Trademarks Journal

Vol. 71 No. 3635

General Information

The *Trademarks Journal* (the “*Journal*”) is published on the website of the Canadian Intellectual Property Office (<http://cipo.gc.ca>). The *Journal* lists trademark applications advertised under subsection 37(1) of the *Trademarks Act* (the “*Act*”), public notices of prohibited marks under section 9 of the *Act*, statements of the Minister in respect of geographical indications under subsection 11.12(2) of the *Act*, as well as erratums to previous volumes.

Electronic *Trademarks Journal*

The *Journal* is available in PDF format and can be downloaded free of charge and viewed and printed with Adobe Acrobat Reader. The *Journal* is also available in a printable HTML format as an alternate official version that contains a search function to narrow and customize the content. The electronic form of the *Journal* is the official version.

Official Languages

The *Journal* is available in English and French. The details displayed for each application are based on the language of the application. If the language of the application is English, the goods, services, or other text and description appearing in the English version of the *Journal* are in the language filed by the applicant. If the language of the application is French, the goods, services, or other text and description appearing in the English version of the *Journal* have been translated. Any registration resulting from the application will be restricted to these goods or services as described in the language of the application.

Filing Dates

The filing date of each trademark application (including those to extend the statement of goods or services of an existing registration) is shown in the YYYY-MM-DD format.

Nice Classification

Where applicable and required, the *Journal* lists the goods or services of each application grouped according to the classes of the Nice Classification, each group being preceded by the number of the class of the Nice Classification to which that group of goods or services belongs and presented in the order of the classes of the Nice Classification.

Opposition

Any person who has a valid ground of opposition (see section 38 of the *Act* for the grounds of opposition) to any application for registration of a trademark or to any application for registration of a trademark extending the statement of goods or services advertised in this *Journal* may file a statement of opposition with the Registrar of Trademarks within two months from the date of issue of this publication. The prescribed fee must accompany the statement of opposition.

(1) Decorative metal profiles for use in further manufacturing, profile steel for doors and windows, metal profiles for building, all the aforesaid goods being of metal; metal tubes for machinery, all the aforesaid goods being of metal; aluminum rods, rods of common metal for further manufacture, threaded metal rods, steel rods, rods of common metal for further manufacture, steel in sheet, rod, bar or billet form, threaded metal rods, all the aforesaid goods being of metal; anchor plates, sheets and plates of metal, all the aforesaid goods being of metal; metal strips for use in further manufacturing, all the aforesaid goods being of metal; cove bases of metal, metal baseboards, all the aforesaid goods being of metal; angle irons of metal, steel angles for use in building construction, all the aforesaid goods being of metal; paving blocks of metal, refractory blocks of metal, swage blocks, all the aforesaid goods being of metal; support elements of metal for use in workpiece machining and workpiece processing, support elements of metal to assist with milling, drilling, planning and grinding of a workpiece, supports elements of metal for supporting workpieces during machining and workpiece processing, all the aforesaid goods being of metal; feet in the nature of furniture leg levelers of metal, leg levelers of metal for machines, all the aforesaid goods being of metal; anchor bushings of metal, self-tapping bushings of metal, threaded bushings of non-ferrous metal, all the aforesaid goods being of metal; hardware springs, all the aforesaid goods being of metal; metal screws, all the aforesaid goods being of metal; metal nuts, all the aforesaid goods being of metal; securing means for screws and nuts in the nature of metal discs and metal bolts, all the aforesaid goods being of metal; nut holders in the nature of clamps of metal for holding metal nuts, all the aforesaid goods being of metal; threaded bushings of non-ferrous metal, threaded bushings of ferrous metal, all the aforesaid goods being of metal; eye nuts, all the aforesaid goods being of metal; washers of metal, all the aforesaid goods being of metal; angle irons of metal, all the aforesaid goods being of metal; furniture catches of metal, all the aforesaid goods being of metal; threaded cotter pins, threaded ball lock pins, all the aforesaid goods being of metal; threaded metal rods, all the aforesaid goods being of metal; braces of metal for handling loads, all the aforesaid goods being of metal; load-bearing ring bolts, all the aforesaid goods being of metal; clamping screw sets, namely turnbuckles, all the aforesaid goods being of

