; computer hardware and software for professional designers, engineers, and scientists for advanced graphics processing and visual computing; downloadable computer graphics; downloadable edge embedded device software to manage edge assets and edge devices, via the transmission, routing, processing, monitoring, filtering, translation and storage of data passing between networks; electronic game software; electronic, computer, interactive and video game software; graphics processing units (GPUS); graphics processing units (GPUS) in the nature of computer hardware for enhancing graphical and video display; computer software for graphic designing and editing; gesture recognition software; computer hardware and software system for tracking objects; downloadable computer software used to process voice commands; integrated circuit components for graphics and video systems, namely, multimedia accelerators, graphic accelerators and peripheral units; integrated circuits; integrated circuits for enhancing graphical and video display; integrated circuits, semiconductors and computer chipsets for use in transmitting data to and from a central processing unit; semiconductors; simulation, modeling and data processing software for use in data visualization, data analysis, data mining, data interpretation, predictive analytics, accessing and editing large-scale data, interactive visual computing, design of information graphics, video streaming, maximizing graphics processing and performance; software and firmware for developing artificial intelligence applications; software and firmware for enabling electronic devices to share data and communicate with each other;

downloadable computer software and computer hardware for use in data transmission, data collection, data analysis and decision making in the field of artificial intelligence and machine learning; software development kits (SDKs) consisting of software for ray tracing and image rendering, modeling, and image manipulation and processing; software development kits (SDKs) for building software applications software for use in the fields of artificial intelligence, machine learning, deep learning, high performance computing, image feature extraction, natural language processing, supervised learning, un-supervised learning, predictive analytics, software development, edge computing, fog computing, decentralized computing, Internet of Things, and computer and telecommunications networks; software development tools for advanced graphics processing, for managing and implementing virtual desktop infrastructures, for virtual desktops and applications, and for virtualization technology software; software development tools for use in the fields of artificial intelligence, deep learning, machine learning, high performance computing, distributed computing, and data virtualization; software for 3D-visualization, 3D modeling and 3D rendering; downloadable software for developing and implementing artificial intelligence technologies and algorithms; software for advanced graphics processing and visual computing; downloadable computer software, namely, artificial intelligence based software for machine learning, deep learning, natural language generation, statistical learning, supervised learning, unsupervised learning, data mining, predictive analytics and business intelligence; downloadable computer software for controlling the operation of audio and video devices, namely, head-mounted displays, mobile phones and tablets; software for data management, analytics and pattern and activity recognition; software for enhancement of graphical and video display; software for enhancing computer performance, for operation of integrated circuits, semiconductors, computer chipsets for use in transmitting data to and from a central processing unit and micro-processors, and for gaming purposes; computer programs and software for image processing; software for management, storage and network management of digital media, and enhancement of graphical and video display; downloadable and recorded computer software for use in transmitting image files, audio files, video files; software for operating and managing integrated circuit components; software for processing images, graphics, audio, video, and text; software for professional designers, engineers, and scientists for advanced graphics processing and visual computing; software for ray tracing and image rendering, modeling, and image manipulation and processing; software for the collection, managing, editing, organizing, modifying, transmission, and sharing of data and information; software for the display of digital media; software for use as an application programming interface (API); downloadable computer software, firmware and hardware for developing and implementing computer programs in the fields of edge computing, high performance computing, distributed computing, machine learning, automation controls, data collection, data analytics and internet of things; software, namely, an interpretive interface for facilitating interaction between humans and machines; downloadable software, namely, knowledge-based artificial intelligence platforms and automation platforms for use in advanced visualization, data acquisition, data analytics, data integration, artificial intelligence, machine learning, deep learning, high performance computing, distributed computing, virtualization, natural language generation, statistical learning, supervised learning, un-supervised learning, data mining, predictive analytics and business intelligence; system-on-chip processors; video game software; computer hardware and downloadable computer software, namely, artificial intelligence based software for machine learning, deep learning, natural language generation, statistical learning, supervised learning, unsupervised learning, data mining, predictive analytics and business intelligence; software development kits (SDK) comprised of frameworks, tools, APIs, and libraries for use in developing virtual reality, augmented reality, extended reality, and mixed reality software; downloadable software for developing, testing, and simulating 3D, virtual reality, augmented reality, extended reality and mixed reality applications and environments; software for use in

connection with photographic and video equipment and cameras, namely, software for taking, capturing, processing, operating, viewing, storing, editing, arranging, combining, sharing, manipulating, modifying, transmitting and displaying data, images, videos, multimedia files, and other digital data; software in the fields of artificial intelligence, augmented reality, and virtual reality for predicting, classifying, collecting, simulating, and optimizing data, for computer gaming, augmented reality gaming, virtual reality gaming, and virtual reality simulation.

