## Vol. 68 No. 3503

---

### General Information

---

The *Trademarks Journal* (the “*Journal*”) is published on the website of the Canadian Intellectual Property Office (<http://cipo.gc.ca>). The *Journal* lists trademark applications advertised under subsection 37(1) of the *Trademarks Act* (the “*Act*”), public notices of prohibited marks under section 9 of the *Act*, statements of the Minister in respect of geographical indications under subsection 11.12(2) of the *Act*, as well as erratums to previous volumes.

---

### Electronic *Trademarks Journal*

---

The *Journal* is available in PDF format and can be downloaded free of charge and viewed and printed with Adobe Acrobat Reader. The *Journal* is also available in a printable HTML format as an alternate official version that contains a search function to narrow and customize the content. The electronic form of the *Journal* is the official version.

---

### Official Languages

---

The *Journal* is available in English and French. The details displayed for each application are based on the language of the application. If the language of the application is English, the goods, services, or other text and description appearing in the English version of the *Journal* are in the language filed by the applicant. If the language of the application is French, the goods, services, or other text and description appearing in the English version of the *Journal* have been translated. Any registration resulting from the application will be restricted to these goods or services as described in the language of the application.

---

### Filing Dates

---

The filing date of each trademark application (including those to extend the statement of goods or services of an existing registration) is shown in the YYYY-MM-DD format.

---

## Nice Classification

---

Where applicable and required, the *Journal* lists the goods or services of each application grouped according to the classes of the Nice Classification, each group being preceded by the number of the class of the Nice Classification to which that group of goods or services belongs and presented in the order of the classes of the Nice Classification.

---

## Opposition

---

Any person who has a valid ground of opposition (see section 38 of the *Act* for the grounds of opposition) to any application for registration of a trademark or to any application for registration of a trademark extending the statement of goods or services advertised in this *Journal* may file a statement of opposition with the Registrar of Trademarks within two months from the date of issue of this publication. The prescribed fee must accompany the statement of opposition.

(2) Motors and engines except for land vehicles, namely, electrical motors and engines for the opening and closing of windows, dampeners, louvres and doors; opening and closing mechanisms, namely, electric window and door openers and closers; driving devices for machines, namely, electrical starter motors; control mechanisms for machines, engines and motors, namely, electrical starter motors; motors for heating, ventilation and air conditioning systems.

#### Class 09

(3) Scientific, nautical, surveying, photographic, cinematographic, optical, weighing, measuring, signaling, supervision checking, life-saving and teaching apparatus and instruments, namely, smoke detectors and smoke control panels; apparatus and instruments for conducting, switching, transforming, accumulating, regulating or controlling electricity, namely, insulated copper wire, electric switches, electric transformers, electric accumulators, voltage regulators for electric power; motion detectors and glass break detectors; blank magnetic discs; blank compact discs and DVDs; electronic locking mechanisms for coin-operated apparatus for safes; cash registers; calculating machines, namely calculators; data processing equipment, namely, computers; computers; computer software for monitoring climate control digital thermostats; computer software for opening and closing windows and window shades; computer software for operating remote controls for air conditioning installations; computer software for operating remote controls for opening and closing doors; fire-extinguishers; remote controls for climate control digital thermostats and for opening and closing windows and window shades; remote controls for air conditioning installations; remote controls for opening and closing doors; detectors, namely, motion detectors, electronic glass break detectors, smoke detectors, radon detectors, carbon monoxide detectors, carbon dioxide detectors, gas detectors, duct detectors, and filling level detectors; temperature sensors; smoke detectors; hygrometers; carbon dioxide detectors; electric wires and cables; electric locks for windows and doors; acoustic alarms, namely acoustic fire alarms and

