### General Information

---

The *Trademarks Journal* (the “*Journal*”) is published on the website of the Canadian Intellectual Property Office (<http://cipo.gc.ca>). The *Journal* lists trademark applications advertised under subsection 37(1) of the *Trademarks Act* (the “*Act*”), public notices of prohibited marks under section 9 of the *Act*, statements of the Minister in respect of geographical indications under subsection 11.12(2) of the *Act*, as well as erratums to previous volumes.

---

### Electronic *Trademarks Journal*

---

The *Journal* is available in PDF format and can be downloaded free of charge and viewed and printed with Adobe Acrobat Reader. The *Journal* is also available in a printable HTML format as an alternate official version that contains a search function to narrow and customize the content. The electronic form of the *Journal* is the official version.

---

### Official Languages

---

The *Journal* is available in English and French. The details displayed for each application are based on the language of the application. If the language of the application is English, the goods, services, or other text and description appearing in the English version of the *Journal* are in the language filed by the applicant. If the language of the application is French, the goods, services, or other text and description appearing in the English version of the *Journal* have been translated. Any registration resulting from the application will be restricted to these goods or services as described in the language of the application.

---

### Filing Dates

---

The filing date of each trademark application (including those to extend the statement of goods or services of an existing registration) is shown in the YYYY-MM-DD format.

---

## Nice Classification

---

Where applicable and required, the *Journal* lists the goods or services of each application grouped according to the classes of the Nice Classification, each group being preceded by the number of the class of the Nice Classification to which that group of goods or services belongs and presented in the order of the classes of the Nice Classification.

---

## Opposition

---

Any person who has a valid ground of opposition (see section 38 of the *Act* for the grounds of opposition) to any application for registration of a trademark or to any application for registration of a trademark extending the statement of goods or services advertised in this *Journal* may file a statement of opposition with the Registrar of Trademarks within two months from the date of issue of this publication. The prescribed fee must accompany the statement of opposition.

### Goods

#### Class 01

(1) monolithic catalyst supports for cleaning engine exhaust gas having an integral honeycomb structure made of ceramic and metal; particular filter for car use, namely, monolithic catalyst supports for being adhered with catalyst for cleaning engine exhaust gas having an integral honeycomb structure made of ceramic and metal

#### Class 05

(2) air fresheners for air deodorizing; air fresheners being air deodorizing preparations; air freshening preparations being air deodorizers

#### Class 06

(3) metal water pipes; metal water valves; metal storage tanks for refrigerants; metal water pipes for air conditioners in vehicles; water valves of metal for air conditioning system for vehicles

#### Class 07

(4) machine coupling and transmission components (except for land vehicles); incubators for eggs; automatic vending machines; air filter for automobile engines; air filters for motors and engines; air induction system for vehicles; alternators for motor vehicles; anti-pollution devices for engines, namely, emission reduction units for motors and engines [PCV valves] and emission reduction units for motors and engines [EGR valves]; bearings for transmission shafts being parts of machines; canister close valves for engines; carburetors for internal combustion engines; catalytic converter units for vehicle exhausts; charcoal canisters which absorb vaporized fuel leaked from fuel tank and send such absorbed fuel to engine; combination valve for exhaust emission control for vehicles; compressed air pumps; compressors for air conditioners for automobiles; compressors, namely, compressors for air conditioners; condensers for refrigerants for air conditioners; cooling fans for engines; water cooling pump for fuel cell vehicles; cyclone separators for internal combustion engines; DC-DC converter for hybrid and electric vehicles; diesel fuel injection timing control valves; air filters for automobile engines; air filters for furnaces; air filters for motors; filters for cleaning air for engines; gas filters for engines; gas filters for motors; membrane filters for use as parts of machines; oil filters; oil filters for engines; oil filters for motors; oil filters for motors and engines; distributors for vehicle engines; electric diesel fuel injection control apparatus,

namely, injection pumps; electric motors for machines; engines and motors for the generation of electricity; electric airplane motors; electric boat motors; electric elevator motors; electric motors for model vehicles, aircraft and boats; electric milling and grinding motors; electric motors used in industrial robotic arms; electric motors for industrial machines; electric motors for boats; electric power tool motors; electric planetary gear motors; electric winch motors; electric starters for engines; electric compressors; engine parts, namely, igniting magnetos for automotive engines; egr (exhaust gas recirculation) valves for engines; exhausts, namely, exhaust manifolds for engines; fans for motors and engines; fuel filters for motors and engines; fuel injection nozzles; fuel injection parts, namely, throttle bodies; fuel injection pumps; fuel injectors; fuel injectors for diesel common rail systems; fuel pump module consisting of an engine fuel pump, pressure regulating valves, and fuel filters; fuel pumps for engines; fuel vapor purge valves for canister for engines; glow plugs for diesel engines; ignition devices for motors of land vehicles; ignition parts for internal combustion engines, namely, condensers and ignition coils; ignition control unit for motorcycles; intake air heating apparatus, namely, heated air intake engines for land vehicles; motor stators being parts of machines; oil coolers for engines; oil filters for motors and engines; oil flow control valves for controlling engine lubricating oil; pressure controllers being parts of machines, namely, valves; pressure reducing valves being parts of cryogenic apparatus; pressure reducing valves being parts of machines; pressure regulating valves; pressure regulating valves being parts of machines; pressure release screws being parts of machines; pressure switches being parts of machines; pressure valves being parts of machines; metal pulleys being parts of machines; radiators for motors and engines; fuel rails for engines, namely, fuel rails as diesel engine components for common rail system for vehicles; plastic reserve tank for cooling vehicle engines; silencers as part of vehicle exhaust systems for motors and engines; spark plugs; speed governors for engines; superchargers for engines, namely, intake air compressors; fuel supply pumps for engines for diesel common rail systems; torque converters, not for vehicles; turbo compressors for automobile engines; vacuum pumps; engine timing components, namely variable cam timing; variable intake air control valve for automobile engine; water control valve for fuel cell vehicles; water valves for controlling cooling water flow for engines; industrial robots for cleaning floors; industrial robots for processing and shaping wood; industrial robots for sewing; industrial robots for shaping glass; industrial robots for shaping metal; industrial robots for shaping plastic material; industrial robots for shaping wood; industrial robots for welding; industrial robots for working glass; industrial robots for working metal; industrial robots for working plastic material; industrial robots for working wood; blower motor for air conditioning for vehicles; fan motors for cooling fans and radiators for engines, namely, fans for motors, fans for engines; vehicle parts, namely, windshield washer systems for injecting washing liquid towards windshields, namely, motors for washer fluid, windshield washer fluid injector motor; exhaust gas recirculation (EGR) valves for engines; fuel injection systems for engines; compressors for air conditioners; cooling radiators for motors and engines; electric motors for windshield wipers; washer motors, namely, motors for actuating windshield washers for vehicles; window regulating motors for operating window glasses of vehicles