Services

Class 42

Providing streaming libraries for virtual reality, augmented reality, extended reality, and mixed reality applications; non-downloadable software featuring libraries for virtual reality, augmented reality, extended reality, and mixed reality applications; providing non-downloadable software for 3D, virtual reality, augmented reality, extended reality, and mixed reality simulation; non-downloadable software; advanced product research in the field of artificial intelligence; application service provider (ASP) services featuring application programming interface (API) software for ray tracing and image rendering, modeling, and image manipulation and processing; computer programming services for customers that enable the customers' digital and handheld devices to download and utilize games and entertainment related content; computer programming in the field of artificial intelligence; computer software design, computer programming, or maintenance of computer software; consulting services in the field of gaming technology and graphics software; design and development of computer hardware and software; design and development of computer hardware and software in the fields of machine learning, deep learning, and deep neural networks; design and development of edge computing systems, platforms, gateways, and devices; design of computer hardware, software and peripherals for others; design, development, customization, integration, support and maintenance of computer software; design, development, customization, integration, support and maintenance of computer software; design, programming and maintenance of artificial intelligence software; designing and developing computer game software and video game software; designing of machines, apparatus, instruments including their parts or systems composed of such machines, apparatus and instruments, namely, custom design and development of machinery, apparatus, and instruments for use in the fields of advanced visualization, data acquisition, data analysis, data integration, artificial intelligence, machine learning, deep learning, high performance computing, distributed computing virtualization, natural language generation, statistical learning, supervised learning, un-supervised learning, data mining, predictive analytics and business intelligence models and algorithms; development of computer software; electronic and interactive multimedia game development services; fog and edge computing services; fog and edge computing services featuring software for artificial intelligence (AI), machine learning and deep learning; platform as a service (PAAS) featuring a non-downloadable computer software platform to train computers to predict user behaviour in the field of machine learning models and artificial intelligence; platform as a service (PAAS) featuring a non-downloadable computer software platform for use in natural language processing, machine learning, voice command and recognition, converting speech to text, data analytics in the field of artificial intelligence; platform as a service (PAAS) featuring software platforms for developing knowledge based artificial intelligence computer software platforms, data analytics software platforms, and automation software platforms, for use in the field of advanced visualization, data acquisition, data analysis, data integration, artificial intelligence, machine learning, deep learning, high performance computing, distributed computing virtualization, natural language generation, statistical learning, supervised learning, un-supervised learning, data mining, predictive analytics and business intelligence models and algorithms; providing application programming interface (API) software for use in transmission of audio, video, images, text, content and data files;

providing online non-downloadable artificial intelligence computer programs for use in collecting, analyzing and reporting data obtained from third party businesses on data networks; providing computer software technical support services, namely, technical information and troubleshooting problems regarding software patches, upgrades and updates; providing computer software technical support services, technical information and technical support regarding software patches, upgrades and updates; providing non-downloadable computer software for enhancing computer performance, for operation of integrated circuits, semiconductors, computer chipsets and micro-processors, and for gaming purposes; providing non-downloadable electronic game software; providing online non-downloadable interactive entertainment software for streaming multimedia entertainment content, namely, audio, video, images, and text; providing non-downloadable software for 3D-visualization, 3D modeling and 3D rendering; providing online non-downloadable computer software for developing platforms for artificial intelligence, machine learning, deep neural networks, deep learning, natural language generation, statistical learning, supervised learning, unsupervised learning, data mining, predictive analytics and business intelligence models and algorithms; providing non-downloadable software for artificial intelligence, machine learning, deep learning, natural language generation, statistical learning, supervised learning, un-supervised learning, data mining, predictive analytics and business intelligence; providing non-downloadable software for artificial intelligence, machine learning, deep learning, natural language generation, statistical learning, supervised learning, un-supervised learning, data mining, predictive analytics and business intelligence; providing non-downloadable software for computer graphics; providing non-downloadable software for data management, analytics and pattern and activity recognition; providing non-downloadable software for detecting objects, user gestures and commands; providing non-downloadable software for enhancing computer performance, for operation of integrated circuits, semiconductors, computer chipsets and micro-processors, and for gaming purposes; providing non-downloadable software for facilitating interaction between humans and machines; providing non-downloadable software for image rendering, modeling, and image manipulation and processing; providing non-downloadable software for object tracking, motion control and content visualization; providing non-downloadable software for operating sensor devices; providing non-downloadable software for processing images, graphics, audio, video, and text; providing non-downloadable software for ray tracing and image rendering, modeling, and image manipulation and processing; providing non-downloadable software for sharing, receiving, downloading, interacting with and transferring content, text, visual works, audio works, audiovisual works, literary works, data, files, documents and electronic works; providing non-downloadable software for streaming multimedia entertainment content; providing non-downloadable software for use as application programming interfaces (API); providing non-downloadable software for use in visual, voice, audio, motion, eye and gesture tracking and recognition; providing non-downloadable software for virtual reality, augmented reality, extended reality, and mixed reality applications and environments; providing non-downloadable simulation, modeling and data processing software for use in data visualization, data analysis, data mining, data interpretation, predictive analytics, accessing and editing large-scale data, interactive visual computing, design of information graphics, video streaming, maximizing graphics processing and performance; providing non-downloadable software for artificial intelligence, machine learning, deep learning, and deep neural networks; providing non-downloadable software for computer graphics; providing non-downloadable software for enhancing computer performance, for operation of integrated circuits, semiconductors, computer chipsets and micro-processors, and for gaming purposes; providing non-downloadable software for the collection, managing, editing, organizing, modifying, transmission, and sharing of data and information; providing software technological support services and consultation in the fields of software, development and use of computer hardware; software as a service (SaaS) featuring computer software platforms for natural language

