Trademarks Journal

Vol. 68 No. 3499

General Information

The *Trademarks Journal* (the “*Journal*”) is published on the website of the Canadian Intellectual Property Office (<http://cipo.gc.ca>). The *Journal* lists trademark applications advertised under subsection 37(1) of the *Trademarks Act* (the “*Act*”), public notices of prohibited marks under section 9 of the *Act*, statements of the Minister in respect of geographical indications under subsection 11.12(2) of the *Act*, as well as erratums to previous volumes.

Electronic *Trademarks Journal*

The *Journal* is available in PDF format and can be downloaded free of charge and viewed and printed with Adobe Acrobat Reader. The *Journal* is also available in a printable HTML format as an alternate official version that contains a search function to narrow and customize the content. The electronic form of the *Journal* is the official version.

Official Languages

The *Journal* is available in English and French. The details displayed for each application are based on the language of the application. If the language of the application is English, the goods, services, or other text and description appearing in the English version of the *Journal* are in the language filed by the applicant. If the language of the application is French, the goods, services, or other text and description appearing in the English version of the *Journal* have been translated. Any registration resulting from the application will be restricted to these goods or services as described in the language of the application.

Filing Dates

The filing date of each trademark application (including those to extend the statement of goods or services of an existing registration) is shown in the YYYY-MM-DD format.

Nice Classification

Where applicable and required, the *Journal* lists the goods or services of each application grouped according to the classes of the Nice Classification, each group being preceded by the number of the class of the Nice Classification to which that group of goods or services belongs and presented in the order of the classes of the Nice Classification.

Opposition

Any person who has a valid ground of opposition (see section 38 of the *Act* for the grounds of opposition) to any application for registration of a trademark or to any application for registration of a trademark extending the statement of goods or services advertised in this *Journal* may file a statement of opposition with the Registrar of Trademarks within two months from the date of issue of this publication. The prescribed fee must accompany the statement of opposition.

The colours blue, light blue and white are claimed as features of the mark.

Goods

Class 07

(1) Drive chains and drive chain structural parts for ships and boats; internal combustion engines for ships and boats; internal combustion engines for experimental purposes with and without exhaust turbochargers, having exhaust gas recirculation and having storage of combustion gas for ships and boats; electric motors and parts thereof for ships and boats; hybrid drives and hybrid motors for ships and boats; clutches and apparatus for power transmission, namely torque converters for ships and boats; compressors, namely air compressors, centrifugal compressors, gas compressors, electric compressors, compressors for industrial machinery

Class 09

(2) Fuel cells, batteries and electric accumulators for vehicles; computer programs, software and control programs for the operation and testing of internal combustion engines; computer programs, software and control programs for the study of exhaust gas emissions, their occurrence and reduction; computer programs, software and control programs for detecting and analyzing strains, stresses, oscillations, noise generation, noise propagation, and noise emission from land vehicle powertrains; computer programs, software and control programs for testing, monitoring and analyzing external air flow of moving parts and bodies, of land, air, and sea vehicles; computer

