Trademarks Journal

Vol. 70 No. 3594

General Information

The *Trademarks Journal* (the “*Journal*”) is published on the website of the Canadian Intellectual Property Office (<http://cipo.gc.ca>). The *Journal* lists trademark applications advertised under subsection 37(1) of the *Trademarks Act* (the “*Act*”), public notices of prohibited marks under section 9 of the *Act*, statements of the Minister in respect of geographical indications under subsection 11.12(2) of the *Act*, as well as erratums to previous volumes.

Electronic *Trademarks Journal*

The *Journal* is available in PDF format and can be downloaded free of charge and viewed and printed with Adobe Acrobat Reader. The *Journal* is also available in a printable HTML format as an alternate official version that contains a search function to narrow and customize the content. The electronic form of the *Journal* is the official version.

Official Languages

The *Journal* is available in English and French. The details displayed for each application are based on the language of the application. If the language of the application is English, the goods, services, or other text and description appearing in the English version of the *Journal* are in the language filed by the applicant. If the language of the application is French, the goods, services, or other text and description appearing in the English version of the *Journal* have been translated. Any registration resulting from the application will be restricted to these goods or services as described in the language of the application.

Filing Dates

The filing date of each trademark application (including those to extend the statement of goods or services of an existing registration) is shown in the YYYY-MM-DD format.

Nice Classification

Where applicable and required, the *Journal* lists the goods or services of each application grouped according to the classes of the Nice Classification, each group being preceded by the number of the class of the Nice Classification to which that group of goods or services belongs and presented in the order of the classes of the Nice Classification.

Opposition

Any person who has a valid ground of opposition (see section 38 of the *Act* for the grounds of opposition) to any application for registration of a trademark or to any application for registration of a trademark extending the statement of goods or services advertised in this *Journal* may file a statement of opposition with the Registrar of Trademarks within two months from the date of issue of this publication. The prescribed fee must accompany the statement of opposition.

Class 01

(1) Chemicals used in industry, namely, corrosion inhibitors for lubricants, incrustation inhibitors for lubricants, emulsion breakers in the nature of oil-separating chemicals, paraffin regulators for use in metalworking, sulfuric acid, ethylene, sodium hydroxide, propylene, nitrogen, chemical preservatives for metals, Chemical preparations for facilitating the alloying of metals, additives (chemical -) for use in the moulding of metals, Chemicals for neutralizing stainless alloys of steel, iron and metals of various colors; bauxite; alumina; preparations for cleaning and treatment of metal surfaces, namely, substances (Chemical -) for cleaning metals, Liquid cleaning compositions used in manufacturing processes, Solvents for industrial cleaning during manufacturing operations, Detergents for cleaning use [part of manufacturing operations], Chemical cleaning agents for use in industrial processes, Chemicals for use in metal treatment

Class 06

(2) Common metals and their alloys; semi-finished products of common metals and their alloys, namely, semi-processed common metals, not specified for use, semi-finished profiled metal sections for building; moulded metal, namely, containers of metal for storage, transport and

packaging; extruded metal, namely, clips of metal for tubes, connectors of metal for tubes, masts of metal, metal masts, other than aerials or for watercraft, ducts and pipes of metal for central heating installations, Ducts of metal for ventilating and air conditioning installations, air conditioning ducts, ventilating ducts of metal, metal roof vents, Metal components for doors, Aluminium doors, metal doors, Sash fasteners of metal for windows, Lead strips in the nature of metal fittings for use on windows, Cremona casement bolts of metal for windows, Roof windows of metal, Armoured windows having metal frames, Handles of metal for windows, Roof lights [windows] of metal, External metal shutters for windows, Windows (Fittings of metal for -), Casement windows of metal, Wall windows of metal, Aluminium windows, of metal, ceiling linings of metal for building, Hinges for doors and windows (Metal -), Ventilation grilles of metal for fitting in doors, Doors of metal for indoor use, Safety fittings of metal for doors, Frames of metal for doors, Metal runners for sliding doors, Metallic frames for sliding doors, Doors, gates, windows and window shutters of metal, aluminum residential doors; rolled metal, namely, metal I-beams, angle irons of metal, metal channels for use in manufacture, metal bars for use in manufacture, and metal railings; ingots, metal bars for use in manufacture, metal billets and rods of metal for brazing and welding; wire of metal; sheet metal; plates of metal; lithographic printing plates, namely, nameplates of common metal, doorplates of metal, Key hole plates of common metal, Custom plates of metal for vehicles, Signs plates of metal, Cover plates of metal; aluminium foil; metal foil; metal packaging material; strip metal; metal bands; profiles, poles, pipes, rods and tubes of metal; non-electric cables and wires of common metal; aluminum wire; ironmongery, namely, ironmongery of metal for building, small items of metal hardware, namely metal fittings for building; fittings of composite metal material for building; locks, elbows, joints, brackets and couplings of metal for use with metal pipes and tubes; ducts made wholly or principally of metal for trunking pipes or conduits for gases and liquids; metal building materials, namely, metal structural beams, transportable buildings of metal, namely, metal sheds, heat insulated metal facade panels for construction purposes, cladding of metal for building, wall claddings of metal for building, dividing wall panels of metal, panels of metal for sidewalls of buildings, panels of metal for doors, building panels of metal, Spandrel panels of metal for building, fence panels of metal, Metal roofing panels, cable junction sleeves of metal, ceiling supports of metal, Ceilings of metal, Metal coverings for ceilings, aluminium windows, doors of metal; roofing panels, window frames and window cases of metal; panels of metal for buildings; eaves gutters of metal, armor-plating of metal and skirting boards of metal for building; metal doors, windows and blinds and parts thereof; metal tubes, safes and boxes; materials of metal for railway tracks, namely, railway material of metal, Turntables railways], Loading gauge rods of metal for railway wagons, materials of metal for funicular railway permanent ways, Guard rails of metal for railways; metal masts for power cables; casting moulds and chills, namely, Ingot moulds of metal for castings, Metal moulds for casting aluminum; ores