acoustic security alarms; burglar alarms; fire detectors; fire alarms; electric and electronic operating instruments and apparatus, namely, instruments and remote control for the opening and closing of glass panels, doors and windows and of thermostatic valves; electric and electronic instruments and apparatus for measuring, control and supervision, namely sensors for time, rain, moisture, temperature, CO<sub>2</sub>, wind and sun sensors; electric operating equipment and apparatus, namely remote controls for the regulation and control of interior and exterior screens for windows; software for temperature sensors and air quality sensors for monitoring, controlling, transmitting, processing and receiving electronic data for heating, ventilation and air conditioning systems; software for monitoring, controlling, transmitting, processing and receiving electronic data for opening and closing of windows, doors, roof vents, ventilators, fans and smoke ventilation systems; electronic touch sensitive control panels for heating, ventilation and air conditioning systems; electrical sockets, electrical plugs and connection boxes; thermostats.

### **Class 11**

(4) Lighting fixtures, boilers and thermostatic valves for heating installations, steam generating installations, refrigerators, filter dryers for use in HVAC systems and refrigeration, water purifiers and filters for regulating water supply and sanitary purposes; heating, ventilation and air conditioning systems, namely, industrial HVAC units, air vents, fan coils, industrial furnace, heat exchanger, refrigeration condensers, refrigerant lines, fans for air conditioning units, and parts thereof; apparatus for ventilating, namely, ventilating ducts, fans and hoods; air conditioning installations, namely industrial air conditioners; air filtering installations, namely air filtering units for removing dust, smoke and allergens and air filters for air conditioning units; ventilation installations and apparatus, namely, air conditioning, air cooling and ventilation ducts; fire ventilation installations and apparatus, namely smoke and heat ventilating ducts, fans and hoods.

### **Class 19**

(5) Fabric air dispersion ducts for distributing and dispensing air as part of a HVAC system; ventilation installations and apparatus, namely, air conditioning, air cooling and ventilation ducts of plastic.

### **Services**

#### **Class 37**

Building construction consultation; roofing installations; glazing of windows; covering services, namely, roofing and insulating services, namely installation of insulating materials; installing, mounting, maintenance and repair of windows and doors; maintenance and building of pipelines; building construction, repair and installation of heating, ventilation and air conditioning systems; building construction, repair and installation of ventilating ducts, fans and hoods, air conditioning installations, air filtering installations and ventilating installations; building construction, repair and installation of fire, smoke and heat ventilation installations.