programs, software and control programs for flow processes and combustion processes and fuel-mixture generation and charging processes and fuel-mixture laminating processes within an engine; computer programs, software and control programs for flows in enclosed spaces generated by air conditioners; computer programs, software and control programs for powertrain and vehicle testing to simulate thermodynamic processes, flows, temperature and pressure curves, the temperature distribution in solid bodies, in particular in components of internal combustion engines and their assemblies, of combustion and detonation procedures; computer programs, software and control programs for testing the combination or conjunction of simulation programs for developing powertrain systems; computer programs, software and control programs for the evaluation and development of engines, gear drive, transmission topologies of land, sea and air vehicles; computer programs, software and control programs for the evaluation and assessment of the diesel and gasoline engine exhaust of boat engines, ship engines, airplane engines and motor vehicles; computer programs, software and control programs to assist the test engineer during the performance of the calibration of boat engines, ship engines, airplane engines and motor vehicles; computer programs, software and control programs the diagnosis and monitoring of motor vehicle batteries and fuel cells; computer programs, software and control programs for the assessment, simulation and development of electric motors, their power electronics and hybrid drive trains and drive gears for motor vehicles; computer programs, software and control programs for the evaluation, simulation and analysis of driving behavior of motor vehicles; computer programs, software and control programs for the thermo-dynamical assessment of internal combustion engines; computer programs, software and control programs for providing comparative evaluations of vehicle drive chain characteristics; computer programs, software and control programs for the automated delineation of test runs for the behavior of drive chains and motor behavior; computer programs, software and control programs for the retracing of reproducible test runs of the test track or real tracks on the roller dynamometer; computer programs, software and control programs for the management of the operational procedure in an engine and powertrain test facility, namely order processing of test orders, in particular the management of the sequences of operation, management of test and measuring equipment, scheduling of test orders, test beds, measuring instruments and personnel; computer programs, software and control programs for the management, assessment and analysis of vehicle engine and vehicle powertrain test data, in particular for the operation of web shops for vehicle engine and vehicle powertrain spare parts; software for calibration, for simulation and analysis of safety-related systems of vehicle engines and powertrain systems; diagnostic and monitoring apparatus and instruments for vehicle batteries, namely battery acid testers and ammeters; diagnostic and monitoring apparatus and instruments for externally and internally driven internal combustion engines, namely automotive analyzers for testing engine performances and electronic circuits; sensors, measuring probes and battery electrolyte tester for measuring, probing and monitoring the concentration of electrolytes in electric storage batteries; sensors, measuring probes and battery electrolyte tester for measuring, probing and monitoring the hydrogen ion concentration in electric storage batteries, in exhaust systems of vehicle engines; sensors, measuring probes and battery electrolyte tester for measuring, probing and monitoring the carbon dioxide partial pressure in electric storage batteries, in exhaust systems of vehicle engines and in automatic engine test stands; sensors, measuring probes and battery electrolyte tester for measuring, probing and monitoring the oxygen partial pressure in electric storage batteries and in exhaust systems of vehicle engines and in automatic engine test stands; fiber optical sensors and instruments for simultaneous measurement of various parameters, namely oxygen partial pressure, carbon dioxide partial pressure, hydrogen ion concentration, concentration of electrolytes in electric storage batteries, in exhaust systems of vehicle engines and in automatic engine test stands; electrochemical electrodes for use in electric storage batteries, in exhaust systems of vehicle

engines and in automatic engine test stands; micro electrodes for use in electric storage batteries, in exhaust systems of vehicle engines and in automatic engine test stands; micro-optical and micro-electrochemical sensors with evaluation electronics, namely, pressure sensors, proximity sensors, velocity sensors and thermal sensors for use in electric storage batteries, in exhaust systems of vehicle engines and in automatic engine test stands; microwave interferometers; microwave sensors for use in electric storage batteries, in exhaust systems of vehicle engines and in automatic engine test stands; optical sensors; capillary electrodes; electrode testing devices, namely electrode testing meters; calibrating apparatus and instruments for sensors and measuring devices, namely industrial calibration sensors; devices for measuring the composition of exhaust, namely exhaust gas analyzers; devices for measuring the pressure vibrations in liquids, namely manometers; devices for measuring the structure-borne noise and airborne noise, namely decibel meters; software for the evaluation and analysis of driving behavior of motor vehicles; software for the thermo-dynamical evaluation of combustion engines; measuring instruments for determination of the resonance behavior of piezoelectric pressure sensors; piezoelectric resonators; piezoelectric and electro-acoustic components, namely, piezoelectric pressure sensors, piezoelectric resonators and piezoelectric switches for use in test stands and vehicles; electro-optical measuring apparatus and instruments for studying flow phenomena in liquids and gases; velocity measuring apparatus and instruments, namely sensors for determining velocity, torsional vibration measuring apparatus and instruments, namely, torsional vibration measuring sensors; laser-optical instruments for studying flow phenomena in liquids and gases, acceleration sensors, pressure sensors, pressure regulators for vehicle engines and for automatic engine test stands, flow rate sensors; flow rate regulators for vehicle engines and for automatic engine test stands; electric charge amplifiers, namely power amplifiers; electronic liquid level measuring devices, namely, liquid level measuring transducers and liquid level measuring sensors; velocity regulators for vehicles, for engines and for automatic engine test stands; high-pressure sensors; capacitive distance measuring instruments for top dead center of piston engines; capacitive and inductive measuring transducers; force encoder, namely, chassis dynamometers for testing vehicles; light barriers, namely optical sensors; position encoders for the tracking the rotary position of an engine shaft; densitometers, temperature measuring devices, namely temperature gauges and temperature sensors; Automotive test beds, test machines, test benches and testing equipment, namely, component testers, alternator testers, starter testers, diode and rectifier testers, voltage regulator testers, combination alternator, starter and battery testers, solenoid testers, hybrid motor, generator and variable frequency drive testers, hybrid motor test stands for laboratory, durability and production testing, HV-EV motor and controller test systems comprised of load motors, power analyzers, test beds, testing software, electronics, power supply, battery simulator, Motor Controller and Inverter testers; Electric Powertrain Testing Systems comprised of load motors, power analyzers, test beds, testing software, electronics, power supply, battery simulator; Engine Simulator test systems comprised of load motors, power analyzers, test beds, testing software, electronics, power supply, battery simulator, starter durability testers, start stop system starters, dynamometers, brake assist system testers, machines for dynamic testing of vehicle components, namely, drivelines, axels, drive trains, transmissions, gear boxes, brakes, engines, camshafts, crankshafts, tire and wheels, fans, alternators, drive shafts, turbo chargers, pumps; Vehicle gear box testing machines; vehicle automatic transmission testing machines; Vehicle emissions testing machines; partially and completely automatic engine test stands; power brakes for test stands; monitoring instruments for the operating state of internal combustion engines, namely testing equipment for testing emission, pressure, temperature, noise, fuel consumption and engine speed; instruments and devices for determining the concentration of a material contained in a substance, namely concentration meters ; static and dynamic calibration equipment for calibrating high-pressure sensors power electronics for electric motors, namely electronic power supplies for driving electric motors