Class 07

(3) Machine tools, namely, metal working machine tools, metalworking machine tools for parting, Machine tools for cutting, machine tools for metal rolling, milling machines and milling cutters machine tools for treatment of metal and for metal manufacturing; equipment for metal casting, namely, casting ingot machines, aluminum slab casting machines, casting billet machines, low pressure billet casting machines, casting cylinder machines, casting moulds of metal [parts of machines], Continuous metal casting machines; direct-chill (DC) equipment for extrusion and sheet ingot casting, namely, welding machines, soldering machines, material handling buckets, materials handling elevators, extrusion moulding machines, Metal extrusion presses and machines, metal cutting tools, machinery for shaping metal, sheet metal flattening machines, press dies for metal forming; control mechanisms, namely, control valves for regulating the flow of gases and liquids, controlled volume pumps, pressure controllers being parts of machines, namely,

valves, pump control valves, thermostatic control valves for machines; equipment for refining and treatment of metal melts, namely, furnace loading machines, furnace induction machines, metal melting machines, rotary furnace machines, all the aforesaid goods for use in the field of metalworking; equipment for cleaning metal melts, namely, degassing equipment (MDU), metal Treatment Station equipment, fluxing equipment for drossing, cleaning and covering aluminum metal and their alloys, all the aforesaid goods for use in the field of metalworking; equipment for transfer and distribution of liquid metal, namely, die-casting machines, heat transfer machines, aluminium tapping vehicle; equipment for handling metal ingots, namely, handling and processing equipment for burring, deburring, removal and linear feeding of ingots

Class 09

(4) Apparatus and instruments for conducting, switching, transforming, accumulating, regulating or controlling electricity, namely, electricity conduits; electricity indicators; electricity meters; regulating apparatus, electric, namely voltage regulators; electricity storage apparatus, namely dry cells, supercapacitors for energy storage, ultracapacitors for energy storage, electric storage batteries; inductors [electricity]; transformers [electricity]; inverters [electricity], namely power inverters, inverters for power supply, AC/DC inverters; connectors [electricity]; rectifiers [electricity]; rotation controlling sensors in the nature of motion sensors, sensors for engines, sensors used in plant control; fuel regulating apparatus, namely power controllers for fuel cells; power regulating apparatus, namely electric power distribution units, electric power converters, electronic power transformers; heat regulators; electric current switches for fuel cells; wire connectors [electricity]; electricity distribution consoles; control panels [electricity], namely power distribution panels; distribution boxes [electricity], namely electrical distribution boxes; measuring, detecting, monitoring and controlling devices, namely meters for measuring electric current, heat detectors, voltage detectors, direct electrical current monitoring modules, voltage monitoring units, electric control panels; anti interference devices [electricity], namely filters for radio interference suppression; photovoltaic apparatus for generating electricity, solar cells for electricity generation, solar panels for the production of electricity, solar energy collectors for electricity generation; apparatus for measuring, monitoring and analyzing electricity consumption, namely ampere-hour meters, bidirectional meters for electricity monitoring, current meters; photovoltaic installations for generating electricity [photovoltaic power plants]; switching power supply apparatus, namely current switches, power switches; low voltage converter and low voltage circuit breakers for improving power efficiency, solar battery chargers, automotive battery chargers, battery booster cables, battery separators, battery terminals, battery boxes, automotive battery packs, battery jars, cable adapters for batteries, uninterruptible power supply apparatus [battery]; apparatus and instruments for research, namely, surveying instruments; apparatus for the transmission of data, namely data transmission cables, satellite transmitters, video transmitters; apparatus for the reproduction of data, namely radio transmitters, satellite transmitters, video transmitters, audio transmitter units; tool measuring instruments, namely calipers, micrometers, angle gauges; material testing instruments, namely metal strength testing machines; apparatus for monitoring electrical energy consumption, namely direct electrical current monitoring modules; sensors, detectors and monitoring instruments, namely optical sensors, position sensors, photoelectric sensors, thermal sensors, motion detectors, radar detectors; measuring apparatus, namely clamp meters for measuring electricity, measuring rods, measuring wheels, measuring transducers; calibrating apparatus, namely calibrated glassware, graduation checkers for calibration purposes; laboratory instruments, other than for medical use, namely laboratory centrifuges, laboratory ovens, aspirators for laboratory use, laboratory instruments for testing metals, laboratory instruments for temperature control, laboratory instruments for diagnosis [for scientific use], ovens for laboratory experiments, vibrating separators [laboratory apparatus], gas mixers for laboratory