processing, machine learning, voice command and recognition, converting speech to text, data analytics, and artificial intelligence; software design in the field of artificial intelligence; computer software development in the field of artificial intelligence and machine learning; platform as a Service (PaaS) featuring computer software platforms for computer software development featuring non-downloadable software development kits (SDKs) in the field of artificial intelligence; platform as a Service (PaaS) featuring computer software platforms that enable users to access a decentralized supercomputer consisting of a pool of devices connected to the internet; providing non downloadable software for use in connection with photographic and video equipment and cameras, namely, software for taking, capturing, processing, operating, viewing, storing, editing, arranging, combining, sharing, manipulating, modifying, transmitting and displaying data, images, videos, multimedia files, and other digital data; software as a service (SaaS) services featuring software in the fields of artificial intelligence, virtual reality, augmented reality, extended reality, and mixed reality, for predicting, classifying, collecting, simulating, and optimizing data, for virtual reality, augmented reality, extended reality, and mixed reality simulation.

Application software for use in the fields of avionics, vehicle management and auxiliary management tools in connection with airplanes, namely computer application software intended for the management of airplane and helicopter control devices, for the electromechanical control of airplanes and helicopters, computer application software enabling the detection of, and reporting on, faults, breakdowns, failures, identified during airplane and helicopter inspections; computer application software for the management and control of the fuel consumption of airplanes and helicopters, of tire pressure, and of the proper functioning of all airplane and helicopter constituent parts; computer software for resource estimation related to networks, data calculations, the management of input/output data flows, the memory of an integrated modular avionics platform, namely for the calculation of operational data originating from airplanes and helicopters in order to determine their condition as well as to optimize the use and efficiency of said airplanes and helicopters; operating system software platforms for calculators, namely integrated operating software for calculators for flight control and the control of the different parts of airplanes and helicopters; monitoring, configuration, development, testing and qualification computer software intended for avionics applications, namely computer software (cockpit flight recorders), USB piloting software, software for use in the monitoring, configuration, development, testing and certification of cockpit avionics; computer software for maintenance and breakdown identification in the avionics field; computer hardware in the nature of electronic calculators for flight control and the control of the different parts of airplanes and helicopters, navigation apparatus for airplanes and helicopters in the nature of on-board calculators, on-board computers, computers, discs for data storage; avionics Ethernet controllers; apparatus for recording, transmission, reception, treatment or reproduction of data, namely acceleration, humidity, distance, oil level, position, water level, pressure, temperature, vibration, speed sensors, infrared sensors, optical sensors, photoelectric sensors, projected capacitive touch sensors, display screens, touch display and control screens; electronic data processing apparatus, namely data processing hardware; electronic touch display and control screens; Ethernet transceivers; optical transceivers; software for cloud infrastructure management and automation; support software for computers for the

deployment of parallel applications and the performance of parallel computations for airplane and helicopter control, management and maintenance and for flight control; compiler software, namely computer program for data compilation in the field of aviation; software for diagnosing and identifying breakdowns in the field of aviation; software for searching and extracting images, text, videos, graphics, sounds on a computer network in the field of aviation; simulation software for digital computers, namely augmented reality software for simulation training in the field of aviation; LAN [local area network] operating software; computer software for the maintenance and operation of computer systems, namely network operating system programs, operating programs; network routers; flight simulators for aircraft used in training.

Services

Class 38

(1) Communications through or between computers and computer terminals, namely electronic transmission of videos, photographs, digital images, graphics, voice messages, text messages, by means of computer terminals; communications through fibre optic networks, namely provision of access to the Internet through fibre optic broadband networks; dissemination of data, namely satellite transmission of messages and data for air navigation, provision of access to databases; provision of access to data or documents electronically stored in central files for the purpose of remote browsing, namely provision of access to a website offering users a secure remote access to private computer networks, provision of remote Internet access; provision of access to computer programs on data networks, namely provision of multi-user access to a global computer information network; provision of access to an online electronic network for information recovery, namely provision of multiple-user access to global computer information networks for the transfer and dissemination of a wide range of information; transmission of digital files, namely provision of multi-user access to global computer information networks for file transfer; transmission of information, namely wireless electronic transmission of voice messages, text messages, videos, photos, digital images in the field of aviation over the Internet and via wireless and cellular networks.