metal; screws and bolts of metal bearing a fluting, all the aforesaid goods being of metal; steel drilling plates, all the aforesaid goods being of metal; metal drill bushings for use with metal cutting machines, all the aforesaid goods being of metal; metal support blocks for use with metalworking machines, all the aforesaid goods being of metal; metal closures for containers, all the aforesaid goods being of metal; pallets for metal machine tools; metal receiving bolts and pins, namely cotter pins; metal screw nuts; snap locks of metal for doors, door handles of metal, drawer handles of metal, window handles of metal, rod ends with ball bearing.

Class 07

(2) Stop pieces being parts of metalworking machines; fork-like bearing housings being parts of machines; spring plungers being parts of machines, thrust pieces being parts of machines, spring-loaded thrust pieces being part of machines; clamping levers for machines, tensioning levers for machines; hand cranks for machines; hand wheels for machines; knobs for machines, turning knobs for machines; handcranks being part of machines; nuts being part of machines; ratchets being parts of machines; clamping joints being parts of machines; handlebars and clamps for machine tools and for hand-operated and mechanical tools, and parts therefor, in particular clamping irons, clamping lugs, clamping flaps and clamping supports all being parts of metalworking machines; pipe clamps being parts of metalworking machines; parts of metalworking machines; airbag plates, base plates, suspended support elements, stop and support pieces, extensions, all the aforesaid goods being parts for metalworking machines; arresting elements, receiving bolts, pins, positioning elements for grooves, positioning and clamping systems, stops, all the aforesaid goods being parts for metalworking machines; clamping hooks, height elements, eccentric clamping levers, eccentric clamping units, draw-down clamps, wedge type clamping segments, compensating clamps, mechanical and hydraulic clamping units, multiple clamping systems, displacement units (parts of machines), all the aforesaid goods also being in modular form, articulated lever and quick-fit clamps, all the aforesaid goods being parts for metalworking machines; permanent magnets for fixing structures or workpieces, being parts of metalworking machines; grips for flat and rod type materials in the nature of jigs for holding a component during machining; load-lifting means in the nature of lift chains and hydraulic lifts and electric lifts being parts of machines; pot and stud type magnets for fixing structures or workpieces, being parts of metalworking machines; carriage guides for metalworking machines, hydraulic and electric linear actuators, other than for land vehicles, guide rails for metalworking machines; shaft connections in the form of compensating shaft couplings, couplings for machines, conical clamping rings being parts of machines, universal and ball-and-socket joints being parts of machines; angular joints being parts of machines, levelling sets for mounting, levelling and aligning motors, aggregates, drive units and assembly lines for industrial machinery, positioning rings of metal (not O-rings) being machine parts, drill chucks being parts of machines; hydraulic elements, namely oil filters for hydraulic press brakes, oil filters for hydraulic steering, oil filters for travel mechanisms, hydraulic motors for metalworking machines, hydraulic control valves for machines and motors, hydraulic door openers and closers (parts of machines), mechanical, pneumatic, hydraulic control valves for industrial robots, springs being parts of machines.

Class 08

(3) Stop pieces, fork-like pieces, pressure pieces, pressure journals, centring and fixing pieces, operating pieces and arresting elements, namely handles, levers, cranks, wheels, knobs, centring pins, bars, handlebars and clamps for hand-operated hand tools, and parts therefor, in particular clamping irons, clamping lugs, clamping flaps and clamping supports, positioning elements for grooves, positioning and clamping systems in the nature of hand-operated hand tools, featuring stops, clamping hooks, height elements, eccentric clamping levers, eccentric clamping units, draw-down clamps, wedge type clamping segments, compensating clamps, mechanical and hydraulic

clamping units, multiple clamping systems in the nature of hand-operated hand tools, displacement units being parts of hand-operated hand tools, all the aforesaid goods also being in modular form, articulated lever and quick-fit woodworking and metalworking clamps, adjustable and engage-able hand clamps for woodworking and metalworking, ratchets, clamping joints for woodworking and metalworking, angular joints being parts for hand tools, articulation heads being parts for hand tools, height adjustment handles for hand tools, positioning rings in the nature of cutting guides for use with hand-operated tools, drilling clamps for woodworking and metalworking, tool handles of metal.