### **Class 09**

(5) scientific, nautical, surveying, photographic, cinematographic, optical, weighing, measuring, signalling, checking, life-saving and teaching apparatus and instruments, namely magnetic stands for magnifying lenses, marking gauges, carpenter's gauges, mitre gauges, bevels, plumb bobs, tape measures, calipers, bevel gauges, fridge magnets, magnetic curtain rod holders; apparatus and instruments for conducting, switching, transforming, accumulating, regulating and controlling electricity, namely electricity conduits, power switches, electric power generators, electrical power connectors, power transformers; blank optical discs; blank magnetic tapes for tape recorders; card

readers for magnetically encoded cards; magnetic coded card readers; magnetic encoded identification bracelets; magnetic identifying cards; magnetic labels; magnetic tape drives; magnetic tape recorders; magnetic tape units for computers; magnetically encoded bank cards; magnetically encoded card readers; magnetically encoded credit cards; magnetically encoded debit cards; magnetically encoded gift cards; magnetically encoded hotel room key cards; magnetically encoded identification bracelets; magnetically encoded phone cards; pre-recorded audio cassettes; prerecorded audio tapes; pre-recorded video cassettes; pre-recorded video tapes; blank compact discs; compact discs containing computer games; compact discs containing encyclopedia's; compact discs containing music; compact discs featuring music; pre-recorded compact discs containing computer games; pre-recorded compact discs containing encyclopedia's; pre-recorded compact discs containing information in the field of art history and road maps; pre-recorded compact discs containing music; pre-recorded music compact discs; compact disc drives for computers; compact disc players; blank DVDs; blank recordable DVDs; pre-recorded DVDs containing music; pre-recorded DVDs containing audio and video clips; pre-recorded exercise DVDs; pre-recorded fitness DVDs; DVD burners; DVD drives; DVD players; DVD recorders; barcode readers; biometric fingerprint readers; biometric hand readers; card readers for credit cards; card readers for magnetically encoded cards; chip card readers; digital book readers; eBook readers; electronic book readers; electronic card readers; flash card readers; magnetic coded card readers; magnetic encoded card readers; magnetically encoded card readers; memory card readers; optical character readers; optical disc readers; smart card readers; USB card readers; airport security scanners; barcode scanners; biometric fingerprint scanners; biometric hand scanners; biometric retinal scanners; computer scanners; digital input and output scanners; fingerprint scanners; image scanners; laser scanners; optical scanner; digital camera memory cards; blank secure digital memory cards; secure digital memory cards; mechanisms for coin-operated apparatus, namely, mechanisms for coin-operated arcade games, operating gates for car parking lots, operating photo booths, television sets, vending machines, musical automata, operating washing machines, amusement electronic games, amusement machines, billiard tables, and pinball machines; data processing equipment, namely card punching and sorting machines for data processing; computers; accelerometer for airbag system and suspension control system for vehicles; electrical control systems for front lighting systems in vehicles; antennas for radio; antennas for radio and television; antennas for television; car antennas; cell phone antennas; microwave antenna; microwave antennas; radio antennas; radio signal antennas; satellite antennas; air flow meters for engines; sensor for measuring air-fuel ratio for exhaust emission control for vehicles; electronic control systems for vehicle airbag sensors wherein the sensors communicate with the satellite to ensure the function and operation of vehicle airbags that detect the collision of vehicle and send a signal to an electronic control unit (ECU) for judging the collision; ambient air temperature sensors for vehicles; amplifier for air-conditioners for vehicles; electronic controls for automatic steering of motor vehicles; electronic controls for automatic steering of vehicle wheels; bar-code scanners; bar-code hand terminals; bar-code readers; battery current sensor for detecting current flow and monitoring the charging state of the main battery for hybrid and electric vehicles; electric current sensor for monitoring the charging state of the battery for hybrid and electric vehicles; blank optical discs; brake fluid pressure sensor for vehicles; burglar alarms for vehicles and household use; navigation apparatus for vehicles in the form of on-board computers; commutators for electric motors; compact disc players; computer for automatic air-conditioners for vehicles; computer monitors; computers, namely, electronic control units; control panel for air-conditioners for vehicles; coolant temperature sensor for vehicles; crank position sensor for vehicles; camera and laser radar system, namely, cameras, radar, radar receivers, and radar transmitters for vehicles for the detection of vehicle crashes; cruise controls for motor vehicles; barcode readers and writers; card readers and writers for credit cards; card

readers and writers for magnetically encoded cards; memory card readers and writers; optical character readers and writers; smartcard readers and writers; data communication module, namely, traffic data communication module; short range radios; driving assist system in the nature of motor vehicle cameras and sensors for detecting road lane markers, pedestrians, objects outside of the vehicle, and relative distance thereof from a vehicle sold as integral components of automobiles; electric buzzers; electric coils; electric control unit for charging hydrogen for fuel cell vehicles; electric control unit for hybrid vehicle; electric diesel fuel injection control apparatus, namely, control computers; electric power steering (EPS) controller for vehicle; electric relays; electric flasher switches; electric valve actuators for use with automatic valves; electromagnetic coils; electrical controller for industrial robots; electrical controller for robots in production lines; electronic stability controls and dashboard cameras installed on commercial fleet vehicles, namely, applicant affiliated trucks and vans; electronic toll collection systems in the form of on-board computers and electronic toll cards on vehicles, electronic terminals equipped in vehicles for easy pass on highway; vehicle emission control systems, namely charcoal separators; engine electronic control units for vehicles; evaporative leak check module for vehicles; evaporator temperature sensor for vehicles; event data recorders (EDR) for motor vehicles; exhaust gas pressure sensor for vehicle engines; exhaust gas temperature sensor for vehicles; finger print scanners; magnetic mount flashing safety lights for vehicles; fuel cell monitoring device for fuel cell vehicles; apparatus for the measurement of fuel usage for vehicles, namely, fuel gauges; fuel pressure sensor for gasoline direct injection for vehicles; fuel tank pressure sensor for vehicles; heads-up displays (HUDs) in the nature of transparent electronic displays for use in providing drivers of vehicles with navigational and operational information; high intensity discharge lamp ballast, namely, an electrical device for starting and regulating discharge lamps for vehicles; humidity sensor for vehicles; temperature sensor for interior of vehicles; gyroscope sensors; instruments clusters comprising meters indicating vehicle and engine conditions; intake air temperature sensor for vehicles; integrated antennas for vehicles; integrated circuits; infrared sensor for vehicles; knock sensor for vehicles; laser radar sensor for vehicles; lean mixture sensor for vehicles; lithiumion battery; magnetic coded card readers; magnetic field sensor for vehicle engines; mileage recorders for vehicles, namely tachometers; vehicle-mounted millimeter-wave radar apparatus, namely, radar-sensors for distance between running vehicles; oil flow control valves for vehicle engines; oil pressure meters and gauges for vehicles; optical beacon antenna; optical character recognition apparatus; oxygen sensor for vehicles; sensor in vehicle seat to detect existence of a passenger; piezoelectric sensors for monitoring pump noise, namely, noise level meters ; portable batteries used to jump start vehicles; inverters for controlling the voltage of the battery for hybrid vehicles; pressure sensor for fuel cell vehicles; computer central processing units; programmable controller for use in industrial automation and building maintenance systems, namely, a programmable logic controller for controlling the sequence of production equipment ; rain sensor for vehicles; refrigerant pressure sensor for vehicles; remote control keys for vehicles; computer software to control a security system for remote control of automobile and home door locks; seatbelt electronic control unit for control of retracting seat belts by motors; semi-conductors; smart key for vehicles, namely a remote control key which allows the driver to keep the key fob pocketed when unlocking, locking and starting the vehicle; electronic sensors for measuring solar radiation; solar batteries; solar sensor for vehicles; solenoid valves; sonars; sonar equipment and parts thereof; electric speed sensors; speedometers for vehicles; torque sensors, sold as an integral component of electric power steering and steering angle sensors sold as an integral component of electric power steering; tachographs for vehicles; tachometers; temperature sensors; terminal computers and computer cables for factory automation; thermostats; throttle sensor; automatic indicators of low pressure in vehicle tires; vehicle sensors for detecting the distance by ultrasonic; pressure sensors; apparatus for adjusting headlights; vehicle safety equipment, namely, an on-

board cameras; vehicle safety equipment, namely, back-up sensors and cameras; vehicle safety equipment, namely, computers, video cameras, and operating system and application software to detect vehicle location; voice recognition software; voltage and amperage multimeter for engine and automobile control computers; voltage regulators for electric power; voltmeters; wheel speed sensor; vehicle parts, namely, windshield washer systems for injecting washing liquid towards windshields, namely, power switches and receptacles for windshield washer fluid; computers for controlling engine combustion timing for controlling engine knock; evaporative leak gasoline detector for engines; light-emitting diodes