use], electrolysis apparatus for laboratory use; precision measuring apparatus, namely dial gauges, vacuum gauges, flow gauges, volumetric measuring apparatus, ultrasonic measuring apparatus, apparatus for measuring, monitoring and analyzing electricity consumption; cathodic protection apparatus, namely anodes, cathodes, current testers; wind measurement apparatus, namely wind pressure gauges, wind-direction indicators, windsocks, vibration sensors for installation in windmill housings; automatic control apparatus, namely automatic electronic control valves for regulating the flow of gases and liquids; cathodic anti-corrosion ray tubes; temperature controlling apparatus for machines, namely thermostats; safety apparatus, for the prevention of accident or injury, namely safety signals, luminous or mechanical, safety markers, safety clothing for protection against accident or injury, luminous safety beacons, flashing safety lights; photovoltaic panels for converting solar radiation to electrical energy; sensors [measurement apparatus], other than for medical use, namely acceleration sensors, automatic solar tracking sensors, oxygen sensors, not for medical use, pollutant sensors; electrolyzers, namely, hydrogen electrolyzers, water electrolyzers, electrolytic cells; batteries and battery electrodes, namely, PH fuel cell electrodes, Graphite electrodes, Fuel cell electrodes, rechargeable electric storage battery, electric storage battery, lithium secondary battery cell; semi-finished products and components for batteries and battery electrodes, namely, battery cells, battery cathodes, battery anodes, fuel cell electrodes, PH fuel cell electrodes, Graphite electrodes; solar battery chargers, Battery charging devices for motor vehicles, Battery booster cables, Battery separators, Battery terminals, Battery boxes, solar battery packs, Battery jars, cable adapters for batteries; foil for batteries, namely, lithium-ion battery aluminum foil; photovoltaic cells; solar cells; solar batteries; battery management systems, namely, downloadable software and downloadable software applications for managing battery recycling plant operations, managing sale and supply of batteries, namely, managing sale and inventory of electrical vehicle batteries, electric storage battery lifecycle management; electrical cables; electrical connections adaptors, distribution boxes, connectors for electrical cables; electrical ducts of metal, Electricity conduits, ducts for housing electrical wires

Class 11

(5) Apparatus and installations for heating, steam generating, refrigerating, drying, ventilating, cooling, heat transfer, heat exchange, air humidification and air conditioning, namely heating apparatus for the use in treatment of metal, radiators [heating], coils for heating, central heating boilers, electrical heating elements, tubular heating elements, solar thermal heating collectors, HVAC systems [heating, ventilation and air conditioning systems; semi-finished products and spare parts for apparatus and installations for heating, steam generating, refrigerating, drying, ventilating, cooling, heat transfer, heat exchange, air humidification and air conditioning, namely dosing valves being parts of heating or gas installations, heat regulators being parts of heating installations, specially adapted parts for industrial furnaces, thermostatic valves as parts of heating installations; tubing for heat exchange, namely, heat pumps and air conditioning units for vehicles, buildings and houses; refrigerators for trucks, trailers and containers; refrigerating apparatus and machines, namely freezers, ice machines, electric space heaters, heaters for vehicles, air conditioners and defrosters for vehicles, heaters for baths, electric laundry dryers, hot water heaters; heat exchangers (parts of machines)

Class 12

(6) Vehicle bodies; vehicle chassis and structural elements; accessories for vehicles, namely, frames for vehicle luggage carriers; spoilers for automotive vehicles; steering racks for automobiles, body panels for vehicles; vinyl soft tops for vehicles; roof boxes for vehicles; roof panels for land vehicles, spoilers for land vehicles, bicycle racks for vehicles, radiator grills of metal for vehicles, fuel tanks for vehicles, trailer hitches for vehicles; radiator grills of metal for vehicles;

bumper guards of metal for vehicles; roof racks of metal for vehicles; trims, grilles and spoilers for styling, namely interior trim for automobiles, interior trim parts for automobiles, front grills for automobiles, spoilers for vehicles; spikes for tires

Services

Class 40

(1) Treatment of metal, namely heat treatment of metals, heat treatment of metal surfaces, heat treatment of pipes and tubes made of metal, treatment of metal parts to prevent corrosion using hot-dip galvanizing and powder coating processes; metal casting; sorting of waste and recyclable material [transformation]; recycling of aluminium capsules; recycling of aluminium packaging; recycling of batteries; recycling of car batteries; recycling of chemicals; recycling of electrical circuits; recycling of electrical components; recycling of electric batteries; recycling of hazardous liquids; recycling of metal services; energy and electrical power production

