Trademark Description

The literal meaning is 'Cool Wife', which specializes in home products. I think this category can remind people of their gentle wife at home, but the wife is like a superhero who can do everything, so I think the wife is very cool. This is also the reason why the name was finally determined. The design of the pictures is based on the text design

AMARONE DELLA VALPOLICELLA

Indication type

Wine

Goods

Wine

Territory

The production zone of the controlled and guaranteed designation of origin "Amarone della Valpolicella" includes the whole or part of the municipalities of: Marano, Fumane, Negrar, S. Ambrogio, S. Pietro in Cariano, Dolcè, Verona, S. Martino Buon Albergo, Lavagno, Mezzane, Tregnago, Illasi, Colognola ai Colli, Cazzano di Tramigna, Grezzana, Pescantina, Cerro Veronese, S. Mauro di Saline and Montecchia di Crosara.

Qualification

The mild, not excessively rainy, climate, warmer during the summer-autumn season, determines the fairly regular ripening of the grapes, with good sugar levels and phenolic components. This gives the "Amarone della Valpolicella" of the floor of the valley a limited alcohol content, in favour a balanced nose with floral notes and a delicate colour. The soils of the low and mid-level hillsides, which do not exceed an altitude of 300 metres above sea level, are sandy-gravelly and clayish, and give grapes with a good sugar content and an average acid structure and a high malic acid content. In general, "Amarone della Valpolicella" has a not excessive alcohol content and a good level of antocyanins. Also the sensorial profiles are complex and highly distinguishing. The type of soils and the good exposure of the sloping vineyards allow for obtaining a very balanced "Amarone della Valpolicella" both for the technological and the phenolic maturity. The polyphenols give a broad and harmonic sensorial profile, especially for the native "Rondinella" component. The calcareous soils of the area in the southern parts and the summits of the ridges offer excellent environments for the ripening of the grapes for the "Amarone della Valpolicella" wines which consequently have a good accumulation of sugars, a good acidic degradation and high levels of antocyanins and polyphenols with good cellular maturity. The alcoholic content of "Amarone della Valpolicella" is average, with a high value of dry extract, of total antocyanins and of total polyphenols. With regard to taste, "Amarone della Valpolicella" has interesting fruity and floral notes. The marly limestones (Biancone and Scaglia) of the higher slopes of the "Valpolicella" production zone give excellent sugar levels both before and after the harvest. This high suitability for the production of "Amarone della Valpolicella" wine is confirmed by the trends of the acidity and

of the maturity of the phenols. In fact, both the "Amarone della Valpolicella" grapes and wine are highly coloured with high total polyphenol values. A good quantity of tannins can be extracted from the grape seeds and from the ripening of the peel. At sensorial level, there are intense floral notes and hints of red fruits. The applicable law in the European Union ("EU") is Regulation (EU) 1308 /2013, article 107. In the EU, AMARONE DELLA VALPOLICELLA is registered as a Protected Designation of Origin ("PDO") since December 12, 2011. Before it registered as a PDO at the EU level, AMARONE DELLA VALPOLICELLA was protected as a Denominazione di Origine Controllata e Garantita ("DOCG") through Italian Decree of March 24, 2010 (Italian Gazette No. 84 of April 12, 2010) under the Legislative Decree of April 8, 2010, No. 61, now superseded by Italian Law No. 238/2016.