### **Class 11**

(6) accumulators for air conditioning system for vehicles; air conditioners for vehicles and their parts and fittings; air conditioning units; air filters for air conditioners; air purifiers for air purification of vehicle interiors; automatic faucets; automatic flush valves, namely, valves for controlling the flow of cooling water for engines and valves for controlling the flow of refrigerants for air conditioners; electric water purifiers for household purposes; condensers for air conditioners; defrosters for vehicles; discharge lamps for vehicle headlights and ballast therefor; air deodorizing apparatus, namely electric air deodorizers; fans for airconditioning units; electric stoves using far infrared rays; evaporators for air conditioners; expansion valves for air-conditioning units to control refrigerant; headlights for vehicles; heat exchangers; heat pumps; water heaters; heaters for vehicles and their parts and fittings, namely, heater cores; hot water heaters; intake air heaters for diesel engines; air purifiers for use in cars, namely, ion generators for car use; air conditioners for vehicles; recovering and regenerating machines and installations for refrigerants, namely, regenerators for recovering refrigerants for air conditioning systems and regenerating refrigerants; portable refrigerators; refrigerated display cases; refrigerated merchandise display cases; refrigerated shipping containers; refrigerated cabinets; refrigerating display cabinets; refrigerating display cases; refrigerating or freezing showcases; refrigerators; separators for air conditioners, namely, separators for separating refrigerants into gas and liquid in air conditioners; ventilators for ventilating air in the passenger compartment of vehicles; fan motors for ventilating fans of air conditioning and heating systems, namely, fans for air conditioners and heaters; air freshener plugs; diffusers for air fresheners; dispensing units for air fresheners; electric dispensers for air fresheners; air cleaning units; heat exchangers, namely, evaporator for air conditioners; inter coolers, namely heat exchangers for air-cooling in vehicle engines

### **Class 12**

(7) air bags for vehicles; anti-lock brake for vehicles; anti-theft alarms for vehicles; brakes for vehicles; direction signals for vehicles; driving motors for land vehicles; car horns; rearview mirrors; reversing alarms for vehicles; safety belts for vehicle seats; seat belt tensioners for controlling the tension of the seat belt; suspension shock absorbers for vehicles; torque converters for vehicles; vehicle parts, namely, engine mounts for land vehicles; vehicle parts, namely, windshield washer systems for injecting washing liquid towards windshields, namely, windshield wipers; vehicle parts, namely, windshield wipers for headlights; windshield wipers for vehicles; wiper blade for vehicles; couplings and transmission components for land vehicles; automotive parts, namely, accelerator pedal system; accelerator pedal systems for motor vehicles; back-up warning alarms for vehicles; refrigerated trailers; vehicle parts, namely, anti-dazzle rearview mirrors

### **Class 17**

(8) hoses for air conditioners in vehicles

### **Class 19**

(9) plastic water pipes; plastic water pipes for air conditioners in vehicles

**Class 20**

(10) water valves of plastic for air conditioning system for vehicles; plastic water valves

**Services****Class 37**

(1) building construction; repair and maintenance of vehicles; air conditioning apparatus installation and repair; anti-rust treatment for vehicles; burglar alarm installation and repair; repair and maintenance of electric motors; freezing equipment installation and repair; heating equipment installation and repair; installation, maintenance and repair of computer hardware; installation of electrical and generating machinery; maintenance and repair of computer hardware and computer networks; motor vehicle maintenance and repair; pump repair; repair and maintenance of electric motors; repair and maintenance of power generators; vehicle cleaning; vehicle lubrication; vehicle polishing; vehicle repair; vehicle washing services

**Class 41**

(2) automotive repair instruction services

**Class 42**

(3) scientific research in the field of genetics and genetic engineering; design and development of computer hardware and software; computer programming; computer rental; computer software design; computer system design; consultancy in the design and development of computer hardware; consulting in the field of configuration management for computer hardware; consultancy in the field of computer software; diagnostic testing services regarding vehicle parts, engine parts; diagnostic analysis services regarding vehicle parts, engine parts; diagnostic testing and diagnostic analysis services regarding vehicle parts, engine parts; mechanical engineering; electrical engineering; industrial design; maintenance of computer software; material testing; rental of computer software; research and development for others in the field of automobiles; vehicle roadworthiness testing; providing temporary use of on-line non-downloadable computer programs and computer software for use in the repair and maintenance of vehicles; automobile diagnostic services

measuring transducers, electro-optic transducers, and temperature monitors for industrial use and computer monitors used in analysis, communications and control systems for electrical networks, power plants and electrical equipment, all these goods being intended for fixed installations, track, road and on-board installations, rolling stock for railways, high-speed and very high-speed railway vehicles, railway trains with or without a motor car, articulated and non-articulated railway trains, electric vehicles and autonomous vehicles, namely streetcars, buses, railcars, trains, locomotives, tank cars, road tankers, motor cars, subway trains, monorails, shuttles, motor coaches; optical equipment in trains, streetcars, subways, station platforms and across the entire railway and road network, namely laser distance sensors and surveillance cameras for detecting the presence and speed of railway vehicles, for identifying lost items on transport lines and routes, checking the condition of railway and road vehicles, calculating the number of passengers getting on and off of trains and subways, calculating the number of passengers present on the station platforms and on the sidewalks along the tracks, tracking and anticipating the passenger traffic, for recognizing and monitoring individuals behaving suspiciously, detecting intrusions in tunnels, identifying irregular sounds, such as gunshots, explosions and glass breakage, on the railway and road network; electronic and electric equipment for processing satellite positioning data, namely computers, computer hardware, modems, handheld smart phones, satellite geolocation receivers [GPS], radios; electronic and electrical apparatus for monitoring railway and road traffic, namely computer hardware, position sensors and surveillance cameras; equipment for controlling the management of road and railway transport lines, namely downloadable software and computer hardware; electrodynamic apparatus for the remote control of switch rails; alarm systems and devices, namely order transmitters intruder alarms, electronic alarms for indicating danger as well as accidents and incidents detected on the railway and road network, security alarms for commercial and industrial use and fire alarms, audible warning devices, namely alarm horns and sirens in the fields of railways, roads and the transport of passengers and goods; fire-extinguishing apparatus; apparatus and equipment for the transmission of alert data, namely computers, network routers, wireless routers, LTE routers, DSL routers, fibre optic routers, modems, smart terminals, terminals for radio telephones, electronic components, namely printed circuits, electrical conductors used in the generation, transport, distribution and use of electrical energy, namely electrical wires, coaxial cables, data cables, electrical cables, fibre optic cables, semiconductors for rolling stock for railways, high-speed and very high-speed railway vehicles, railway trains with distributed and concentrated power, railway trains with or without a motor car, articulated and non-articulated railway trains, for streetcars, buses, electric vehicles and autonomous vehicles, for stations and substations; electric current collectors in the railway field; electric and electronic installations for the remote control of rail and road operations; electric control panels; computerized switchboards for rail and road operations; electrical switching apparatus, namely contactors, disconnectors, high-speed circuit breakers (direct current), single-phase vacuum circuit breakers, three-phase vacuum contactors, brake switches, railway switches, steering switches for railway vehicles; electric batteries for railway and road vehicles; electric chargers for railway and road vehicles; electric accumulators and batteries, namely fuel cells, hydrogen fuel cells, galvanic batteries, hydroelectric cells, dry cells, solar cells, rechargeable lithium cells, lithium-ion cells, nickel-cadmium batteries and nickel-metal hydride batteries; electricity conduits; speed control apparatus for railway vehicles, namely analogue and digital beacons installed at track level that transmit data related to the track and the condition of the signage at ground level, namely speed limit, track inclination and distance to next signal; optical and magnetic data carriers, namely blank and recordable CDs and DVDs, magnetic tape recorders, hard drives; electric and electronic relays; speed indicators; signalling apparatus and instruments, namely mechanical, digital, electronic and neon signs, signal lights, emergency warning lights, warning triangles, luminous or mechanical safety signals, rotating signalling lights for road and railway use; luminous and mechanical signalling panels; luminous