Class 42

(2) Chemical engineering; mechanical engineering, computer hardware engineering, computer software engineering, computer integrated manufacturing (CIM) engineering; electrical engineering; conducting engineering feasibility studies; conducting feasibility studies; technical project studies in the field of chemical engineering, mechanical engineering, computer hardware engineering, computer software engineering, and electrical engineering; engineering project surveys in the nature of technical project planning, engineering project studies, conducting technical project studies; environmental engineering services; plant engineering services, namely technical consultation in the field of power plant engineering, technical consultation in the field of metal plant engineering, design of industrial plant, inspection of plant and machinery; construction project engineering; consultancy in civil engineering drawing, construction engineering services [technical project studies in the field of construction]; engineering project management services in the field of mining industry; design consultancy in the field of chemical engineering, mechanical engineering, computer hardware engineering, computer software engineering, and electrical engineering; product development services in the field of engineering, industrial design in the field of engineering, testing services in the field of chemical engineering, mechanical engineering, computer hardware engineering, computer software engineering, and electrical engineering; product development consultancy for inventors in the field of materials engineering; product development consultancy for inventors in the field of mechanical engineering; product development consultation for inventors in the field of chemical engineering; product development consultation for inventors in the field of engineering; product development consultation for inventors in the field of mechanical engineering; product development consultation for inventors in the field of polymer engineering; research and development services in the field of engineering; Analysis and testing services for the metal industry, namely metallurgical analysis, metallurgical testing; analysis and testing consulting services in the field of renewable energy; consulting services in the field of renewable energy; electrical engineering analysis and testing services for the battery industry; laboratory research in the field of metallurgy; research services in the field of geothermal energy, hydroelectric energy, solar thermal energy, wind energy; electrical engineering research services for the battery industry; design and development of software; technical consultancy in the field of metallurgical analysis, metallurgical testing, renewable energy supply and generation, electrical storage batteries, stationary batteries, and fast-charging batteries; environmental advisory in the field of energy saving; industrial design; construction drafting; research in the field of environmental protection; material testing; mechanical engineering research in the field of the metal industry; mechanical engineering research in the field of the renewable energy industry; mechanical engineering research in the field of the battery industry; technical

project studies in the field of metallurgy, technical project studies in the field of renewable energy; technical project studies in the field of battery recycling; quality evaluation of common metal and extruded profiles made of metal; quality control consultancy, namely providing quality control consultancy for metal and energy industry; quality control services, namely quality control testing services for industrial machinery; quality control services for certifying product quality, namely providing certification of quality assurance in the construction industry; quality control testing of products, namely quality control testing of anti-corrosion materials; quality control testing of anti-corrosion materials; quality control testing of incombustible materials; quality control testing of non-combustible materials; quality control testing of refractory materials; quality control testing of resistant materials, namely quality control testing of non-combustible materials; quality control testing services for industrial machinery; traceability of goods for quality control purposes, namely inspection services in the field of quality control of automobile parts

(1) Electric traction, signalling, protection, traffic management, control and safety, monitoring, control, passenger information, life-saving, teaching, conducting and checking apparatus and instruments, namely electrical sensors, electrical circuits, electrical switches, electromechanical controls, electrical inverters, electrical controls, programmable electronic controls, digital process controllers, temperature controllers and indicators, transceivers, luminous and mechanical signalling panels in the fields of railways, roads and the transport of passengers and goods; apparatus for checking motors and engines as well as electrical, electronic and computer equipment, namely computer hardware; scientific apparatus and instruments for switching, transforming, accumulating, regulating, controlling electricity and measuring temperature, namely electromechanical control panels, semiconductors, voltage monitors for measuring and checking the parameters of electrical fields, calorimeters, thermostats, thermocouples, bolometers and pyrometers, digital indicators, faulty circuit indicators, temperature indicators for industrial use, measuring transducers, electro-optic transducers, and temperature monitors for industrial use and computer monitors used in analysis, communications and control systems for electrical networks, power plants and electrical equipment, all these goods being intended for fixed installations, track, road and on-board installations, rolling stock for railways, high-speed and very high-speed railway vehicles, railway trains with or without a motor car, articulated and non-articulated railway trains, electric vehicles and autonomous vehicles, namely streetcars, buses, railcars, trains, locomotives, tank cars, road tankers, motor cars, subway trains, monorails, shuttles, motor coaches; optical equipment in trains, streetcars, subways, station platforms and across the entire railway and road network, namely laser distance sensors and surveillance cameras for detecting the presence and speed of railway vehicles, for identifying lost items on transport lines and routes, checking the