Class 12

(3) Apparatus for locomotion by land, air or water, namely cars, automobiles, trucks, motorcycles, all-terrain vehicles, buses, ships, boats, airplanes; drive chains for vehicles and drive chain structural parts therefore for land vehicles; electric motors and parts thereof for land vehicles; hybrid drives and hybrid motors for motor vehicles; clutches, shifting clutches and devices for power transmission for land vehicles; internal combustion engines for land vehicles; internal combustion engines for experimental purposes with and without exhaust turbochargers, having exhaust gas recirculation and having storage of combustion gas for land vehicles

Services**Class 37**

(1) Maintenance of internal combustion engines and motor vehicles

Class 41

(2) Organization and performance of training courses and classes for company personnel and guest engineers in the field of engine design, engine research and engine development; organization and performance of training courses and classes for company personnel and guest engineers in the field of drive chain development and the development of drive chain components; organization and performance of training courses and classes for company personnel and guest engineers in the field of measurement technology of engine research, engine development, drive chain development and the development of drive chain components; combustion photography and high-speed photography in combustion chambers

Class 42

(3) Scientific and technological services and research and design services in the field of engine and motor vehicle development; scientific and technological services and research and design services in the field of the assessment and inspection of motor vehicles and motor vehicle components; technical project management, namely, in the field of the development of motor vehicles, motor vehicle components and drive chain components; technical and strategical evaluation and consulting in the field of engine and vehicle development; technical and strategical evaluation and consulting in the field of the assessment and inspection of vehicles and vehicle components; industrial analysis and research services in respect of engine and motor vehicle development; motor vehicle development; organizing, conducting and evaluation of test ruins for the assessment and development of motor vehicles; engineering services, namely, conducting development of engines and motor vehicles; design and development of methods, processing and software for calibration of engines and of land, air, and sea vehicles; development of machines and apparatus, of test stands, of dynamic test stands, of simulation test stands, of cold test stands, of manufacturing test stands, of testing devices, of measuring devices, and of experimental equipment for machines and work machines in automotive engineering industry; analysis and study of the influence of engine components and of exhaust treatment components in automotive engineering industry; analysis and study of real time and historical data of electronic control units (ECU) for engine and powertrain development in motor vehicles; analysis and study of the influence of the environmental effect and various fuels and lubricating oils on the resulting particle emissions and gaseous emissions in general in motor vehicles; analysis and study of the influence of fuels and lubricating oils on exhaust emissions and on the abrasive and corrosive wear of engine components and resulting particle emissions in motor vehicles; analysis and study of oil consumption based on the metallic components of particle emissions in motor vehicles; investigation of overall behavior, noise generation and silencing in motor vehicles; scientific analysis and development of internal combustion engines, experimental engines and parts thereof;