road signs; electrodynamic apparatus for the remote control of digital, analogue and power signals in the fields of roads and railways; electronic signal transmitters, namely FM transmitters, radio frequency transmitters and transmitters for global positioning systems; electronic notice boards; electric warning bells; navigation and radio guidance apparatus for railway and road vehicles, namely on-board computers, navigation computers for railway and road vehicles; information processing apparatus in the field of railway and road transport, namely computer hardware; recorders and apparatus for measuring distances for railway and road vehicles and for recording time, namely odometers, taximeters; automatic piloting devices for vehicles, namely cameras, radars, sonars, global positioning system (GPS) consisting of computers, computer software, transmitters, receivers and network interface devices, speed regulators for railway and road vehicles; voltage regulators for the control of electrical current, power and frequency for railway and road vehicles; downloadable and recorded software for analyzing and diagnosing the condition of railway infrastructure equipment, railway vehicles and parts therefor, namely bodies, wheels, brake pads, pantograph contact strips, doors, antennas and mountings; downloadable software embedded in signalling devices that enable the management, control and operation of railway and road signalling; downloadable software embedded in command and control devices for railway vehicles, streetcars, buses, electric vehicles and autonomous vehicles that enable planning, management and control of rail traffic and railway vehicles, for locating, supervising and circulating railway rolling stock on tracks, for securing railways; computer programs in the nature of guidance, itinerary search and mapping programs for road and railway traffic, mobile telecommunications terminals for railway and road vehicles; management software and computer hardware for analyzing and processing data collected by an analysis and diagnosis system in order to ensure the ongoing management of railway and road traffic as well as its ongoing and predictive maintenance and adaptation; management software and computer hardware for modelling and simulating railway and road equipment and for optimizing same; computer platforms in the form of software for modelling railroad lines in 3D, simulating railway rolling stock operation in virtual and augmented reality in the context of training, teaching simulation protocols for maintenance and security in the fields of railways, roads and the transport of passengers and or goods; satellite navigation apparatus, namely satellite geolocation receivers [GPS]; apparatus for disseminating, recording, transmitting, reproducing sound and images, on-board and not, in railway vehicles, buses, electric vehicles and autonomous vehicles, namely audio cassette recorders, video tape recorders, cassette recorders, event recorders for security use, phonographic record players, phonographs, compact disc players, audio amplifiers, aerial amplifiers, signal amplifiers, optical amplifiers, cathode ray tubes, video surveillance cameras, intercom audio recorders, speakers, microphones, transceivers, flat panel display screens, electronic touch screen displays, televisions; telecommunication apparatus and equipment for capturing, counting, collecting, storing, converting, processing, entering, emitting, transmitting data, information and signals, namely telephones, fax machines, televisions, transceivers, wireless radio transceivers, satellite transceivers, radio frequency modulators, radio receivers, telephone receivers, audiovisual receivers, satellite antennas, satellite dishes, microwave antennas, radar antennas, radio antennas, electronic waveguides, calculators, computers, cathode ray tubes, telephones, computer hardware, secure digital memory cards, RAM (random access memory) cards, integrated circuit memory cards, computer memory cards, modems, hard drives, USB keys, changeover switches for telecommunication apparatus, smart phones, radio transmission towers, fibre optic cables, computer network routers; transmitting and receiving apparatus for radio broadcasting, television broadcasting and teletransmission, namely video receivers, radio frequency receivers, global positioning system receivers, television receivers, optical transceivers, long range transceivers, Ethernet transceivers; satellite data transmitting and receiving apparatus, namely radars; radio frequency antennas, radar antennas, car and railway vehicles antennas,

electric cables for data transmission; computer, telematic and telephone terminals for accessing global telecommunication (Internet-type) networks with open and restricted access, and accessing private telecommunication (intranet-type) networks with open and restricted access; video servers; downloadable software for streaming images, sounds, films, information, data in the fields of railways, roads and the transport of passengers and goods; devices and apparatus for telecommunications and the provision of information to passengers in stations, namely LED panels mounted above the screen doors along subway and train platforms that display a colour code representing the level of passenger occupancy in each section of the approaching train allowing a better distribution of passengers boarding the train, automatic and interactive machines for verifying and validating tickets, touch screen terminals installed in subway stations that display the layout of the road transport network, indicate travel times to other points on the network, display in real time the position of trains on the line and the number of passengers on board, identify and display messages posted on social networks that concern the neighbourhood where the station is located, namely recreational areas, restaurants, bars and cafés, special events, touch screens on board in railway vehicles for the transmission and dissemination of travel information in real time, traffic reports, live news, weather information and geospecific data that may also be transmitted and disseminated directly on the personal devices of passengers using a Wi-Fi connection; smoke evacuation systems that can be activated manually and automatically, namely electrical controls for activating the ventilation, suction and redirection of smoke for outdoor discharge; fire detection systems, namely fire and smoke detectors and fire alarm systems; in-tunnel and in-station emergency radio telecommunication devices in the event of an emergency, namely radio transmitters and receivers, wireless headphones with built-in radio; digital and electronic equipment for the cyberprotection of railway systems, namely recorded software and computer hardware; multifunctional roof equipment for railway rolling stock, namely pantographs, auxiliary power converters that may be mounted under chassis and inside electric vehicles, buses, subway trains, regional trains, high-speed trains and locomotives; equipment for railway rolling stock that may be mounted on board and on the roofs of railway vehicles, namely computers, electronic tablets, control panels for railway vehicles and monitoring equipment, namely cameras, systems for audio detection, namely ultrasound sensors, microphones, security surveillance robots and sensors, namely movement, temperature, infrared, ultrasound, pressure, liquid and oil level, smoke, gas, touch and proximity sensors; equipment for railway rolling stock that may be mounted on board, on the roof and under the floor of railway vehicles, namely traction transformers; energy measurement systems, comprising measuring apparatus, namely wattmeters, fibre optic current sensors, electric current shunts, computer hardware and recorded software for measuring energy; electrical transformation substations, comprising high-voltage equipment, namely circuit breakers, disconnectors, lightning arresters, voltage regulators, for indoor and outdoor substations and armoured substations, medium- and low-voltage equipment, namely electrical distribution substations and electric voltage transformers, power switches, disconnectors, contactors, circuit breakers, fuses, reclosers of electrical circuits, electric power substations comprising equipment for voltage transformation and substation supervisors, namely computer hardware and recorded software for monitoring activity and transforming the voltage of substations; electric filters, rectifiers, inverters and converters; devices for electrical interference and surge protection; electrical substations consisting of transformers, converters and devices for protection against electrical interference, namely radio interference suppression filters for the recovery of electrical energy surplus generated on railway and road networks when vehicles brake; electric active filtering devices for substations, namely inductive low-pass filters used in electrical applications; electronic smart devices for checking, regulating and protecting traction substations remotely and autonomously in the fields of railways, roads and the transport of passengers and goods; downloadable and recorded computer software intended for electronic smart devices for

performing checking, regulating and protecting traction substations remotely and autonomously in the fields of railways, roads and the transport of passengers and goods; equipment placed on and under railroads or roads for ground-level power supply and ground-level charging of passenger and freight transport vehicles, namely static ground-level charging stations being switching power supplies that connect automatically to the electric power grid, electrically conductive rail segments, electrical cables, railway and road signalling cables for radio signal transmission; catenary consoles; electronic and automated transit ticket purchasing terminals for passengers in the fields of railways and roads.

