Trademarks Journal

Vol. 69 No. 3533

General Information

The *Trademarks Journal* (the “*Journal*”) is published on the website of the Canadian Intellectual Property Office (<http://cipo.gc.ca>). The *Journal* lists trademark applications advertised under subsection 37(1) of the *Trademarks Act* (the “*Act*”), public notices of prohibited marks under section 9 of the *Act*, statements of the Minister in respect of geographical indications under subsection 11.12(2) of the *Act*, as well as erratums to previous volumes.

Electronic *Trademarks Journal*

The *Journal* is available in PDF format and can be downloaded free of charge and viewed and printed with Adobe Acrobat Reader. The *Journal* is also available in a printable HTML format as an alternate official version that contains a search function to narrow and customize the content. The electronic form of the *Journal* is the official version.

Official Languages

The *Journal* is available in English and French. The details displayed for each application are based on the language of the application. If the language of the application is English, the goods, services, or other text and description appearing in the English version of the *Journal* are in the language filed by the applicant. If the language of the application is French, the goods, services, or other text and description appearing in the English version of the *Journal* have been translated. Any registration resulting from the application will be restricted to these goods or services as described in the language of the application.

Filing Dates

The filing date of each trademark application (including those to extend the statement of goods or services of an existing registration) is shown in the YYYY-MM-DD format.

Nice Classification

Where applicable and required, the *Journal* lists the goods or services of each application grouped according to the classes of the Nice Classification, each group being preceded by the number of the class of the Nice Classification to which that group of goods or services belongs and presented in the order of the classes of the Nice Classification.

Opposition

Any person who has a valid ground of opposition (see section 38 of the *Act* for the grounds of opposition) to any application for registration of a trademark or to any application for registration of a trademark extending the statement of goods or services advertised in this *Journal* may file a statement of opposition with the Registrar of Trademarks within two months from the date of issue of this publication. The prescribed fee must accompany the statement of opposition.

scientific, nautical, surveying, photographic, cinematographic, optical, weighing, measuring, signalling, checking (supervision), life-saving and teaching apparatus and instruments, namely, intelligent bus systems based on Controller Area Network Technology and Multiplexing technique for the protection and control of electrical installations in recreational and work boats and vehicles, electrical protection devices, namely, thermal overcurrent circuit breakers, thermal magnetic overcurrent circuit breakers, magnetic overcurrent circuit breakers, hydraulic magnetic overcurrent circuit breakers, electronic overcurrent circuit breakers, hybrid overcurrent circuit breakers, mechanical and electronic protection relays, solid state remote power controllers (SSPPC), intelligent bus systems for the protection and control of electrical installations, for electrically measurable physical dimensions like current, voltage, temperature, frequency, pressure, resistance, power, energy and electrical protection relays and switchgears for the measurement and control of current, voltage, temperature, frequency, pressure, resistance, power, and energy; apparatus and instruments for conducting, switching, transforming, accumulating, regulating or controlling electricity, namely, electrical power distribution and control units, circuits, generators, microcircuits, circuit boards, circuit breakers, miniature circuit breakers (MCBs), residual current