with their vehicle to access vehicle information and control functions; communications software for mobiles phones and computers that allows users to connect remotely with their vehicle to send and receive data in the nature of vehicle location and diagnostic details; data processing software for vehicles that enables users to connect remotely with their vehicles to access vehicle information and control functions; computer software that allows users to connect remotely with their vehicles to install software updates; computers for cars; apparatus for the transmission and reproduction of images for vehicles, namely, digital versatile disc recorders, video cassette recorders, mobile phones, smart phones, portable and laptop computers, personal digital assistants, tablets, CD players, compact disc players, DVD players, MP3 players; transmitters of electronic signals, namely, GPS transmitters, radar transmitters, radio transmitters, satellite transmitters, video transmitters; OBD (On-Board Diagnosis) apparatus for automobiles, namely, computer hardware and software systems to detect malfunctioning behavior of safety-related automotive components and systems, including rear camera, rear vehicle lights, loss of critical data from instrument cluster, airbag, engine management, headlights, cruise control, electric power steering, advanced vision driver assistance systems, active suspension, brake lights, electric shock, battery, fire, smoke, heat, radiation, toxicity, flammability; displays in meters for automobiles; audio, video apparatus for cars, namely, audio and video receivers and players, car video monitor; car audio apparatus, namely, car stereos, audio amplifiers, equalizers, MP3 controllers and players, audio speakers; apparatus for reproducing image for cars, namely, apparatus that senses location of other cars for use in vehicle navigation and car safety system; apparatus for reproducing image for cars, namely, car display system; car video recorders; vehicle radio attached to cars; satellite receivers attached to cars; car attachable communication apparatus, namely, satellite and microwave communications transmitters and receivers to transmit communications from a vehicle to another vehicle, or from a vehicle to a satellite, two-way radios; car attachable navigation apparatus using satellites for vehicles; remote control apparatus attachable to automobiles for remotely monitoring, controlling and driving unmanned vehicles, for starting automobile, and for opening and closing automobile doors; car attachable navigation apparatus using satellites, namely, GPS receivers and transmitters; car mounted units incorporating a loudspeaker to allow a telephone handset to be used hands free; car attachable receiving apparatus for communication, namely, audio and video receivers, radio frequency receivers, satellite receivers, stereo receivers; car attachable microphone for communication apparatus, namely, mobile phones, laptops, tablet computers; wireless earphones for vehicles; earphones for electric audio and visual apparatus and instruments of vehicles, namely, mobile phones, laptops; computer software for controlling the operation of audio and video devices, namely, mobile phones, wireless phones, cellular phones, smart phones, video phones, computers, mobile computers, tablet computers, netbook computers, laptop computers and personal digital assistants; software for diagnostics and troubleshooting of home appliances; display management software, namely, software for accessing information in display hardware and input video, namely, liquid crystal displays, Ultra HD and HD displays and for controlling, viewing and manipulating the display of the video input onto the aforesaid displays; display panels for automobiles; LED panels for automobiles; touch panels for automobiles; display panels for automobiles, namely, digital instrument panel and digital dashboard; LED panel displays for automobiles; electronic display panels for automobiles, namely, digital instrument panel and digital dashboard; electronic driverinterface displays for automobiles; solenoid valves; electronic sensors for vehicle instrumentation, namely, acceleration sensors, distance sensors, LED position sensors, oil level sensors; navigation apparatus for vehicles in the form of on-board computers; car navigations, namely, car navigation computers; remote control apparatus for remotely monitoring, controlling and driving unmanned vehicles; wireless transmission and receiving equipment, namely, emergency signal transmitters, GPS transmitters, GPS receivers, radio transmitters and

receivers, satellite transmitters, satellite receivers for use in connection with autonomous and hands-free driving, automobile safety features and warning or alarm functions, accident prevention and traffic alerts; cameras for vehicle; network surveillance cameras; black box camera for cars; automatic vehicle speed control apparatus, namely, electronic speed controllers; motion detecting sensors; position sensing gauges; acceleration measuring sensors for automobiles; computer utility programs for providing diagnostic details for operation record of automobiles; car recognizing cameras; apparatus and instruments for controlling lighting, namely, lighting controls for indoor and outdoor lighting fixtures; cables for electrical and optical signal transmission for automobiles; software for processors of autonomous vehicles; software for controlling autonomous vehicles; operating systems for autonomous cars; computer software for use in connection with autonomous and hands-free driving, automobile safety features and warning or alarm functions, accident prevention and traffic alerts; recorded computer software for cars that provides safe driving assistance and warning notifications; downloadable computer security software; operation recording apparatus for car, namely, electronic data recorders for vehicles; signal processors for controlling autonomous vehicles; simulators for the steering and control of vehicles; black box for cars; black box camera for car navigation; Computer hardware that enables real-time information exchange and information access from people, devices, machines, equipment; Electronic control unit for automobiles, namely, computer hardware for interacting with an automobile customer service center; computer controls for lighting fixtures, namely, electrical control systems for lighting systems, lighting control panels; data security apparatus, namely, computer hardware and software for providing secure access to databases; smart card for conducting security chip technology in the nature of encoded key cards, electronic keys for vehicles, electronic key fobs being remote control apparatus; electronic memory for security in the nature of secure digital (SD) memory cards, random access memory cards, blank flash memory cards, flash memory cards; secure terminals for authenticating the identity of users; controllers and regulators for idle speed, speed, speed limitation and electric gas pedals, namely, speedometers; automatic steering apparatus for vehicles, namely, electric and electro-hydraulic steering aids; axle load monitoring sensors; vehicle monitoring and anti-theft car alarms; distance warning and control sensors for vehicles; anti-theft detection sensors; drowsiness warning sensors for vehicles; speed control sensors for vehicles; optical and acoustic speed warning sensors for vehicles; maintenance indicators for vehicles; network cameras with software and hardware for internet of things; digital cameras with software and hardware for internet of things; TV cameras with software and hardware for internet of things; alarms, namely, gas leak alarms, home security alarm, burglar alarms, anti-theft alarms, electronic door alarms, smoke alarms, and fire alarms, all with software and hardware for internet of things; remote control apparatus with software and hardware for internet of things, namely, remote controls for air conditioners, heating systems, lighting systems, home security systems, refrigerator, air cleaners, laundry washers and dryers, dishwashing machines, ovens, robot cleaners, vacuum cleaners, humidifiers and cooktops; electric audio and visual apparatus and instruments with software and hardware for internet of things, namely, karaoke equipment, home theater projectors, televisions, audio and video receivers, audio and video players, speakers; electric and electronic video surveillance installations with software and hardware for internet of things; closed circuit television cameras with software and hardware for internet of things; speakers with software and hardware for internet of things, namely, audio speakers, computer speakers, loudspeakers, stereo speakers, wireless speakers; TV with software and hardware for internet of things; wireless communication devices for internet of things, namely, wireless routers, tablet computers, mobile phones, laptop computers; remote control apparatus for internet of things for control of air conditioners, heating systems, lighting systems, home security systems, refrigerator, air cleaners, laundry washers and dryers, dishwashing machines, ovens, robot cleaners, vacuum cleaners, humidifiers and cooktops; application software