### **Class 12**

(2) Land vehicles, namely buses and motor coaches, electric and non-electric rolling stock for railways, autonomous and non-autonomous, namely railcars, locomotives, tank cars, undercarriages for railway cars, freight trains, subway trains, railway trains with distributed and concentrated power with or without a motor car, articulated and non-articulated railway trains, streetcars, monorail cars, automatic shuttles, wagons, driving motor cars and high-speed and very high-speed railway vehicles; railway couplings; motors and engines for the aforementioned land vehicles, namely bus motors and engines, motor coach motors and engines, all-terrain vehicle motors and engines and their structural parts, namely pneumatic absorbers for the aforementioned land vehicles, power transmission belts and gears for the aforementioned land vehicles, driveshafts for the aforementioned land vehicles, air pumps (vehicle accessories); propulsion mechanisms, namely three-phase asynchronous alternating current (AC) traction motors and engines for the aforementioned land vehicles; brakes for land and rail vehicles, bogies, axles, car bodies; wagons; railway couplings; shock absorbers for railway and road vehicles; bogies for railway vehicles; motors and engines for railway rolling stock; railway rolling stock powered by electric batteries, fuel cells and hydrogen cells.

### **Services**

#### **Class 37**

(1) Supervision and direction of construction work related to railway infrastructure, railways and road transport infrastructure; servicing, repair, renovation and maintenance of railway infrastructure equipment, road transport line infrastructure equipment, railways, railway vehicles and parts therefor, namely bodies, wheels, brake pads, pantograph contact strips, doors, antennas and mountings; installation of railways and road transport lines as well as equipment and structural elements therefor; information related to the construction and repair of railway, subway, streetcar, bus, electric vehicle and autonomous vehicle infrastructure; paving and construction services for tracks for railway vehicles; information services related to the repair of land vehicles and railway vehicles for the transport of passengers and goods, railway rolling stock, locomotives, wagons and self-propelled vehicles, high-speed and very high-speed railway vehicles, underground trains and sets of automatic and non-automatic vehicles for the transport of passengers, railway vehicles with iron wheels, vehicles guided with suspension systems, pneumatic and otherwise, railway couplings, railway infrastructure, coatings, rails and their parts; installation and repair of devices pertaining to a security and surveillance system for signalling any accidents and incidents that affect road and railway traffic; installation, servicing, repair and maintenance of equipment for controlling the management of road and railway transport lines; construction and installation of drainage systems for the pumping and flow of water; construction of works made of concrete, namely concrete mono-block ties, concrete poles, concrete slabs and concrete beams, and made of other materials, namely metal materials, composite materials, plastic materials, wood,

comprising base plates and anchor points installed in the concrete and plastic materials for railway infrastructure; advice related to the construction of road and railway transport lines, works and infrastructure in the fields of railways, roads and the public transport of passengers and goods.

### **Class 42**

(2) Scientific and technological services, namely scientific research and development of products and works in the field of railways and road transport lines; coordination of scientific research and development of products and works in the fields of railways and road transport lines; construction project planning related to road and railway transport lines, works and infrastructure in the field of railways, roads and the public transport of passengers and goods; preparation and issuance of scientific and technological reports related to technical project studies and the feasibility of construction projects in the field of railways, roads and the public transport of passengers and goods; industrial analysis services provided by railway experts and engineers in order to ensure compliance with railway industry standards; advice related to energy conservation; quality control services for others in the field of railways, roads and the public transport of passengers and goods; surveying of land, of roads and related to architectural work in the fields of railways, roads and the public transport of passengers and goods; material testing; mechanical research in the field of railways and road transport lines; research and development of new products for others; technical research in the field of railways and road transport lines; technical feasibility study of projects in the fields of railways, new technologies for railways and road transport lines; engineering services in the fields of railways, roads and the public transport of passengers and goods; industrial testing, namely railway vehicle testing, electrical supply systems for railway vehicles and evaluation of railway infrastructure and of infrastructure for the public transport of passengers and goods; design, development, maintenance, updating and installation of computer systems and software; urban planning; research in the field of environmental protection; electronic control and monitoring of marshalling yards using computers, and electronic and electric sensors for detecting variations in the magnetic field when wagons are on the tracks for the storage, triage, loading and unloading of railway vehicles and locomotives; computer software consulting; software as a service [SaaS] comprising software for recording and analyzing video and audio data recorded by the cameras for monitoring applications in the fields of railways, roads and the public transport of passengers and goods, namely for monitoring traffic conditions, items lost on transport lines and routes, individuals behaving suspiciously, intrusions in tunnels, irregular sounds, such as gunshots, explosions and glass breakage, on the railway and road network; scientific research and development services related to the establishment of models (static and dynamic) and integration of these models (engineering work) for railway and road applications; engineering services, namely engineering research and technology development in the fields of railways and road transport lines; technical assistance and advisory services related to the operation and supervision of computer networks in the fields of railways, roads and the public transport of passengers and goods; technical assistance and advisory services in the fields of computers, telecommunications and television broadcasting in the fields of railways, roads and the public transport of passengers and goods; creation (design) of data and text processing programs for businesses; technical consulting and research in the fields of telecommunications and television broadcasting relating to the fields of railways, roads and the public transport of passengers and goods; technical consulting and advice in the fields of telecommunications and computers relating to the fields of railways, roads and the public transport of passengers and goods; consulting related to computers; rental of programs on computer media and by means of telecommunications, namely programs downloadable on the Internet in the fields of railways, roads and the public transport of passengers and goods; design (development) of computer systems and telecommunications and broadcasting systems; technical project studies and research in the field of maintenance, servicing, installation and repair of

computer hardware, telecommunication and television broadcasting equipment in the fields of railways, roads and the public transport of passengers and goods; technical advisory services in computer technology relating to the fields of railways, roads and the public transport of passengers and goods; code and format conversion between different types of texts; rental of access time to a database server centre; provision of access to computer networks, creation of web pages and installation of web hosting facilities for the benefit of others; design and maintenance of Internet sites; design, installation, maintenance, updating and rental of software and databases; supervision (checking, monitoring) of computer networks for the digital security of railway and road operations; design and development of computer languages for modelling and simulation; design of computer systems and on-board systems; provision of guidance, itinerary and mapping programs through a communications network.

#### Class 01

(1) Adhesives for use in the construction industry; mineral suspensions used to bind metal ions for water treatment; unprocessed plastics; plastic granulate for manufacturing medical articles; unprocessed artificial resins; chemical preparations in the form of pastes and coatings for waterproofing and for protecting tiles and shingles (except paints); chemical products based on polymers and synthetic resins used for making waterproofing coating materials; solvents for removing adhesive plasters; solvents for varnishes; solvent for use in pesticide; solvent welding compound.

