Trademarks Journal

Vol. 68 No. 3488

General Information

The *Trademarks Journal* (the “*Journal*”) is published on the website of the Canadian Intellectual Property Office (<http://cipo.gc.ca>). The *Journal* lists trademark applications advertised under subsection 37(1) of the *Trademarks Act* (the “*Act*”), public notices of prohibited marks under section 9 of the *Act*, statements of the Minister in respect of geographical indications under subsection 11.12(2) of the *Act*, as well as erratums to previous volumes.

Electronic *Trademarks Journal*

The *Journal* is available in PDF format and can be downloaded free of charge and viewed and printed with Adobe Acrobat Reader. The *Journal* is also available in a printable HTML format as an alternate official version that contains a search function to narrow and customize the content. The electronic form of the *Journal* is the official version.

Official Languages

The *Journal* is available in English and French. The details displayed for each application are based on the language of the application. If the language of the application is English, the goods, services, or other text and description appearing in the English version of the *Journal* are in the language filed by the applicant. If the language of the application is French, the goods, services, or other text and description appearing in the English version of the *Journal* have been translated. Any registration resulting from the application will be restricted to these goods or services as described in the language of the application.

Filing Dates

The filing date of each trademark application (including those to extend the statement of goods or services of an existing registration) is shown in the YYYY-MM-DD format.

Nice Classification

Where applicable and required, the *Journal* lists the goods or services of each application grouped according to the classes of the Nice Classification, each group being preceded by the number of the class of the Nice Classification to which that group of goods or services belongs and presented in the order of the classes of the Nice Classification.

Opposition

Any person who has a valid ground of opposition (see section 38 of the *Act* for the grounds of opposition) to any application for registration of a trademark or to any application for registration of a trademark extending the statement of goods or services advertised in this *Journal* may file a statement of opposition with the Registrar of Trademarks within two months from the date of issue of this publication. The prescribed fee must accompany the statement of opposition.

Motion

Visual Representation

Trademark Description

This single trade-mark consists of the motion of certain coloured arciform shapes. The motion can be described in a series of steps. Step 1: a thin arciform shape appears in light blue colour and quickly expands along its curvature until it is roughly equivalent in relative length to the 11 o'clock and 1 o'clock positions on a clock face. Step 2: a second thin arciform shape of a medium blue colour appears in the center of the light blue arciform shape, splitting the light blue arciform shape into two pieces, and expanding along the same curvature. Contemporaneously, the two pieces of the light blue arciform shape stop expanding in size, though they continue moving along the same curvature. Step 3: The two pieces of the light blue arciform shape reconnect at the bottom of the curvature (being of relative length to the 5 o'clock and 7 o'clock positions on a clock face), while the medium blue arciform shape, having moved along the balance of the curvature and gradually transitioned to a dark blue colour during that movement, occupies the balance of the curvature. The subject application covers only one trade-mark.

Computer hardware, namely, computers, computer servers; computer storage devices, namely, highspeed storage subsystems for storage and backup of electronic data either locally or via a telecommunication network; computer software for use in controlling the operation and execution of computer systems, programs, and networks; computer software for use in connecting disparate computer networks and systems, computer servers and storage devices, namely, high-speed subsystems for storage and backup of electronic data either locally or via a telecommunications network; computer operating system software; computer software for linking together computers and for enabling computing across a globally accessible network; computer systems combining hardware and software for use in management and analysis of data, instructional manuals in electronic format sold as a unit therewith. Cloud computing system, namely network integrating computer hardware and software for dynamic provisioning, virtualization, and consumption metering of computer resources; computer software for early-stage design-space exploration of large-scale computer systems; computer software for workload analysis, namely, computer software for determining the amount of computing resources and computer hardware resources consumed by a computer operating software, calculating computer operating software's demands on the computer and computer hardware, and predicting computer processing speed; computer software for design of experiments; computer software for software-property scaling, namely, computer software for accessing, querying, and studying the output of workload analysis and determining as a result how the software would perform on a larger scale; computer software for system performance modeling; computer software for power and cost modeling; computer software for memory power modeling.

Services

Class 38

(1) Telecommunications services, namely, provision of multiple-user access to information, data, communications, content, products and services via a global network and wireless communications devices; electronic transmission of information, data, communications, content, products and services via computer terminals, global computer network, websites, electronic databases and wireless communications devices in the field of computers, computer software,

computer hardware, computer systems, computer products and services and electronic business transactions via a global computer network; teleconferencing and web conferencing services; providing multiple use access to global computer information networks for the transfer and dissemination of a wide range of information; providing on-line forums for transmission of messages among computer users; provision of private and secure communication in real time within a computer network; providing technical support services regarding the usage of communications equipment, namely, providing technical support services in the form of troubleshooting data communication hardware and software problems.

Class 42

(2) Computer services, namely, computer programming; computer systems integration services; computer software consulting services; cloud computing consulting services; consulting services in the design and development of computer hardware and software systems for others; technical support services, namely, troubleshooting of computers, servers and computer software problems (computing services); computer systems design services for others; computer systems analysis services, namely, computer systems monitoring, detection and examination services; interconnection of computer hardware and software, namely, integration of computer systems and networks; computer software and hardware testing services, namely, testing of computer software, computers and servers; installation, updating and maintenance of computer software; computer programming for others; cloud computing services, namely computing services to enable network integrating computer hardware and software for dynamic provisioning, virtualization, and consumption metering of computer resources.