condition of railway and road vehicles, calculating the number of passengers getting on and off of trains and subways, calculating the number of passengers present on the station platforms and on the sidewalks along the tracks, tracking and anticipating the passenger traffic, for recognizing and monitoring individuals behaving suspiciously, detecting intrusions in tunnels, identifying irregular sounds, such as gunshots, explosions and glass breakage, on the railway and road network; electronic and electric equipment for processing satellite positioning data, namely computers, computer hardware, modems, handheld smart phones, satellite geolocation receivers [GPS], radios; electronic and electrical apparatus for monitoring railway and road traffic, namely computer hardware, position sensors and surveillance cameras; equipment for controlling the management of road and railway transport lines, namely downloadable software and computer hardware; electrodynamic apparatus for the remote control of switch rails; alarm systems and devices, namely order transmitters intruder alarms, electronic alarms for indicating danger as well as accidents and incidents detected on the railway and road network, security alarms for commercial and industrial use and fire alarms, audible warning devices, namely alarm horns and sirens in the fields of railways, roads and the transport of passengers and goods; fire-extinguishing apparatus; apparatus and equipment for the transmission of alert data, namely computers, network routers, wireless routers, LTE routers, DSL routers, fibre optic routers, modems, smart terminals, terminals for radio telephones, electronic components, namely printed circuits, electrical conductors used in the generation, transport, distribution and use of electrical energy, namely electrical wires, coaxial cables, data cables, electrical cables, fibre optic cables, semiconductors for rolling stock for railways, high-speed and very high-speed railway vehicles, railway trains with distributed and concentrated power, railway trains with or without a motor car, articulated and non-articulated railway trains, for streetcars, buses, electric vehicles and autonomous vehicles, for stations and substations; electric current collectors in the railway field; electric and electronic installations for the remote control of rail and road operations; electric control panels; computerized switchboards for rail and road operations; electrical switching apparatus, namely contactors, disconnectors, high-speed circuit breakers (direct current), single-phase vacuum circuit breakers, three-phase vacuum contactors, brake switches, railway switches, steering switches for railway vehicles; electric batteries for railway and road vehicles; electric chargers for railway and road vehicles; electric accumulators and batteries, namely fuel cells, hydrogen fuel cells, galvanic batteries, hydroelectric cells, dry cells, solar cells, rechargeable lithium cells, lithium-ion cells, nickel-cadmium batteries and nickel-metal hydride batteries; electricity conduits; speed control apparatus for railway vehicles, namely analogue and digital beacons installed at track level that transmit data related to the track and the condition of the signage at ground level, namely speed limit, track inclination and distance to next signal; optical and magnetic data carriers, namely blank and recordable CDs and DVDs, magnetic tape recorders, hard drives; electric and electronic relays; speed indicators; signalling apparatus and instruments, namely mechanical, digital, electronic and neon signs, signal lights, emergency warning lights, warning triangles, luminous or mechanical safety signals, rotating signalling lights for road and railway use; luminous and mechanical signalling panels; luminous road signs; electrodynamic apparatus for the remote control of digital, analogue and power signals in the fields of roads and railways; electronic signal transmitters, namely FM transmitters, radio frequency transmitters and transmitters for global positioning systems; electronic notice boards; electric warning bells; navigation and radio guidance apparatus for railway and road vehicles, namely on-board computers, navigation computers for railway and road vehicles; information processing apparatus in the field of railway and road transport, namely computer hardware; recorders and apparatus for measuring distances for railway and road vehicles and for recording time, namely odometers, taximeters; automatic piloting devices for vehicles, namely cameras, radars, sonars, global positioning system (GPS) consisting of computers, computer software, transmitters, receivers and network interface devices, speed regulators for railway and road

vehicles; voltage regulators for the control of electrical current, power and frequency for railway and road vehicles; downloadable and recorded software for analyzing and diagnosing the condition of railway infrastructure equipment, railway vehicles and parts therefor, namely bodies, wheels, brake pads, pantograph contact strips, doors, antennas and mountings; downloadable software embedded in signalling devices that enable the management, control and operation of railway and road signalling; downloadable software embedded in command and control devices for railway vehicles, streetcars, buses, electric vehicles and autonomous vehicles that enable planning, management and control of rail traffic and railway vehicles, for locating, supervising and circulating railway rolling stock on tracks, for securing railways; computer programs in the nature of guidance, itinerary search and mapping programs for road and railway traffic, mobile telecommunications terminals for railway and road vehicles; management software and computer hardware for analyzing and processing data collected by an analysis and diagnosis system in order to ensure the ongoing management of railway and road traffic as well as its ongoing and predictive maintenance and adaptation; management software and computer hardware for modelling and simulating railway and road equipment and for optimizing same; computer platforms in the form of software for modelling railroad lines in 3D, simulating railway rolling stock operation in virtual and augmented reality in the context of training, teaching simulation protocols for maintenance and security in the fields of railways, roads and the transport of passengers and or goods; satellite navigation apparatus, namely satellite geolocation receivers [GPS]; apparatus for disseminating, recording, transmitting, reproducing sound and images, on-board and not, in railway vehicles, buses, electric vehicles and autonomous vehicles, namely audio cassette recorders, video tape recorders, cassette recorders, event recorders for security use, phonographic record players, phonographs, compact disc players, audio amplifiers, aerial amplifiers, signal amplifiers, optical amplifiers, cathode ray tubes, video surveillance cameras, intercom audio recorders, speakers, microphones, transceivers, flat panel display screens, electronic touch screen displays, televisions; telecommunication apparatus and equipment for capturing, counting, collecting, storing, converting, processing, entering, emitting, transmitting data, information and signals, namely telephones, fax machines, televisions, transceivers, wireless radio transceivers, satellite transceivers, radio frequency modulators, radio receivers, telephone receivers, audiovisual receivers, satellite antennas, satellite dishes, microwave antennas, radar antennas, radio antennas, electronic waveguides, calculators, computers, cathode ray tubes, telephones, computer hardware, secure digital memory cards, RAM (random access memory) cards, integrated circuit memory cards, computer memory cards, modems, hard drives, USB keys, changeover switches for telecommunication apparatus, smart phones, radio transmission towers, fibre optic cables, computer network routers; transmitting and receiving apparatus for radio broadcasting, television broadcasting and teletransmission, namely video receivers, radio frequency receivers, global positioning system receivers, television receivers, optical transceivers, long range transceivers, Ethernet transceivers; satellite data transmitting and receiving apparatus, namely radars; radio frequency antennas, radar antennas, car and railway vehicles antennas, electric cables for data transmission; computer, telematic and telephone terminals for accessing global telecommunication (Internet-type) networks with open and restricted access, and accessing private telecommunication (intranet-type) networks with open and restricted access; video servers; downloadable software for streaming images, sounds, films, information, data in the fields of railways, roads and the transport of passengers and goods; devices and apparatus for telecommunications and the provision of information to passengers in stations, namely LED panels mounted above the screen doors along subway and train platforms that display a colour code representing the level of passenger occupancy in each section of the approaching train allowing a better distribution of passengers boarding the train, automatic and interactive machines for verifying and validating tickets, touch screen terminals installed in subway stations that display the