for internet of things, namely, software for control of air conditioners, heating systems, lighting systems, home security systems, refrigerator, air cleaners, laundry washers and dryers, dishwashing machines, ovens, robot cleaners, vacuum cleaners, humidifiers and cooktops; Mobile application software for internet of things, namely, software for control of air conditioners, heating systems, lighting systems, home security systems, refrigerator, air cleaners, laundry washers and dryers, dishwashing machines, ovens, robot cleaners, vacuum cleaners, humidifiers and cooktops; Computer software for remote control of electronic apparatus, namely, air conditioners, heating systems, lighting systems, home security systems, refrigerator, air cleaners, laundry washers and dryers, dishwashing machines, ovens, robot cleaners, vacuum cleaners, humidifiers and cooktops; Computer software for data sharing and communication between electronic devices, namely, computer software that allows users to connect remotely with electronic devices, namely, air conditioners, heating systems, lighting systems, home security systems, refrigerator, air cleaners, laundry washers and dryers, dishwashing machines, ovens, robot cleaners, vacuum cleaners, humidifiers and cooktops to access their information and control functions; interface for a computer, namely, computer interface boards, computer interface cards, network interface cards that enables internet of things; Pre-recorded USB flash drives featuring software used to allow electronic devices to share data and communicate with each other; computer hardware modules for use in Internet of Things (IoT) electronic devices; application software for automobiles for internet of things, namely, software for remotely monitoring, controlling and driving unmanned vehicles; biochips with software and hardware for internet of things for research and scientific purposes; weight scales for non-medical purposes with software and hardware for internet of things for transmitting the weight of objects; breathing masks, namely, respiratory masks for non-medical purposes with software and hardware for internet of things; wearable telecommunication machines and implements with software and hardware for internet of things, namely, smartwatches and smartphones; software interfaces, namely, computer operating system software, for use with multi health devices, namely, wearable computers in the shape of wrist bands, health bands, wristwatches, and smartwatches to record personal health data, namely, heart rate, oxygen level, breathing rate, blood pressure, blood properties, stress level, sleep parameters, respiratory events, heart rate, pulse rate, body temperature, weight, ultraviolet (UV) light exposure meters, activity levels, energy expenditures, and calories burned; sensors for the internet of things, namely, sensors for local and remote configuration, monitoring, and control of lighting fixtures, HVAC, home monitoring, and security alarms, audio equipment, namely, audio receivers and players, video equipment, namely, video receivers and players, and small appliances, namely, toasters, electric coffee makers, electric kettles, microwave ovens, irons; digital signage; computer software for personal information management, namely, computer software to enable users to manage their personal file collections, notes, address books, task lists, calendars, reminders, e-mail and instant message archives, and voicemail messages; interactive entertainment software for use with computers, namely, software for playing computer games, video games, electronic gaming and providing multi-player access to an online game environment; interactive computer software enabling exchange of information among users in the fields of news, sports and vehicles; Computer software for dictation; computer software for voice command recognition; Speech to text conversion software; Voice recognition software; voice recognition software that allows users to remotely connect to and control electronic devices, namely, air conditioners, heating systems, lighting systems, home security systems, refrigerator, air cleaners, laundry washers and dryers, dishwashing machines, ovens, robot cleaners, vacuum cleaners, humidifiers and cooktops; computer software for use in cell phones, computers, and tablet computers that enables users to remotely personalize and customize settings for computer hardware and connect to personalized internet applications and client interfaces; Computer software for scheduling appointments, reminders, and events on an electronic calendar; computer