circuit breakers (RCDs), residual current operated circuit breakers with overcurrent protection (RCBOs), molded-case circuit breakers (MCCBs), remote-controlled circuit breakers, arc fault detection and protection devices for AC and DC distribution and generation networks, namely, arc fault circuit breakers (AFCBs), and arc fault circuit interrupters (AFCIs), arc fault monitors (AFMs), arc fault sensors and arc fault detection algorithms for installation in conventional and renewable energy grids operated by AC or DC including smart grid applications; cash registers; data processing equipment, namely, circuit boards; computers; computer software for smart power distribution, electrical load control and diagnosis; computer software for configuring, programming and controlling power distribution systems based on Controller Area Network Technology and Multiplexing technique in recreational and work boats and vehicles; computer software for preventing fires by arc fault detection in photovoltaic systems, electric and hybrid vehicles, aircraft on-board electrical systems, data processing centers; computer software for overcurrent and short-circuit detection in automatic circuit breakers, smart power relays; electrical and electronic apparatus and instruments and parts thereof, in particular circuit breakers for equipment protection, flow-rate meters and current monitors, sensors, namely, current sensors, voltage sensors, temperature sensors, frequency sensors, pressure sensors, resistance sensors, power sensors, and electrical energy measurement sensors; electrical and electronic switching, protecting, controlling and measuring devices, namely, circuit breakers, cut-off switches, disconnectors, voltage surge protectors, electrical controllers, semiconductor switches, relays, load controllers, overcurrent protection devices, smart power distribution units, power distribution systems including a printed circuit board and a housing, measuring devices for load current, voltage, total current and the status of outputs, input/output modules, field bus connections, electric cut-off switches, disconnectors in the nature of cut-out switches, electric control panels, ohmmeters, electric microcontrollers, modules for BUS-coupling; electrically remotecontrolled operated switching devices, namely, electrically remote-controlled automatically operated switches, electrically remote-controlled manually operated switches, electrically remote-controlled power switches, electrically remote-controlled rocker switches, electrically remote-controlled toggle switches, electrically remote-controlled push button switches, electrically remote-controlled circuit breakers; electrical relays, electronic relays; electronic, mechanical switching relays as well as switching amplifiers; electronic, mechatronics-based overcurrent protection, namely, semiconductors, relays and circuit breakers; overcurrent circuit breakers; residual current circuit breakers; thermal, thermal-magnetic, magnetic and magnetichydraulic circuit breakers for equipment protection; electric circuit breakers and start-up switches with thermal and electromagnetic triggering; electrical and electronic circuit breakers for land vehicles, aircraft and watercraft; electrical and electronic circuit breakers for motor vehicles, airplanes and ships; motor protection circuit breakers; power circuit breakers; overcurrent protective switches; automatic protective switches; automatic switchboards; high-current switches; overvoltage power switches; temperature switches; electric flasher switches; remote power switches; power disconnectors, namely, electrical cut-out switches; circuit fuses for motor vehicles, telephone and telegraph systems; electrical, electronic and thermal locking and unlocking devices, namely, thermal circuit breakers; electrical apparatus and instruments and parts thereof, namely, electrical load protection devices for land vehicles, aircraft and watercraft; devices and systems for the distribution of electrical energy, namely, low voltage range electrical distribution boxes, power transformers, uninterruptible power supplies, electrical conductors for transformers, power distribution units; voltage regulators [electric]; BUS-controlled shipboard wiring systems, in particular consisting of (electric) circuit breakers, (electric) microcontrollers, modules for BUS-coupling; microcomputer controls; integrated circuits, integrated semiconductor circuits and thick film hybrid circuits; electrical and electronic monitoring equipment for monitoring electric current and voltage; current monitors; voltage monitors; flow measuring devices for gaseous, liquid and solid media, namely,

electrometers and multimeters; voltmeters [electric].

Services

Class 35

(1) Wholesale and retail services featuring scientific, nautical, surveying, photographic, cinematographic, optical, weighing, measuring, signalling, checking (supervision), life-saving and teaching apparatus and instruments, namely, intelligent bus systems based on Controller Area Network Technology and Multiplexing technique for the protection and control of electrical installations in recreational and work boats and vehicles, electrical protection devices, namely, thermal overcurrent circuit breakers, thermal magnetic overcurrent circuit breakers, magnetic overcurrent circuit breakers, hydraulic magnetic overcurrent circuit breakers, electronic overcurrent circuit breakers, hybrid overcurrent circuit breakers, mechanical and electronic protection relays, solid state remote power controllers (SSPPC), intelligent bus systems for the protection and control of electrical installations, for electrically measurable physical dimensions like current, voltage, temperature, frequency, pressure, resistance, power, energy and electrical protection relays and switchgears for the measurement and control of current, voltage, temperature, frequency, pressure, resistance, power, and energy, apparatus and instruments for conducting, switching, transforming, accumulating, regulating or controlling electricity, namely, electrical power distribution and control units, circuits, generators, microcircuits, circuit boards, circuit breakers, miniature circuit breakers (MCBs), residual current circuit breakers (RCDs), residual current operated circuit breakers with overcurrent protection (RCBOs), moldedcase circuit breakers (MCCBs), remote-controlled circuit breakers, arc fault detection and protection devices for AC and DC distribution and generation networks, namely, arc fault circuit breakers (AFCBs), and arc fault circuit interrupters (AFCIs), arc fault monitors (AFMs), arc fault sensors and arc fault detection algorithms for installation in conventional and renewable energy grids operated by AC or DC including smart grid applications, compact discs, DVDs, cash registers, data processing equipment, namely, circuit boards, computers, computer software, fire-extinguishing apparatus, electrical and electronic apparatus and instruments and parts thereof, in particular circuit breakers for equipment protection, flow-rate meters and current monitors, sensors, namely, current sensors, voltage sensors, temperature sensors, frequency sensors, pressure sensors, resistance sensors, power sensors, and electrical energy measurement sensors, electrical and electronic switching, protecting, controlling and measuring devices, namely, circuit breakers, cut-off switches, disconnectors, voltage surge protectors, electrical controllers, semiconductor switches, relays, load controllers, overcurrent protection devices, smart power distribution units, power distribution systems including a printed circuit board and a housing, measuring devices for load current, voltage, total current and the status of outputs, input/output modules, field bus connections, electric cut-off switches, disconnectors in the nature of cut-out switches, electric control panels, ohmmeters, electric microcontrollers, modules for BUS-coupling, electrically remote-controlled operated switching devices, namely, electrically remote-controlled automatically operated switches, electrically remote-controlled manually operated switches, electrically remote-controlled power switches, electrically remote-controlled rocker switches, electrically remote-controlled toggle switches, electrically remote-controlled push button switches, electrically remote-controlled circuit breakers, electrical relays, electronic relays, mechanical switching relays as well as switching amplifiers, electronic and mechatronics-based overcurrent protection, overcurrent circuit breakers, residual current circuit breakers, thermal, thermal-magnetic, magnetic and magnetic-hydraulic circuit breakers for equipment protection, electric circuit breakers and start-up switches with thermal and electromagnetic triggering, electrical and electronic circuit breakers for land vehicles, aircraft and watercraft, electrical and electronic circuit breakers for motor vehicles, airplanes and ships, motor protection circuit breakers, power circuit breakers, overcurrent switches, automatic