layout of the road transport network, indicate travel times to other points on the network, display in real time the position of trains on the line and the number of passengers on board, identify and display messages posted on social networks that concern the neighbourhood where the station is located, namely recreational areas, restaurants, bars and cafés, special events, touch screens on board in railway vehicles for the transmission and dissemination of travel information in real time, traffic reports, live news, weather information and geospecific data that may also be transmitted and disseminated directly on the personal devices of passengers using a Wi-Fi connection; smoke evacuation systems that can be activated manually and automatically, namely electrical controls for activating the ventilation, suction and redirection of smoke for outdoor discharge; fire detection systems, namely fire and smoke detectors and fire alarm systems; in-tunnel and in-station emergency radio telecommunication devices in the event of an emergency, namely radio transmitters and receivers, wireless headphones with built-in radio; digital and electronic equipment for the cyberprotection of railway systems, namely recorded software and computer hardware; multifunctional roof equipment for railway rolling stock, namely pantographs, auxiliary power converters that may be mounted under chassis and inside electric vehicles, buses, subway trains, regional trains, high-speed trains and locomotives; equipment for railway rolling stock that may be mounted on board and on the roofs of railway vehicles, namely computers, electronic tablets, control panels for railway vehicles and monitoring equipment, namely cameras, systems for audio detection, namely ultrasound sensors, microphones, security surveillance robots and sensors, namely movement, temperature, infrared, ultrasound, pressure, liquid and oil level, smoke, gas, touch and proximity sensors; equipment for railway rolling stock that may be mounted on board, on the roof and under the floor of railway vehicles, namely traction transformers; energy measurement systems, comprising measuring apparatus, namely wattmeters, fibre optic current sensors, electric current shunts, computer hardware and recorded software for measuring energy; electrical transformation substations, comprising high-voltage equipment, namely circuit breakers, disconnectors, lightning arresters, voltage regulators, for indoor and outdoor substations and armoured substations, medium- and low-voltage equipment, namely electrical distribution substations and electric voltage transformers, power switches, disconnectors, contactors, circuit breakers, fuses, reclosers of electrical circuits, electric power substations comprising equipment for voltage transformation and substation supervisors, namely computer hardware and recorded software for monitoring activity and transforming the voltage of substations; electric filters, rectifiers, inverters and converters; devices for electrical interference and surge protection; electrical substations consisting of transformers, converters and devices for protection against electrical interference, namely radio interference suppression filters for the recovery of electrical energy surplus generated on railway and road networks when vehicles brake; electric active filtering devices for substations, namely inductive low-pass filters used in electrical applications; electronic smart devices for checking, regulating and protecting traction substations remotely and autonomously in the fields of railways, roads and the transport of passengers and goods; downloadable and recorded computer software intended for electronic smart devices for performing checking, regulating and protecting traction substations remotely and autonomously in the fields of railways, roads and the transport of passengers and goods; equipment placed on and under railroads or roads for ground-level power supply and ground-level charging of passenger and freight transport vehicles, namely static ground-level charging stations being switching power supplies that connect automatically to the electric power grid, electrically conductive rail segments, electrical cables, railway and road signalling cables for radio signal transmission; catenary consoles; electronic and automated transit ticket purchasing terminals for passengers in the fields of railways and roads.

Class 12

(2) Land vehicles, namely buses and motor coaches, electric and non-electric rolling stock for railways, autonomous and non-autonomous, namely railcars, locomotives, tank cars, undercarriages for railway cars, freight trains, subway trains, railway trains with distributed and concentrated power with or without a motor car, articulated and non-articulated railway trains, streetcars, monorail cars, automatic shuttles, wagons, driving motor cars and high-speed and very high-speed railway vehicles; railway couplings; motors and engines for the aforementioned land vehicles, namely bus motors and engines, motor coach motors and engines, all-terrain vehicle motors and engines and their structural parts, namely pneumatic absorbers for the aforementioned land vehicles, power transmission belts and gears for the aforementioned land vehicles, driveshafts for the aforementioned land vehicles, air pumps (vehicle accessories); propulsion mechanisms, namely three-phase asynchronous alternating current (AC) traction motors and engines for the aforementioned land vehicles; brakes for land and rail vehicles, bogies, axles, car bodies; wagons; railway couplings; shock absorbers for railway and road vehicles; bogies for railway vehicles; motors and engines for railway rolling stock; railway rolling stock powered by electric batteries, fuel cells and hydrogen cells.