Class 42

(2) Computer platform as a service [PaaS], namely provision a platform as a service [PaaS] enabling computer software developers to collaboratively develop software via a website, development of platform-as-a-service [PaaS] infrastructure for searching structured and unstructured data in the field of data analytics; compilation of computer programs; aircraft design; computer hardware and software design; design of computer programs and software in connection with aircraft; design, development, maintenance and updating of data processing software; design and development of analysis methods and cockpit avionics testing; design, installation, updating and maintenance of software; configuration, installation, troubleshooting, repair, maintenance and upgrading of software; advice in connection with the design of computer software; testing, analysis and evaluation of the qualities and performance of the services of others for certification purposes in the field of aviation, provision of a quality assurance certification of the goods and services of others in the field of aviation; integration of computer networks and systems; conduct of technical feasibility studies.

The applicant disclaims the right to the exclusive use of the eleven-point maple leaf apart from the trademark.

Foreign Character Translation

The translation provided by the applicant of the two Chinese characters transliterate to 'SHAN HE'. The Chinese character 'SHAN' means 'mountain' and 'HE' means 'sum'. The word has no meaning when read together.

Foreign Character Transliteration

The transliteration provided by the applicant of two Chinese characters transliterate to 'SHAN HE'.

Goods

Class 05

(1) Ginseng capsules for general health and well-being; antibiotics for human use; vaccines for human use; herbal and dietary supplements used as a worm preventative in birds; dietetic sugar for medical purposes; dietetic substances consisting of vitamins, minerals, amino acids and trace elements; nutritional supplements for general health and well-being; electrolyte replacement beverages for medical purposes.

Class 29

(2) Sea-cucumbers; edible birds' nests; isinglass for food; fish; canned fish; dried edible mushrooms; dried edible fungi.

Class 30

(3) Coffee; ginseng tea; candies; honey; sugar confectionery; cereal-based snack food; Seasonings.

Colour Claim

Colour is claimed as a feature of the trademark. The two letter E are in navy blue, and the letter M is in green. The expression "Epsilon Molecular Engineering" is in black.

Goods

Class 01

(1) Proteins and enzymes for drug discovery and industrial purposes in the fields of pharmaceutical, diagnostics, and chemical engineering; nucleic acids for drug discovery and industrial purposes in the fields of pharmaceutical, diagnostics, and chemical engineering; nucleotides for drug discovery, other than for medical or veterinary purposes; reagents for drug discovery research purposes, other than for medical or veterinary purposes; reagents for drug discovery experiment, other than for medical or veterinary purposes; reagents for experiment of molecular biology for drug discovery, other than for medical or veterinary purposes; reagents kits for research purposes comprised of buffers, standard solution for preparing calibration curve, for the purpose of detecting target molecules; reagents kits for experiment comprised of buffers, standard solution for preparing calibration curve, for the purpose of detecting target molecules; reagents kits for experiment of molecular biology comprised of buffers, standard solution for preparing calibration curve, for the purpose of detecting target molecules; reagents for molecular evolution engineering for drug discovery, other than for medical or veterinary purposes; reagents kits for evolutionary molecular engineering comprised of buffers, standard solution for preparing calibration curve, for the purpose of detecting target molecules; bio-probe reagents for the purpose of picking up the low molecular compounds available for function analysis of biological functions,

other than for medical or veterinary purposes; chemical reagents for peptide isolation, detection, determination and analysis; chemical reagents for protein isolation, detection, determination and analysis

Class 09

(2) CDNA display molecule automatic processing machine as laboratory apparatus and instruments

Services**Class 42**

(1) Conducting research surveys and research testing for science in the fields of medical science and applied science namely, chemical engineering; research survey and examination for molecular biology; research survey and examination for DNA sequences as bio-probes; providing information in the field of DNA sequences as bio-probes; providing DNA sequence information to DNA sequences data bank; research and development of molecular evolution engineering; research and development of bioinformatics; research survey and examination for designing a peptide sequence as an outsourcing business; research survey and examination for designing a protein sequence as an outsourcing business; sequence processing of peptide for others; sequence processing of protein for others

Class 44

(2) Providing medical information related to DNA sequence to DNA sequences data bank; providing medical information related to DNA sequence for editing DNA sequence database; providing medical information related to DNA sequence for constructing DNA sequence database