software to enable providing information in electronic form via computer and communication networks in the field of news; character recognition software; gesture recognition software; computer software for biometric systems for the identification and authentication of persons; computer software for assisting developers in creating and designing artificial intelligence software; computer software for use in managing and controlling production schedules, shipping schedules, purchase of materials, inventories and accounts; computer software and computer programs for assisting developers in creating program code for use in multiple application programs in the fields of artificial intelligence, machine learning, deep learning and building neural networks; computer software and computer programs for assisting developers in creating computer operating systems for use in the fields of artificial intelligence, machine learning, deep learning and building neural networks; data synchronization software, namely, synchronization of personal schedules, calendars and reminders; data synchronization software for synchronizing multiple digital electronic devices, namely, laptops, computers, digital tablets, tablet computers, electronic book readers, digital book readers, smart phones, digital video players, and digital music players; data synchronization software for mobile phones, cameras, electronic book readers, tablet computers, laptops, audio and video players, electronic personal organizers; computer software for the synchronization of data between a remote computer station and a fixed computer station; application development software; operating system software; computer operating programs for industrial and household robots; computer operating programs for humanoid robots with artificial intelligence; computer programs used as software development tools for robot operating programs; computer programs used as software development tools for control devices that perform electric sequence control for monitoring and regulation of flow and temperature, electronic servo motor controllers, control of industrial robots, computer numerical control routers, control of energy conversion systems comprised primarily of batteries, fuel cells, capacitors, supercapacitors, and ultracapacitors, control of inverters for power supply and electronic control for lighting control panels; computer programs for control devices that perform electric sequence control for monitoring and regulation of flow and temperature, electronic servo motor controllers. control of industrial robots, computer numerical control routers, control of energy conversion system, comprised primarily of batteries, fuel cells, capacitors, supercapacitors, and ultracapacitors, control of inverters power supply and electronic control for lighting control panels; computer software used for setup, maintenance and test operation of control devices that perform electric sequence control for monitoring and regulation of flow and temperature, electronic servo motor controllers, control of industrial robots, computer numerical control routers, control of energy conversion systems comprised primarily of batteries, fuel cells, capacitors, supercapacitors, and ultracapacitors, control of inverters for power supply control or and electronic control for lighting control panels; computer programs for control of inverters for power supply; computer programs for controlling electronic power converters; computer programs for control of electronic servo motor controllers; computer programs for electronic control units for fuel injection pumps and injection valves, namely, electronic ignitions for vehicles and fuel injector parts for land vehicle engines; industrial process control software, namely, computer software for controlling, operating and monitoring industrial machines, electrical industrial controls for monitoring machinery; industrial process control software and computer hardware for remotely controlling and operating industrial equipment and machinery in pharmaceutical, chemical, food and beverage industries; industrial process control software, namely, computer programs and software for signal processing in factory automation; electronic apparatus, namely, control devices with artificial intelligence used for controlling, regulating, and operating industrial robots; computer hardware and computer artificial intelligence software for controlling, regulating and simulating industrial robots, and for simulating mobile application software for controlling internet of things devices, namely, air conditioners, heating systems, lighting systems, home security systems, refrigerator, air cleaners, laundry washers and