Services

Class 37

(1) Supervision and direction of construction work related to railway infrastructure, railways and road transport infrastructure; servicing, repair, renovation and maintenance of railway infrastructure equipment, road transport line infrastructure equipment, railways, railway vehicles and parts therefor, namely bodies, wheels, brake pads, pantograph contact strips, doors, antennas and mountings; installation of railways and road transport lines as well as equipment and structural elements therefor; information related to the construction and repair of railway, subway, streetcar, bus, electric vehicle and autonomous vehicle infrastructure; paving and construction services for tracks for railway vehicles; information services related to the repair of land vehicles and railway vehicles for the transport of passengers and goods, railway rolling stock, locomotives, wagons and self-propelled vehicles, high-speed and very high-speed railway vehicles, underground trains and sets of automatic and non-automatic vehicles for the transport of passengers, railway vehicles with iron wheels, vehicles guided with suspension systems, pneumatic and otherwise, railway couplings, railway infrastructure, coatings, rails and their parts; installation and repair of devices pertaining to a security and surveillance system for signalling any accidents and incidents that affect road and railway traffic; installation, servicing, repair and maintenance of equipment for controlling the management of road and railway transport lines; construction and installation of drainage systems for the pumping and flow of water; construction of works made of concrete, namely concrete mono-block ties, concrete poles, concrete slabs and concrete beams, and made of other materials, namely metal materials, composite materials, plastic materials, wood, comprising base plates and anchor points installed in the concrete and plastic materials for railway infrastructure; advice related to the construction of road and railway transport lines, works and infrastructure in the fields of railways, roads and the public transport of passengers and goods.

Class 42

(2) Scientific and technological services, namely scientific research and development of products and works in the field of railways and road transport lines; coordination of scientific research and development of products and works in the fields of railways and road transport lines; construction project planning related to road and railway transport lines, works and infrastructure in the field of railways, roads and the public transport of passengers and goods; preparation and issuance of scientific and technological reports related to technical project studies and the feasibility of construction projects in the field of railways, roads and the public transport of passengers and

goods; industrial analysis services provided by railway experts and engineers in order to ensure compliance with railway industry standards; advice related to energy conservation; quality control services for others in the field of railways, roads and the public transport of passengers and goods; surveying of land, of roads and related to architectural work in the fields of railways, roads and the public transport of passengers and goods; material testing; mechanical research in the field of railways and road transport lines; research and development of new products for others; technical research in the field of railways and road transport lines; technical feasibility study of projects in the fields of railways, new technologies for railways and road transport lines; engineering services in the fields of railways, roads and the public transport of passengers and goods; industrial testing, namely railway vehicle testing, electrical supply systems for railway vehicles and evaluation of railway infrastructure and of infrastructure for the public transport of passengers and goods; design, development, maintenance, updating and installation of computer systems and software; urban planning; research in the field of environmental protection; electronic control and monitoring of marshalling yards using computers, and electronic and electric sensors for detecting variations in the magnetic field when wagons are on the tracks for the storage, triage, loading and unloading of railway vehicles and locomotives; computer software consulting; software as a service [SaaS] comprising software for recording and analyzing video and audio data recorded by the cameras for monitoring applications in the fields of railways, roads and the public transport of passengers and goods, namely for monitoring traffic conditions, items lost on transport lines and routes, individuals behaving suspiciously, intrusions in tunnels, irregular sounds, such as gunshots, explosions and glass breakage, on the railway and road network; scientific research and development services related to the establishment of models (static and dynamic) and integration of these models (engineering work) for railway and road applications; engineering services, namely engineering research and technology development in the fields of railways and road transport lines; technical assistance and advisory services related to the operation and supervision of computer networks in the fields of railways, roads and the public transport of passengers and goods; technical assistance and advisory services in the fields of computers, telecommunications and television broadcasting in the fields of railways, roads and the public transport of passengers and goods; creation (design) of data and text processing programs for businesses; technical consulting and research in the fields of telecommunications and television broadcasting relating to the fields of railways, roads and the public transport of passengers and goods; technical consulting and advice in the fields of telecommunications and computers relating to the fields of railways, roads and the public transport of passengers and goods; consulting related to computers; rental of programs on computer media and by means of telecommunications, namely programs downloadable on the Internet in the fields of railways, roads and the public transport of passengers and goods; design (development) of computer systems and telecommunications and broadcasting systems; technical project studies and research in the field of maintenance, servicing, installation and repair of computer hardware, telecommunication and television broadcasting equipment in the fields of railways, roads and the public transport of passengers and goods; technical advisory services in computer technology relating to the fields of railways, roads and the public transport of passengers and goods; code and format conversion between different types of texts; rental of access time to a database server centre; provision of access to computer networks, creation of web pages and installation of web hosting facilities for the benefit of others; design and maintenance of Internet sites; design, installation, maintenance, updating and rental of software and databases; supervision (checking, monitoring) of computer networks for the digital security of railway and road operations; design and development of computer languages for modelling and simulation; design of computer systems and on-board systems; provision of guidance, itinerary and mapping programs through a communications network.

Goods

Class 01

(1) Chemical preparations for use in industry, namely chemical preparations for use in the manufacture of plastic; chemicals used in science, namely diagnostic preparations for use in assessment of chemical skin sensitizers for scientific use; chemical preparations for use in photography; chemicals for use in agriculture; chemicals used in horticulture; chemicals used in forestry; chemical substances, chemical materials and chemical preparations, and natural elements, namely, natural chemicals, for use in the processing of plastics; chemical substances for preserving foodstuffs; chemical additives for plaster; chemical additives for use in the processing of plastics; synthetic resins, unprocessed; unprocessed artificial and synthetic resins; curing agent for artificial and synthetic unprocessed resin; thermoplastic resin for use in moulding; chemical compounds for the manufacture of unprocessed artificial resins; solid and liquid diluents for unprocessed artificial resins for manufacturing purposes; unprocessed plastics; unprocessed artificial plastics; polyurethanes; unprocessed thermoplastic compounds for the manufacture of molded plastic articles, for the manufacture of plastic sheets and film, for plastic extrusion operations; injection moulding compositions, namely, polymer alloy compositions for use in the manufacture of molded plastic articles and plastic extrusion operations; rubber compounds for industrial use, namely rubber cement for industrial purposes; polyurethane granulate; copolymer beads for use in manufacturing; polymer beads for use in manufacturing; unprocessed plastic in the form of powder or granules; unprocessed plastic in the form of liquids; unprocessed plastic in