#### Class 02

(2) Paints, pastes, coatings and varnishes used for waterproofing and for protecting tiles, shingles, roofs, terraces and balconies from deterioration due to environmental effects; lacquers and lacquer pens for repairing plastic surfaces and for painting joints and butt joints of plastic parts; anti-corrosion oils; anti corrosion paints; anti-corrosion greases; anti-corrosion waxes; corrosion inhibiting paint type coatings; antifouling self-adhesive tapes [corrosion prevention goods]; self-adhesive antifouling films and sheets [corrosion prevention goods]; corrosion prevention self-

adhesive tapes; self-adhesive corrosion prevention films and sheets; paint primers for use on mineral substrates, metal, wood and plastic; primers in the nature of paint coatings; acrylic primers; paint primers; anti-fouling agents impregnated into films; corrosion inhibiting materials impregnated into films; adhesive tape for antifouling purposes with or without a protective layer; anti-corrosive tape.

### **Class 06**

(3) Building panels of metal; metal pillars for building; metal slabs for building; building boards of metal; cladding of metal for construction and building; slabs of metal for building; scaffolding of metal; metal partitions for buildings; reinforcing materials of metal for building; laminated metal sheets, laminated metal plates; composite metal sheets; metal screws, metal bolts, metal hinges, metal pegs, metal nuts, metal latch bars, metal plates; rivets, especially expanding rivets, from metal; roofing tiles of metal; plastic coated metal cladding panels.

### **Class 12**

(4) Windscreens; windows for vehicles; windows for soft tops of vehicles; vehicle roofs of flexible plastic, rear and side plastic covers for vehicles; vehicle parts, namely dashboards, center consoles, interior door panels, truck bed liners, bumper fascias in the form of sheets made of plastic material, extruded thermoformable sheets made of plastic material, extruded grained and printed sheet, extruded thermoformable sheets made of composite materials, extruded thermoformable sheets made of plastic material and natural fibres and mineral fillers, panels including honeycomb structure and films and sheets; vehicle parts, namely, plastic washers to prevent friction, panels and support for dashboards, drawers, consoles, glove compartments, shelves, posts and body parts relating to seat backs, door panels, trunk trim, trunk floor of plastic and of composite material, namely plastic, wood and other fillers; windows for sprayhoods and enclosures of boats; sheets and cloth of plastic as tarpaulins and fitted protective covers for boats.

### **Class 16**

(5) Self-adhesive sheets of plastic as stationary; adhesive tape for decoration purposes as stationary, with or without a protective layer; self-adhesive film strips for repairing and mending surfaces laminated with film; self-adhesive protective films for covering books; self-adhesive protective films for stationary and household purposes; self-adhesive protective films for packaging; self-adhesive plastic sheets for lining shelves; films designed for overwrapping and the outer packaging of medical devices in particular sterile solution bags and blood bag systems; printed invitations; printed menus; printed patterns for dressmaking; printed periodicals in the field of music; printed tags; magazines and periodicals; advertising leaflets, advertising pamphlets, advertising signs of paper, advertising posters; films for packaging of food, especially fresh meat and fish; films for packaging cosmetics; protection film for food; protection films and sheets for packaging; protection film from laminated plastic for use in packaging; sterilizable plastic material for packing in the nature of bags and films for goods for surgical, medical, pharmaceutical, dental and veterinary use.

### **Class 17**

(6) Semi-finished products from plastic materials in the form of films, sheets, bars, pipes, blocks, pellets, plates; plastic substances partly processed; semi-processed synthetic resins; artificial resins in the form of tubes for use in manufacture; artificial resins in the form of sheets for use in manufacture; artificial resins in the form of pellets used for manufacture; plastics films and sheets for shipping containers; plastic films and sheets for agricultural purposes; plastic films and sheets for general industrial or manufacturing use; plastic sheet materials for use in manufacture; polymer films for use in manufacture; reflective plastic films for use on windows; polyurethane films for use in sealing and insulating buildings; films and sheets from plastic for use in manufacturing; polyvinyl

chloride sheets for further manufacturing; films and sheets from plastic for deep-drawing; plastic sheeting for antimicrobial purposes; plastic sheeting for agricultural purposes; plastic sheet material for use in manufacturing, all aforementioned goods also from plastic with fillers like wood fibers, glass fibers and glass particles, and mineral fibers and mineral particles as well as in the form of multilayer laminates with other films and sheets of plastics, paper, rubber, leather, wood, metal, woven fabrics, knit fabrics, non-wovens of paper, textile material or plastic; thermoformable sheets made of plastic and PCV based on plastic with fillers like wood fibers, glass fibers and glass particles, and mineral fibers and mineral particles; plastic sheet material for use in the manufacture of countertops; plastic sheeting for general industrial or manufacturing use; plastic films, sheets and panels for the manufacture of furniture, furniture parts, and furnishings; films and sheets of plastic for the design of furniture, namely, furniture fronts, furniture doors, shelves, edges for furniture, carcasses, sides and rear panels; films and sheets of plastic for the coating of furniture, namely light rails and mouldings; films and sheets from plastic for coating drawer frames and shelves; films and sheets of plastics for coating of building materials and of building components, such as doors, door frames, windows, window frames, fences, facades, profiles, mouldings, plates, beams, boards, paneling, ceiling liners, pipes, piles, window panes, gates, steps, partitions, of wood, metal, plastic and other materials; plastic films and sheets for manufacturing cladding of doors, walls and ceilings; plastic films and sheets for manufacturing housings of electrical equipment; plastic films and sheets for manufacturing interior decoration parts of automobiles, caravans, ships, boats, elevators, offices, hotels, shops, and rooms in private and public buildings; films, sheets and plates made of plastic material, extruded thermoformable films, sheets and plates made of plastic material, extruded printed films, sheets and plates, extruded thermoformable films, sheets and plates made of composite material, extruded thermoformable films, sheets and plates made of plastic material and natural fibres and mineral fillers, plates namely honeycomb structure and films and sheets, all for manufacturing vehicle parts and for use as vehicle parts; films and sheets from plastic for the manufacturing of windows, windows for soft tops of cars, and windows for sprayhoods and enclosures of boats; films, fabrics, and sheets from plastic for the manufacturing of sails, tarpaulins and protective covers for the shipping industry; films and sheets from plastic for the manufacturing of office supplies, organizational aids for offices, book covers and stationery; films and sheets from plastic for the manufacturing of promotional items; films and sheets from plastic for the manufacturing of items of camping equipment, recreation-oriented products and household goods; films and sheets from plastic for use in manufacturing solar modules; polymer films for use in manufacture of ceilings; transparent films, sheets and plates from plastic for industrial use and for further manufacturing; insulation covers for industrial machinery; films and sheets and self-adhesive films and sheets from plastic for manufacturing façade elements and for coating and renovating façade elements; flexible plumbing pipes of plastic; flexible plastic pipes for conveying natural gas; extruded plastics in the form of tubes for use in manufacture; flexible plastic conduits for plumbing use; packaging material for forming seals for medical and pharmaceutical packaging; plastic films, tubing and pellets for manufacturing medical containers, components for medical containers and bags also sealable and sterilizable, especially blood bags, bags for infusion solution, urine bags, containers for medicaments, multi chamber containers and bags with frangible partition; plastic films for manufacturing medical coverings; plastic films for manufacturing body bags; plastic films for manufacturing protective clothing; general purpose sealants; adhesive sealant compounds for roofs, floors and walls; silicone sealants for roofs, floors and walls; adhesive sealants for sealing tiles, shingles, terraces and balconies against water and environmental effects; draft excluder strips; insulating tape and band; masking tape for industrial purposes; fiberglass electrical insulating tape; sealant compounds for joints; laminated plastic film for use on windows; rubber sleeves for protecting parts of machines; silicone-coated plastic sheets; self-adhesive sheets of

plastics for industrial and commercial use; masking tape for industrial purposes; self-adhesive plastic sheets for use in manufacturing; self-adhesive plastic sheets for lining shelves; adhesive-coated plastic sheets for flooring applications; adhesive anti-slip film for flooring applications; abrasion resistant plastic coating; adhesive sealant compounds; silicone sealant compounds; sealant compounds for joints; general purpose sealants; sealants for expansion joint covers; expansion joint fillers; silicone sealants; sealant compounds for use in the construction industry; elastomeric sealants in the form of extrudable pastes for joints; liquid latex sealants; adhesive sealants; sealing gaskets of metal; sealing rings; sealing compounds for masonry and wood; mastic compositions for sealing and jointing; gasket material in sheet form for automobiles; gasket material in sheet form for switching gear; gaskets of metal; self-adhesive sealant compounds; insulating tape and band; masking tape for industrial purposes; fiberglass electrical insulating tape.