dryers, dishwashing machines, ovens, robot cleaners, vacuum cleaners, humidifiers and cooktops; computer software for use in user driven and client driven big data analysis in the field of business administration and management; computer software for use in big data analysis, namely, software for enabling users to examine their large and varied data sets to uncover patterns, correlations, market trends, and customer preferences; computer software for collecting, editing, modifying, organizing, synchronizing, integrating, monitoring, transmitting, storage and sharing of data and information, namely, video files, audio files, image files in the fields of news, sports and vehicles; computer software for data backup, recovery and archiving; computer software for data warehousing; computer software for data protection and data security; computer software for data transfer and migration; computer software for logging changes within a database; computer software for searching databases; database management software; computer software for creating, configuring, provisioning and scaling databases; computer software for improving database performance for use by developers in the building of fast and responsive computer software applications; computer software for configuring, provisioning and scaling data cache storage for databases; computer software for storing, retrieving, caching, extracting, formatting, structuring, systematizing, organizing, indexing, processing, querying, analyzing, replicating and controlling access to data in the fields of news, sports and vehicles; business analytics software for collecting and analyzing data to facilitate business decision making; computer software for speech, facial and optical character recognition; computer software for image analysis, identification, processing, conversion, cropping, resizing and enhancement; computer software for event logging, reporting, analysis and alert generation to provide information about computer network traffic and usage; computer software for creating searchable databases of information and data; computer software that provides real-time, integrated business management intelligence by combining information from various databases; computer software that enables electronic devices, namely, air conditioners, heating systems, lighting systems, home security systems, refrigerators, air cleaners, laundry washers and dryers, dishwashing machines, ovens, robot cleaners, vacuum cleaners, humidifiers and cooktops to remotely connect to each other to send and receive information and control functions via a cloud-based platform; computer software that automates the processing of un-structured, semi-structured and structured information and data stored on computer networks and the internet, namely, computer software for database management; computer software for accessing online databases hosted on cloud-based platforms; data processing software for viewing and editing graphic representations and for word processing; biometric data processing software; data processing software, namely, computer software for image processing, computer software for processing digital images, computer software for processing digital music files, computer software for word processing; motion sensor data processing software; computer software for document management, transmission, storage and indexing of information in the field of news, sports and vehicles; Light emitting diode (LED) displays; virtual reality headsets; blank USB Flash drives; blank flash memory cards; digital door locks; digital signage display panels; smart watches; solid state drives; smartphones; wearable activity trackers; tablet computers; biometric fingerprint scanners; biometric retinal scanners; biometric hand scanners

### **Class 10**

(3) respiration monitors; apparatus for monitoring patients and analysing arrhythmias, namely, heart monitors, heart rate monitors, pulse rate monitors; equipment for respiratory technology, namely, respiratory masks for medical purposes; apparatus for the treatment of deafness for hearing-impaired children, namely, hearing aids; medical hearing instruments for the hearing-impaired children; medical hearing instruments for the hard of hearing, for diagnosis and therapy purposes; apparatus used in implementing diagnostic tests for the detection of malignant tumors in