the form of powders; raw plastics in the form of pellets; unprocessed plastics in the form of gels; unprocessed plastics in the form of masses; unprocessed plastics in the form of pastes; unprocessed plastics in the form of flakes; unprocessed plastics in the form of chips; unprocessed plastics in the form of emulsions; polymerization plastics; polyethylene resin, unprocessed; unprocessed synthetic polymer resins; plasticizers for plastics; chemicals for use in the manufacture of polyurethanes; adhesives for use in the textile industry; compost, manures, fertilizers; fertilizing preparations; chemical fertilizers; fire extinguishing compositions; fire prevention compositions; tempering preparations; soldering preparations; tanning compositions for animal skins; substances for tanning animal skins and hides; catalysts, namely catalysts for use in the manufacture of synthetics, rubbers and polymers, catalysts for use in the manufacture of plastics; polypropylene, namely unprocessed polypropylene resins; unprocessed synthetic polypropylene resins; unprocessed polyethylene terephthalate resins; micronized polyethylene waxes for use in the manufacture in the form of powder; unprocessed polybutylene resins; unprocessed polybutylene terephthalate resins; foaming agents for use in the processing of plastic; reducing agents for use in chemical processes, namely, lithium, hydrogen, sodium thiosulfate, sodium iodide, hydrazine, oxalic acid, formic acid, cyanides, carbon; unprocessed polymers compound used in separation processes, namely polypropene

Class 17

(2) Rubber, raw or semi-worked; gutta-percha; gum, raw or semi-worked; unprocessed and semi-processed asbestos; mica, raw or partly processed; substitutes for unprocessed and semi-processed gutta-percha, namely, balata, artificial gutta percha, semi-processed thermoplastic polymer resins for use in manufacture; substitutes for unprocessed and semi-processed gum, namely semi-processed synthetic resins; substitutes for unprocessed and semi-processed asbestos, namely, fiberglass fabrics for insulation, silica fiber fabrics, semi-processed cellulose acetate, polyurethane foam sheeting for use as building insulation, mineral wool and glass wool for insulation; substitutes for unprocessed and semi-processed mica, namely, semi-processed cellulose acetate, styrene-butadiene rubber, vulcanized fiber, acrylic rubber; resins in extruded form for use in manufacture; semi-processed natural and synthetic resins; resins in extruded form for general industrial use; plastics in extruded form for use in manufacture; semi-worked plastic substances, namely semi-processed plastics; polyester, namely spun polyester fiber, other than for textile use; mineral fibers, namely, asbestos fibers; elastomers, namely, thermoplastic elastomer resins in pellet form for use in manufacture; semi-processed natural resins; glass fibres impregnated with synthetic resins for use in the manufacture of building insulation; plastic fibres, other than for textile use, for insulation, for use in the manufacture of tire cord; threads of plastic materials, other than for textile use, for soldering; recycled plastics in the form of bars, blocks and pellets, for use in manufacture; recycled plastics in extruded form for use in manufacturing; plastics foils and panels for general industrial and manufacturing use; laminated plastic materials for use in manufacture, namely, laminated plastic films for use on windows; plastics in the form of sheets, blocks, rods and tubes for general industrial or manufacturing use; plastics materials in the form of strips for doors; plastics materials in the form of rods, for use in manufacture; plastics materials in the form of tapes, for use in manufacture; plastics materials in the form of sections, for use in manufacture; recycled synthetic rubber mixed with plastic material; synthetic rubber in the form of granules; recycled rubber for use in manufacture in the form of pellets; synthetic rubber in the form of powders; packing materials, namely packing material of plastic and rubber for shipping containers; stopping materials, namely, fire-resistant insulated panels made of aramid, glass, carbon or ceramic fibers; insulating materials, namely bamboo fibres, ceramic, polyurethane foam, aluminium foils, ceramic enamel fibers, fiberglass; flexible plastic pipes, plastic tubes, plastic hoses, and fittings therefor, including rubber valves, for plumbing purposes

Services**Class 40**

Treatment of materials using chemicals for the recycling of plastic; treatment and processing of plastics, namely plastic recycling; extraction of elements contained in waste residues, namely extraction of plastic; waste management services, namely recycling of waste and trash; reclamation of material from waste, namely recycling of waste; recycling of chemicals, namely treatment of chemical waste; recycling services, namely recycling of waste; waste water treatment services; waste disposal, namely destruction of waste; chemical treatment of waste products, namely destruction of waste; chemical treatment of plastic to produce plastic mouldings; processing of chemicals services, namely recycling of nuclear fuels; extruding of plastics, namely, molding of plastic materials, processing of plastics, treatment of plastic materials to produce plastic mouldings, recycling of plastics; providing information relating to the recycling of plastics; chemical recycling of waste products, namely recycling of waste; material treatment information, namely providing information relating to the recycling of waste