protective switches, automatic switchboards, high-current switches, overvoltage switches, temperature switches, electric flasher switches, remote power switches, power disconnectors, namely, electrical cut-out switches circuit fuses for motor vehicles, telephone and telegraph systems, electrical, electronic and thermal locking and unlocking devices, namely, thermal circuit breakers, electrical apparatus and instruments and parts thereof as protection devices and locking devices for land vehicles, aircraft and watercraft, devices and systems consisting thereof for the distribution of electrical energy, in particular in the low voltage range, voltage regulators [electric], BUS-controlled shipboard wiring systems, in particular consisting of (electric) circuit breakers, (electric) microcontrollers, modules for BUS-coupling, microcomputer controls, integrated circuits, integrated semiconductor circuits and thick film hybrid circuits, electrical and electronic monitoring equipment, current monitors, voltage monitors, flow measuring devices for gaseous, liquid and solid media, voltmeters [electric].

Class 37

(2) Installation, assembly, repair and maintenance of electrical and electronic switching, protecting, controlling, locking and unlocking devices namely, cut-off switches, disconnectors, voltage surge protectors, electrically remote-controlled automatically operated switches, electrically remote-controlled manually operated switches, electrically remote-controlled rocker switches, electrically remote-controlled toggle switches, electrically remote-controlled push button switches, electrically remote-controlled circuit breakers, electrical controllers, semiconductor switches, relays, circuit breakers, load controllers, overcurrent protection devices, smart power distribution units, power distribution systems including a printed circuit board and a housing, measuring devices for load current, voltage, total current and the status of outputs, input/output modules, field bus connections, electric cut-off switches, disconnectors in the nature of cut-out switches, voltage surge protectors, electric control panels, ohmmeters, electric microcontrollers, modules for BUS-coupling, and locking devices for land vehicles, aircraft and watercraft, as well as flow measuring devices.

Class 42

(3) Development of electronic control programs as well as programming of electronic control devices for scientific, nautical, surveying, photographic, cinematographic, optical, weighing, measuring, signalling, checking (supervision), life-saving and teaching apparatus and Instruments, namely, intelligent bus systems based on Controller Area Network Technology and Multiplexing technique for the protection and control of electrical installations in recreational and work boats and vehicles, electrical protection devices, namely, thermal overcurrent circuit breakers, thermal magnetic overcurrent circuit breakers, magnetic overcurrent circuit breakers, hydraulic magnetic overcurrent circuit breakers, electronic overcurrent circuit breakers, hybrid overcurrent circuit breakers, mechanical and electronic protection relays, solid state remote power controllers (SSPPC), intelligent bus systems for the protection and control of electrical installations, for electrically measurable physical dimensions like current, voltage, temperature, frequency, pressure, resistance, power, energy and electrical protection relays and switchgears for the measurement and control of current, voltage, temperature, frequency, pressure, resistance, power, and energy, apparatus and instruments for conducting, switching, transforming, accumulating, regulating or controlling electricity, namely, electrical power distribution and control units, circuits, generators, microcircuits, circuit boards, circuit breakers, miniature circuit breakers (MCBs), residual current circuit breakers (RCDs), residual current operated circuit breakers with overcurrent protection (RCBOs), molded-case circuit breakers (MCCBs), remote-controlled circuit breakers, arc fault detection and protection devices for AC and DC distribution and generation networks, namely, arc fault circuit breakers (AFCBs), and arc fault circuit interrupters (AFCIs), arc fault monitors (AFMs), arc fault sensors and arc fault detection algorithms for installation in conventional