scientific analysis and development of low-emission combustion methods and lean-fuel engines and exhaust treatment systems and systems operated by them; scientific analysis and development of gear drives and transmission topologies [to be discussed]; scientific analysis and development of drive assemblies and drive development strategies; scientific analysis and development of fuel supply devices for engines for liquid, solid, and gaseous fuels and for injection motors for standard fuels and alternative fuels; scientific analysis and development of fuel systems for engines for liquid, solid, and gaseous fuels and for injection motors for standard fuels and alternative fuels; scientific analysis and development on noise reduction in engines and transmissions and overall powertrain systems and overall internal combustion systems; scientific analysis and development of hybrid motors, hybrid drives and electro motors of vehicles and parts thereof; scientific analysis and development of fuel cells, batteries and accumulators; component development for internal combustion engines; analysis and product development through comparing evaluation of motor vehicles and motor vehicle components, in particular drive chain components, or vehicle characteristics, in particular drive chain characteristics; design and development of computer programs, software and control programs for the operating and testing of internal combustion engines and, for study of exhaust gas emissions, their generation and reduction, and for stresses, strains, vibrations, noise generation, noise propagation and noise radiation; design and development of computer programs for flow phenomena and combustion processes inside the engine, and for processes of mixture-formation and charging processes and /or processes of mixture-layering; design and development of computer programs for external flows around moving parts and bodies, especially land, air, and water vehicles, for flows in enclosed spaces, especially air conditioning; design and development of computer programs for testing and calibration of combustion engines; design and development of computer programs for the study of exhaust gas emissions, their occurrence and reduction; design and development of computer programs for simulation of thermodynamic processes, flows, temperature and pressure curves of temperature distribution in solid bodies, particularly in components of internal combustion engines and their assemblies, of combustion and detonation processes; design and development of computer programs for the operation and testing of hybrid motors, hybrid drives, electric motors and power electronics of vehicles; design and development of computer programs for the operation and testing of fuel cells, batteries and accumulators; design and development of computer programs for prognosis of vehicle characteristics, in particular of the drive capacity of vehicles; design and development of computer programs for prognosis of vehicle environment characteristics and for the optimization of vehicle characteristics, in particular during driving; development of macro programs for computer-aided design and computer-aided manufacturing, and computer programs for databank applications; development and maintenance of websites, in particular of web shops for spare parts for motor vehicle engines, spare parts for testbeds, and spare parts for testing equipment for testing emission, pressure, temperature, noise, fuel consumption and engine speed; research in the field of engine construction and measurement technology and engine testing and measurement technology testing, engine calibration, component testing and test bed automation, vehicle automation and HiL-automation in the field of automotive engineering; technical consultation services in the field of component selection for drive chain components, in particular combustion engines, exhaust treatment systems and gear drives; measurement evaluations of exhaust gas and particle emission; chemical and spectroscopic analysis of exhaust gases and particle emissions; rental of computer hardware and software , namely simulation programs, and control programs and macro programs for development and research in the field of automotive engineering, for computer-aided design and computer-aided manufacturing, and for the operation and testing of internal combustion engines

Colour Claim

Colour is claimed as a feature of the trade-mark. The color(s) Green, Brown, and White is/are claimed as a feature of the mark. The mark consists of a brown banner with the word 'MONSTER', in white block letters. The words 'Tree Service' are below the banner in brown. Behind the banner stands a green monster with two brown eyeballs on antennae over a brown work helmet. The monster's mouth is brown and appears as a squiggly line. The monster's arms are akimbo with its right hand holding the banner and its left holding a pole clip that is in brown with white circles and a green rope. On the monster's left and behind the banner is a pine tree in the same green as the monster with a brown trunk appearing below the banner. The color black represents background, shading, or outlining and is not claimed as a feature of the mark.

Trademark Description

The configuration of the 3 blueberries is reminding of gears or cogwheels rotating within another like machine parts. The flared crowns similar to cut teeth of a cogwheel, mesh with another to transmit speed, torque, direction and power source. However the blueberry are 'natural', their complex shapes, their alignment is balancing the 'mechanical alignment'.

Colour Claim

Colour is claimed as a feature of the trade-mark. The 3 blueberries are filled with the color purple with white flared crowns within each one.