### **Class 19**

(7) Monolayer sheets of plastic for use in buildings; PVC for use in the construction industry; plastic floor panels for use in the construction industry; plastic roofing panels for use in the construction industry; wood panels; plywood panels; plastic roofing panels; plastic floor panels; plastic films and sheets for use as geomembranes; geomembranes; membranes and plates of plastic for swimming pools and garden ponds, as construction materials, for structural and civil engineering, for the building of roads, canals, dykes and river beds, for construction for environmental protection purposes in particular storage pools and reservoirs for storing solid and liquid waste, retaining lakes, dams, tunnels, drainages, ducts, floating covers, large area coverings for the waterproofing of terraces, tunnels, foundations, and buildings, as membrane sheets for sealing of roofs; plastic skylight for building; roof vents of plastic; plastic roofing panels; plastic drywall corner beads; thermoformable plastic roofing panels for construction purposes; thermoformable plastic floor panels for construction purposes; honeycomb panels from plastic for use in construction; non-woven textiles made of synthetic fibres for use in the building industry; roof covering, not of metal; plastic films and sheets for roofing; plastic roof gutters; plastic roof panels; PVC roofing membrane; roof coatings; PVC roofing membrane for waterproofing roofing; cladding parts for buildings, not of metal; plastic window screens; flexible plastic window screens; building material (not of metal), in the nature of glass bricks and luminous glass; bituminous coating for roofing; fireproof cement coatings; roof coatings; plastic plates and PVC plates as formwork; non-woven textiles made of synthetic fibres for use in the building industry; stretch ceiling film; plastic coated cladding panel not of metal; flocked films and sheets from plastic for use in construction.

### **Class 20**

(8) Display cases, display tables, display boards and signboards of wood or plastic.

### **Class 22**

(9) Tarpaulins for ships.

### **Class 24**

(10) Non-woven textile fabrics; plastic cloth for sails; films and sheets from plastic for coating of furniture, furniture parts, and furnishings.

(1) Computers in the field of aviation, wind energy, maritime applications, and meteorological data applications; data processing equipment, namely computer hardware and downloadable and recorded software for use in the field of aviation, wind energy, maritime applications, and meteorological data applications in connection with the collection, processing and implementation of atmospheric data to detect, assess, mitigate, and resolve icing in drones, airplane sensors, and ice detection equipment; deicing systems namely atmospheric sensors and control units for collecting, transmitting, receiving, aggregating, analyzing, and processing atmospheric and meteorological data and subsequently allocating energy based on that data to monitor ice detection for hulls, airfoils and rotor blades on unmanned aircraft; deicing equipment namely electric heat sensors to assist in melting ice for hulls, airfoils and rotor blades on unmanned aircraft; control panels and sensors for detecting possible icing on unmanned aircraft, sensor systems for direct detection and alert to unmanned aircraft on icing, and with subsequent launching of deicing systems; digital units for measurements namely, digital air temperature gauges, digital thermometers, digital humidity gauges, digital pressure gauges, and digital energy output gauges; automatic control devices namely, devices for receiving, aggregating, analyzing and processing atmospheric and meteorological data and allocating energy based on that data; air temperature sensors; thermostats; sensors, namely temperature sensors and humidity sensors; thermal sensors used for measuring of ice formation and communication with aircraft for transmitting, sending and capturing of data; scientific, research, navigation, surveying, photographic, cinematographic, audiovisual, optical, weighing, measuring, signalling, detecting, testing, inspecting, life-saving and leaching apparatus and instruments namely, air temperature gauges, humidity gauges, energy output gauges, sensors for collecting and transmitting atmospheric and meteorological data, control units for receiving, aggregating, and processing atmospheric and meteorological data and allocating energy based on that data, and exterior and embedded temperature, humidity, pressure and energy sensors for air vehicles, water vessels, and wind turbines; apparatus and instruments for conducting, switching, transforming, accumulating, regulating and controlling the distribution and use of electricity on aircrafts namely,

accumulators for transforming, distributing, converting, regulating and using electricity through the collection and storage of excess and waste heat, converters for the creation of thermoelectricity, electrical transformers, thermoelectric generators, thermoelectric systems for regulating and distributing thermoelectricity and thermoelectric panels; apparatus and instruments for recording, transmitting, reproducing and processing sound, images and data to aircrafts and drones; recorded and downloadable media in the nature of downloadable and recorded audio, video, text, and data files to assist with determining adverse weather conditions and solutions thereto in the field of aviation, wind energy, maritime applications, and meteorological data; downloadable computer software for collecting, transmitting, receiving, aggregating, analyzing and processing atmospheric and meteorological conditions for air vehicles and wind turbines in the field of aviation, wind energy, maritime applications and meteorological data applications; blank digital and analogue recording and storage media namely, blank digital and analogue recording and storage media for collecting, transmitting, receiving, aggregating, analyzing and processing atmospheric and meteorological data to strategically allocate energy for the purposes of deicing; coin-operated mechanisms, namely coin counting and sorting machines; cash registers, calculating devices, namely electronic calculators; computers and computer peripheral devices, namely, keyboards, mice, printers, scanners, digital cameras and speakers for use in aviation, wind energy, maritime applications, and meteorological data applications; fire-extinguishing apparatus, namely, fire extinguishers, fire-extinguishing balls, and fire extinguishers for air vehicles.

### **Class 11**

(2) Heating installations and apparatus for heating the exterior of air vehicles, namely, heat producing thermoelectric accumulators for the purpose of generating thermal energy, heat producing thermoelectric systems for regulating and distributing thermal energy derived from electrical energy in the form of heat to the exterior of an aircraft, heat producing thermoelectric panels for generating thermal energy derived from electrical energy in the form of heat, apparatus for heating the exterior of air vehicles and wind turbine, apparatus for heating air vehicle motors; heaters for deicing of vehicles; apparatus, devices and appliances for lighting, heating, steam generating, cooking, roasting, drying, ventilation, cooling, water supply and sanitary purposes namely, heat producing thermoelectric accumulators for the purpose of generating thermal energy, heat producing thermoelectric systems for regulating and distributing thermal energy derived from electrical energy in the form of heat to the exterior of an aircraft, heat producing thermoelectric panels for generating thermal energy derived from electrical energy in the form of heat, heating apparatus for air vehicles and wind turbines, apparatus for heating air vehicle motors.

### **Class 12**

(3) Aircraft hulls and wings for unmanned aircraft with integrated sensors and deicing systems; vehicles namely, aircraft; apparatus for locomotion by air, namely, aircrafts

### **Services**

#### **Class 37**

(1) Installation of deicing systems for unmanned aircrafts: deicing services for aircrafts, namely, facilitating the deicing of aircrafts; repair of deicing systems for air vehicles, water vessels and wind turbines and components thereof and thermoelectric panels and components thereof; installation services of deicing systems for air vehicles, water vessels, and wind turbines and components thereof and thermoelectric panels and components thereof.