and renewable energy grids operated by AC or DC including smart grid applications, compact discs, DVDs, cash registers, data processing equipment namely, circuit boards, computers, computer software, fireextinguishing apparatus, electrical and electronic apparatus and instruments and parts thereof, in particular circuit breakers for equipment protection, flow-rate meters and current monitors, sensors, namely current sensors, voltage sensors, temperature sensors, frequency sensors, pressure sensors, resistance sensors, power sensors, and electrical energy measurement sensors, electrical and electronic switching, protecting, controlling and measuring devices, namely circuit breakers, cut-off switches, disconnectors, voltage surge protectors, electrical controllers, semiconductor switches, relays, load controllers, overcurrent protection devices, smart power distribution units, power distribution systems including a printed circuit board and a housing, measuring devices for load current, voltage, total current and the status of outputs, input/output modules, field bus connections, electric cut-off switches, disconnectors in the nature of cut-out switches, electric control panels, ohmmeters, electric microcontrollers, modules for BUS-coupling, electrically remotecontrolled operated switching devices, namely, electrically remote-controlled automatically operated switches, electrically remote-controlled manually operated switches, electrically remote-controlled power switches, electrically remote-controlled rocker switches, electrically remote-controlled toggle switches, electrically remote-controlled push button switches, electrically remote-controlled circuit breakers, electrical relays, electronic relays, mechanical switching relays as well as switching amplifiers, electronic and mechatronics-based overcurrent protection, overcurrent circuit breakers, residual current circuit breakers, thermal, thermal-magnetic, magnetic and magnetic-hydraulic circuit breakers for equipment protection, electric circuit breakers and start-up switches with thermal and electromagnetic triggering, electrical and electronic circuit breakers for land vehicles, aircraft and watercraft, electrical and electronic circuit breakers for motor vehicles, airplanes and ships, motor protection circuit breakers, power circuit breakers, overcurrent switches, automatic protective switches, automatic switchboards, high-current switches, overvoltage switches, temperature switches, electric flasher switches, remote power switches, power disconnectors, namely electrical cut-out switches circuit fuses for motor vehicles, telephone and telegraph systems, electrical, electronic and thermal locking and unlocking devices, namely thermal circuit breakers, electrical apparatus and instruments and parts thereof as protection devices and locking devices for land vehicles, aircraft and watercraft, devices and systems consisting thereof for the distribution of electrical energy, in particular in the low voltage range, voltage regulators [electric], BUS-controlled shipboard wiring systems, in particular consisting of (electric) circuit breakers, (electric) microcontrollers, modules for BUS-coupling, microcomputer controls, integrated circuits, integrated semiconductor circuits and thick film hybrid circuits, electrical and electronic monitoring equipment, current monitors, voltage monitors, flow measuring devices for gaseous, liquid and solid media, voltmeters [electric]; technical advice and project planning relating to scientific, nautical, surveying, photographic, cinematographic, optical, weighing, measuring, signalling, checking (supervision), life-saving and teaching apparatus and Instruments, namely, intelligent bus systems based on Controller Area Network Technology and Multiplexing technique for the protection and control of electrical installations in recreational and work boats and vehicles, electrical protection devices, namely, thermal overcurrent circuit breakers, thermal magnetic overcurrent circuit breakers, magnetic overcurrent circuit breakers, hydraulic magnetic overcurrent circuit breakers, electronic overcurrent circuit breakers, hybrid overcurrent circuit breakers, mechanical and electronic protection relays, solid state remote power controllers (SSPPC), intelligent bus systems for the protection and control of electrical installations, for electrically measurable physical dimensions like current, voltage, temperature, frequency, pressure, resistance, power, energy and electrical protection relays and switchgears for the measurement and control of current, voltage, temperature, frequency, pressure, resistance, power, and energy, apparatus and instruments for