humans; apparatus for dosage planning and the documentation of tumour radiotherapy, namely, radiological equipment for medical purposes; linear accelerators for tumour radiotherapy; apparatus and equipment, namely, medical image processors for recording, processing, storing and reproducing medical images; point-of-care diagnostic apparatus, equipment and instruments, namely, apparatus for taking blood, blood glucose monitors, blood pressure monitors, and heart monitors for analyzing and reporting diagnostic test results to doctors and patients; protective screens for protecting against exposure to x-rays, for medical purposes; apparatus for ECG long-term storage and computerized ECG evaluation (electroencephalography), namely, electrocardiographs, electrocardiograph recorders, computer software incorporated into electrocardiograph apparatus to record, process and analyze ECG data; medical x-ray apparatus for x-ray diagnostics and x-ray therapy; medical equipment for digital image recording, for contrast medium analysis with real time image reproduction, namely, x-ray apparatus for medical purposes, x-ray computed tomography [CT] scanners, x-ray negative mounts; medical diagnostic instruments for the analysis of body fluids, namely, blood and derivatives and urine; analysers for medical use in clinical chemistry, namely, blood and urine analysis; test strips for urine analysis; measuring apparatus for cardiac catheterization, namely, heartbeat measuring apparatus, pulse measuring devices, arterial blood pressure measuring apparatus; medical CT scanners; peripheral devices of medical CT scanners, namely, x-ray negative mounts, x-ray photographs for medical purposes, x-ray tubes for medical purposes; dental CT scanners; parts and fittings of dental CT scanners; magnetic resonance imaging [MRI] apparatus; gloves for medical purposes; Patient monitoring sensors and alarms consisting of patient monitoring apparatus, namely, heart, oxygen and pulse rate monitors, respiratory monitors; blood glucose meters; blood glucose monitors

### **Class 11**

(4) air conditioners with software and hardware for internet of things; in-door lighting fixtures with software and hardware for internet of things; refrigerators with software and hardware for internet of things; air cleaners with software and hardware for internet of things; laundry washing machines with software and hardware for internet of things; dishwashing machines with software and hardware for internet of things; air dryers, in the nature of separators for the cleaning and purification of air, with software and hardware for internet of things; air dryers, in the nature of dryers used for the removal of solid, liquid and vapor contaminants from compressed air and gases, with software and hardware for internet of things; conventional ovens with software and hardware for internet of things; humidifiers with software and hardware for internet of things; Electric clothes management apparatus in the nature of garment steamers for household purposes; dehumidifiers for household use; electric laundry dryers; Apparatus for cooking, namely, cooktops; Electric clothes management machines for drying clothes for household purpose, namely, electric clothes dryer; temperature detection and control sensors for water cooling installations, namely, water coolers; water treatment chlorinator units

### **Class 12**

(5) connected vehicles, namely, cars, trucks, buses, and trains connected to the internet; driverless cars [autonomous cars]; parts and fittings for autonomous vehicles, namely, air springs for vehicle suspension components for cushioning driver's seats and cabs, airbags for vehicles, arm rests for vehicles, automatic gearboxes for land vehicles, axle bearings for motor vehicles, axles for air suspension systems in vehicles, axles for land vehicles, band brakes for land vehicles, belt pulleys for land vehicles, block brakes for land vehicles, bodies for vehicles, body panels for vehicles; parking assistance apparatus for vehicles with foreview and rearview sensors; anti-theft warning apparatus for motor cars with software and hardware for internet of things

### **Services**

**Class 38**

(1) telematic in-vehicle communication service providing wireless vehicle navigation and tracking; data transmission via telematic networks, namely, providing internet access via wireless broadband networks; transmission of information via national and international networks, namely, radio broadcasting of information and other programs, transmission of radio and television programmes by satellite; providing access to databases via a global computer network; Telematic in-vehicle communication service for wireless vehicle navigation and tracking; interactive teletext services using artificial intelligence; transmission, broadcasting and reception of audio, video, still and moving images, text and data, namely, music, movies, television shows, music videos, news and sports webcasts via the internet using artificial intelligence; digital broadcasting of films and television programs via the internet using artificial intelligence; teletext and interactive videotext services using artificial intelligence

