Trademark Description

The mark consists of the term ECOPORT in stylized form in white on a black quadrilateral with rounded edges.

Certification Mark Standard

The certification mark, as used or intended to be used by persons authorized by the certifier, certifies or is intended to certify that the goods in association with which the trademark is used been inspected and approved as meeting the CTA 2045 International Standards, a technical standard promulgated and published by the Consumer Technology Association (R7.8 Modular Communication Interface for Energy Management Subcommittee' CTA 2045 Levels Command Overview; CTA 2045 Levels Guidance for Water Heaters). The certification program provides for testing and verification of the certified goods' correct sending and receiving of the messages defined by the CTA 2045 standard. Once a product testing report has been reviewed and found to be complete in its implementation of all the requirements of the standard, the manufacturer of the certified good receives the ability to use the certification mark on its products and marketing material. The certified goods shall have a communication port that operates in compliance with CTA 2045 (or equivalent open source modular interface standard) with specific demand response signals. The communication port shall be easily accessible and allow for the plug-in of non-proprietary communication modules. The certified good shall revert to the user's previously-selected mode (or factory settings) after a demand response event. All CTA 2045 or equivalent open source modular interface functionality, including hardware and software, must be contained on the unit. A module or adaptor separate from the unit does not meet the requirement.

Manufacturers obtaining Certification must at least be a Contributor member of the OpenADR Alliance to obtain certification. Membership must be maintained to keep the certification current instead of continuing compliance verification. To assure a certain level of future compliance to any relevant changes and update, the manufacturer is required to remain a member of the OpenADR Alliance or the Certified Good will be marked as "not maintained". OpenADR retains the right to

randomly select 1-5 implementations per year for market surveillance testing. The manufacturer is required to provide an off-the shelf sample of the implementation for testing. OpenADR will bear the cost of the testing. If a good is found to not comply with the EcoPort specification and test plan, the certification will be revoked until a full retest and re-certification was conducted. The applicant is not engaged in the manufacture, sale, leasing or hiring of goods or the performance of services such as those listed in the application.

The image shows the word "Ukliss" in a highly stylized, cursive script. The letters are interconnected and have a fluid, elegant appearance. The 'U' starts with a large, decorative flourish that loops back under the 'k'. The 'l' is tall and thin, and the 'i' has a small dot. The 's' ends with a long, sweeping tail that curves under the 's'. The overall style is reminiscent of a handwritten signature or a classic calligraphic font.