conducting, switching, transforming, accumulating, regulating or controlling electricity, namely, electrical power distribution and control units, circuits, generators, microcircuits, circuit boards, circuit breakers, miniature circuit breakers (MCBs), residual current circuit breakers (RCDs), residual current operated circuit breakers with overcurrent protection (RCBOs), molded-case circuit breakers (MCCBs), remote-controlled circuit breakers, arc fault detection and protection devices for AC and DC distribution and generation networks, namely, arc fault circuit breakers (AFCBs), and arc fault circuit interrupters (AFCIs), arc fault monitors (AFMs), arc fault sensors and arc fault detection algorithms for installation in conventional and renewable energy grids operated by AC or DC including smart grid applications, compact discs, DVDs, cash registers, data processing equipment namely, circuit boards, computers, computer software, fireextinguishing apparatus, electrical and electronic apparatus and instruments and parts thereof, in particular circuit breakers for equipment protection, flow-rate meters and current monitors, sensors, namely current sensors, voltage sensors, temperature sensors, frequency sensors, pressure sensors, resistance sensors, power sensors, and electrical energy measurement sensors, electrical and electronic switching, protecting, controlling and measuring devices, namely circuit breakers, cut-off switches, disconnectors, voltage surge protectors, electrical controllers, semiconductor switches, relays, load controllers, overcurrent protection devices, smart power distribution units, power distribution systems including a printed circuit board and a housing, measuring devices for load current, voltage, total current and the status of outputs, input/output modules, field bus connections, electric cut-off switches, disconnectors in the nature of cut-out switches, electric control panels, ohmmeters, electric microcontrollers, modules for BUS-coupling, electrically remotecontrolled operated switching devices, namely, electrically remote-controlled automatically operated switches, electrically remote-controlled manually operated switches, electrically remote-controlled power switches, electrically remote-controlled rocker switches, electrically remote-controlled toggle switches, electrically remote-controlled push button switches, electrically remote-controlled circuit breakers, electrical relays, electronic relays, mechanical switching relays as well as switching amplifiers, electronic and mechatronics-based overcurrent protection, overcurrent circuit breakers, residual current circuit breakers, thermal, thermal-magnetic, magnetic and magnetic-hydraulic circuit breakers for equipment protection, electric circuit breakers and start-up switches with thermal and electromagnetic triggering, electrical and electronic circuit breakers for land vehicles, aircraft and watercraft, electrical and electronic circuit breakers for motor vehicles, airplanes and ships, motor protection circuit breakers, power circuit breakers, overcurrent switches, automatic protective switches, automatic switchboards, high-current switches, overvoltage switches, temperature switches, electric flasher switches, remote power switches, power disconnectors, namely electrical cut-out switches circuit fuses for motor vehicles, telephone and telegraph systems, electrical, electronic and thermal locking and unlocking devices, namely thermal circuit breakers, electrical apparatus and instruments and parts thereof as protection devices and locking devices for land vehicles, aircraft and watercraft, devices and systems consisting thereof for the distribution of electrical energy, in particular in the low voltage range, voltage regulators [electric], BUS-controlled shipboard wiring systems, in particular consisting of (electric) circuit breakers, (electric) microcontrollers, modules for BUS-coupling, microcomputer controls, integrated circuits, integrated semiconductor circuits and thick film hybrid circuits, electrical and electronic monitoring equipment, current monitors, voltage monitors, flow measuring devices for gaseous, liquid and solid media, voltmeters [electric].

Colour Claim

Colour is claimed as a feature of the trademark. The mark consists of a circular border of three concentric yellow circles appearing on a black square background. The innermost border comprises a dotted line, the second border comprises a thick band, and the outermost border is a thin line. Two dashed yellow lines extend upward from the bottom left and bottom right of the outermost circle ending in triangles at the top of each of the lines. The background inside the circle is variably shaded in brown. A stylized green ribbon outlined in yellow is overlaid on the bottom portion of the concentric circles with a yellow dotted line directly above. Centered within the ribbon is the stylized wording "MOUSSY" appearing in yellow. Inside the concentric circles and above the ribbon are two stylized yellow lions, partially shaded black. The lions appear on their hind legs facing each other with a red stylized letter "M" centered between the lions. Directly below the lions and above the ribbon is the yellow stylized wording "LIGHT MULTI BEVERAGE" stacked above the yellow stylized wording "ALCOHOLIC" appearing centered over the yellow stylized wording "BREW". An elongated yellow triangle appears to the left and right of the wording "BREW".