#### **Class 42**

(2) Design and development of sensors and control of steering units for use with deicing systems for drones, air taxis, and airplanes; scientific and technological services and related research and

development thereto namely, scientific research and product development in the field of thermoelectric panels and deicing systems for air vehicles, water vessels, and wind turbines and components therefor; industrial analysis of thermoelectric panels and deicing systems to assure compliance with industry standards and scientific research services in the field of thermoelectric panels and deicing systems for air vehicles, water vessels, and wind turbines and components therefor; design and development of computers and computer programs, namely downloadable and recorded computer software in the field of aviation, wind energy, maritime applications, and meteorological data applications.

(1) Scientific and measuring apparatus and instruments, namely, bioelectrical impedance instruments for body composition analysis; mobile telephones; data processing apparatus, namely, computer hardware, video processors, graphics processing units, digital signal processors, computer microprocessors; computers; non-medical meters for measuring electrical current through humans, namely, digital panel meters, ammeters, electric current meters, voltmeters, meters for measuring body mass, meters for measuring body density, meters for measuring human tissue density, meters for measuring the presence of fluid in human bodies, meters for measuring the presence of fluid in body parts, meters for measuring the presence of fluid in body segments; spectrometers; non-medical devices for scientific use in measuring the composition of body fluids, namely, mass spectrometers, pH meters, meters for measuring fluid density, viscometers; telecommunications apparatus, namely, wireless transmitters and receivers that use wireless networking technology that uses radio waves to transmit bioimpedance measurements of fluid levels in patients between tablets and bioelectric impedance instruments for body composition analysis; communication devices, namely, cellphones and wireless communication devices for voice, data, and image transmission that use wireless networking technology that uses radio waves to transmit bioimpedance measurements of fluid levels between tablets and bioelectrical impedance instruments for body composition analysis; emergency call telephone apparatus in the nature of a telephone terminal; non-medical sensors for measuring physical movements of a patient wearing or carrying the device, namely, sensor chips for scientific use; data processing equipment, namely interface cards for data processing equipment in the form of printed circuits and computer hardware in the nature of central processing units; computers; computer programs and software for data measurement, data transformation, data storage, patient tracking, results interpretation, results analysis, and results display for application to bioimpedance readings generated by a bioimpedance analysis instrument or bioimpedance spectroscopy instrument; scientific and measuring apparatus and instruments, namely, bioelectrical impedance instruments for measuring and recording hydration, fluid density and retention in humans and animals; scientific and measuring apparatus and instruments for measuring and recording fluid levels in

humans, animals, namely, extracellular fluid in human limbs; scientific apparatus for diagnostic testing of biological samples, other than for medical use, namely, electronic analyzers for measuring, testing and analyzing blood and other bodily fluids; testing apparatus, not for medical purposes, namely, semiconductor testing equipment; remote controls and software for remote control and operation of scientific and measuring apparatus and instruments, namely, blood pressure measuring apparatus, arterial blood pressure measuring apparatus, electromagnetic measuring detectors, heartbeat measuring apparatus, pulse measuring devices; remote controls and software for remote control and operation of bioelectrical impedance instruments for body composition analysis; bio-sensors; test electrodes not for medical use, namely electrodes for laboratory research, graphite electrodes; wearable activity trackers for recording activity of human and animal hearts, lungs, bodily organs, cells, glands, lymph glands, namely, to record fluid levels and retention in human and animal hearts, lungs, bodily organs, cells, glands, lymph glands, tissues, namely pedometers, accelerometers, stretch sensors, bioimpedance monitors, muscle activity monitors, skin impedance monitors; bioelectrical impedance instruments for recording size and performance of human and animal hearts, lungs, bodily organs, cells, glands, lymph glands, namely, to record fluid levels and retention in human and animal hearts, lungs, bodily organs, cells, glands, lymph glands, tissues; bioelectrical impedance instruments for use in testing, namely, research laboratory analyzers for measuring, testing and analyzing blood and other bodily fluids; alarm signalling and receiving apparatus and alarm devices, other than for vehicles, namely, non-medical alarm sensors to monitor for heart failure, heart disease, heart irregularities, organ failure and disease and to monitor human vital signs and notify the wearer and third parties in relation to data relating to human vital signs namely to fluid levels and retention in human and animal heart, lungs, bodily organs, cells, glands, lymph glands

### **Class 10**

(2) Medical and veterinary apparatus and instruments, namely, bioelectrical impedance instruments for body composition analysis; bioelectrical impedance analysis and bioimpedance spectroscopy instruments for medical purposes; medical diagnostic testing apparatus, namely, bioelectrical impedance instruments for testing for heart failure, heart disease, heart irregularities, organ failure or disease, and to monitor human vital signs and notify the wearer and third parties in relation to data relating to human vital signs, namely, fluid levels and retention in human or animal heart, lungs, bodily organs, cells, glands, lymph glands; medical apparatus, namely, bioelectrical impedance instruments for the diagnosis and treatment of lymphoedema; medical spectrometers; meters for body fluids for medical use, namely, blood glucose meters, concentration meters, spirometers, blood pressure monitors, thermometers; meters for body fluids for medical use, namely, blood glucose meters, concentration meters, spirometers, blood pressure monitors, thermometers; medical and veterinary meters for measuring electrical current passing through humans and animals, namely, pulse meters, meters for measuring body mass, meters for measuring body density, meters for measuring human tissue density, meters for measuring the presence of fluid in human bodies, meters for measuring the presence of fluid in body parts, meters for measuring the presence of fluid in body segments; devices for medical and veterinary use, namely, veterinary and surgical instruments for use in clinical applications for determining body composition, segmental body composition, fluid level measurements, lymphedema assessment, detection and measurement, unilateral and bilateral, measurement, all in human or animal subjects; devices for medical and veterinary use, namely, veterinary and surgical instruments for use in clinical applications for determining hydration, measuring and recording fluid in humans, animals, namely, extracellular fluid in human limbs; consumable electrodes for medical use, electrodes for medical purposes, electrodes for picking up biological parameters, electrodes for use with medical apparatus, electrophysiology electrodes; medical electrodes; medical

instruments for general examination for recording activity, size and performance of human and animal heart, lungs, bodily organs, cells, glands, lymph glands, to record fluid levels and retention in human and animal heart, lungs, bodily organs, cells, glands, tissues, lymph glands; veterinary instruments for recording activity, size and performance of human and animal heart, lungs, bodily organs, cells, glands, lymph glands, to record fluid levels and retention in human and animal heart, lungs, bodily organs, cells, glands, tissues, lymph glands; medical instruments for general examination and surgical instruments for bioelectrical impedance measuring and recording apparatus and instruments for estimating the composition of living matter therefor, namely, medical and instruments for general examination and surgical instruments for measuring body fat and body mass index; medical alarm and monitoring devices to monitor for heart failure, heart disease, heart irregularities, organ failure and disease, and to monitor to monitor human vital signs and notify the wearer and third parties in relation to data relating to human vital signs namely to heart failure, heart disease, heart irregularities, organ failure and disease, and to monitor fluid levels and retention in human or animal heart, lungs, bodily organs, cells, glands, lymph glands; electronic devices for assisting care giving for seniors or people needing assistance comprised of sensors for determining status of person and apparatus for sending electronic alerts to care givers; medical products, namely, biofeedback sensors, namely, electronic sensors to monitor people's health, namely, monitoring for heart failure, heart disease, heart irregularities, organ failure and disease and monitoring human vital signs namely fluid levels and retention in human or animal heart, lungs, bodily organs, cells, glands, lymph glands and to notify the wearer and third parties in relation to data relating to those human vital signs

## **Services**