**Class 42**

(2) development of control software for electrical vehicle equipment; design of computer operating systems for autonomous vehicles, and control devices for the steering and control of autonomous vehicle; development of software for autonomous vehicles; design of motor vehicle parts; automobile technology research; development of vehicles; Advanced product research in the field of artificial intelligence; Research and consultancy services relating to artificial intelligence; business and technical support services, namely, developing technologies for others in the fields of artificial intelligence; providing information on computer technology and programming via a website; Software design and development in the fields of augmented reality, artificial intelligence, machine learning, and the internet of things; Scientific research consulting in the fields of machine learning, artificial intelligence and robotics; Providing scientific information, advice and consultancy in the fields of machine learning, artificial intelligence and robotics; Development of new technology in the fields of machine learning, artificial intelligence and robotics; Scientific research and development in the fields of machine learning, artificial intelligence and robotics; consultancy in the design and development of computer hardware and computer software for robotics and automation technology; database design and development; Computer programming and software design; Data automation and collection service using software to evaluate, analyze and collect service data from anti-theft sensors and alarms in the field of merchandising security solutions; computer software technical support services; technical support in the form of monitoring global computer network systems; technical support in the nature of troubleshooting to diagnose computer hardware and software problems; hosting an online database in the fields of information technology, technology support and computer network management; Collaborative computer programming; Providing virtual computer systems and virtual computer environments through cloud computing; cloud hosting provider services of electronic databases; product design consulting services using artificial intelligence; design of new products for others in the field of artificial intelligence; testing of new products for others in the field of artificial intelligence

**Class 44**

(3) providing medical information in the field of dermatology via the internet; Medical consultation, namely, professional consultancy in the field of medical technology, medical surgery and orthopaedics, providing medical advice in the field of dermatology, providing medical information in the field of dermatology, health care consultancy in the field of occupational therapy, psychiatric consultation, psychological consultation and pharmaceutical consultation; hygienic and beauty care for humans and animals, namely, beauty salon services, health and beauty care services provided by saunas, beauty salons, sanatoriums, hairdressing salons and massage parlors, skin care salon services, animal grooming services; cosmetic and medical services for the care of the

skin, namely, cosmetic body care services, cosmetic facial and body treatment services, skin tanning service for humans for cosmetic purposes, cosmetic laser treatment of skin, dermatological services for treating skin conditions; dentistry; conducting medical physical evaluations; hospital services; medical clinics; telemedicine services; providing information in the field of health care, namely, home health care services, cancer prevention, screening, diagnosis and treatment, medical diagnostic testing, monitoring and reporting; medical equipment rental; conducting medical physical evaluations via the internet

### Trademark Description

COSPLAY FEST refers to events, services and hosted event activities such as festivals, conventions, or any other limited events, public or private appearances, fully or partially dedicated to cosplay culture. Productions bearing the name Cosplay Fest involve the participation of cosplayers, artists, actors, and performing artists in the fields of cosplay culture, the world of historical costuming and pop culture.

### Colour Claim

Colour is claimed as a feature of the trademark. The colour codes complete the visual identity of the mark, mascots, derivative products, communication and signage media related thereto. The colour code must not be used by similar entities that may cause public confusion or implicitly suggest immediate recognition of the fields of activity offered by the official production structures using the applicant's trademark and the symbolism of their logo. Use by a third party, or an organization in which the applicant is not involved, must be validated by a contract or licence agreement. The pictorial composition of the "Cosplay Fest" logo is as follows. 1 - YELLOW: it outlines the entire design, defines its shape and emphasizes the volume of the character's face. The shaded area, rendered in yellow, is on the leftmost side of the said face and serves as the shape of the letter "O" in the word "Cosplay". 2 - BLACK: it outlines all the main elements of the logotype and fills in the shapes complementary to the typography to ensure the design and the words are visually distinct from one another. Black is used to fill in and outline the following elements: the character's visor, the antennae on the helmet, the shape around the blue reflection on the helmet, the nostrils and the mouth on the face, and the cape and its drapery. Black is also

used to fill in the typography of the "COSPLAY FEST" mark and serves as an outline for the white outline around the letters of the mark. 3 - WHITE: it outlines the letters of the mark and defines the face symbolizing the "O" in the word "Cosplay" by creating a chiaroscuro with the yellow on the left of the face. 4 - BLUE: it serves as the colour at the centre of the visor on the face of the character appearing in the word "Cosplay". Blue is also used for the cape in the logotype of the mark.