Class 09

(4) Programmes recorded on data media for data-processing (software), namely software for computer aided design, software for retrieving product specifications such as geometric dimensions and material; apparatus for measuring and testing, namely measuring slides calipers, measuring micrometer screws, measuring dial gauges, measuring optical tables, gauge blocks, slip gauge, angle gauges, angle finders, rulers, standardised elements for inspection and testing devices, namely measurement gauge screw systems in the nature of micrometer gauges, holders for measuring dial gauges, ultrasound probes not for medical use, scientific prisms, measurement chromatography columns for laboratory use, measurement apparatus, consisting of centring tips being parts of measuring rules; retention magnets for industrial purposes.

Class 12

(5) Hydraulic circuits for vehicles.

Class 20

(6) Profile strips for machine frames (borders), pipe clips for securing pipes, rods for use in building plastic structures/frameworks, all the aforesaid goods being parts of feet for furniture, support elements for use in workpiece machining and workpiece processing for non-metal workpieces, table leaves, strips for picture frames; bases, angles, supports, support elements, for use in building plastic structures/frameworks, all the aforesaid goods being parts of feet for furniture, feet for furniture; non-metal anchor bushings, non-metal self-tapping bushings, non-metal threaded bushings, non-metal screws, non-metal nuts, securing means for screws and nuts in the nature of non-metal disc and non metal bolts, non-metal clamps for holding non-metal nuts, threaded bushes in the nature of non-metal hardware for repairing damaged threaded components, non-metal eye nuts, discs in the nature of non-metal washers, clamping angles being parts for non-metal pipe clamps, non-metal threaded cotter pins, non-metal threaded rods, curved load-bearing members in the nature of non-metal braces for handling loads, non-metal load-bearing ring bolts, clamping screw set consisting of non-metal bolts, nuts, and screws, non-metal screws and bolts bearing a fluting; operating parts such as star-like, knurled, cylindrical, mushroom-like, curved, conical, ball type, wing type and rotating handles, hand wheels, handcranks, ratchets, handlebars, clamping articulations, all the aforesaid goods being fittings for furniture; drilling plates, drilling bushings, drilling devices (drilling clamping means), prisms, support blocks, closure caps, all the aforesaid goods being fittings for furniture and made of plastics; pallets for machine tools, none being of metal; receiving bolts and pins, none being of metal, namely cotter pins, not of metal; screw nuts, none being of metal.

Colour Claim

Colour is claimed as a feature of the trademark. The mark consists of a brown banner with the word "MONSTER", in white block letters. The words "Tree Service" are below the banner in brown. To the left of the banner stands a green monster with two brown eyeballs on antennae over a brown work helmet. The monster's mouth is brown and appears as a squiggly line. The monster's left hand is resting on the top corner of the brown banner over the letter "M" and its right arm is akimbo with its right hand holding a pole clip that is in brown with white circles and a green rope. On the monster's left and behind the banner at the left end of the banner is a pine tree in the same green as the monster with a brown trunk appearing below the banner.

BABIATORS

Trademark Description

The mark consists of the word BABIATORS in bold, stylized font. There is a narrow horizontal gap between the top of the vertical line at the left of the B and the top horizontal line in the B. The top horizontal line extends to the left of the vertical line, and there is an extension to the left from the top of the vertical line below the gap. These extensions resemble aviation wings, both having a straight line on top and curved line on the bottom that curves up to meet the straight line in a point. The horizontal line at the top of the T tapers at both ends, with the top of the line being straight and the bottom of the line curving up to meet the top line, creating the impression of aviation wings.

Certification Mark Standard

The use of the certification mark is intended to indicate that the specific goods listed in association with which the trademark is used are of the following defined standard: The use of the certification mark is granted by Demeter Canada, the certifying body in Canada, to individuals whose operations and products have been inspected and approved as meeting the Demeter International Standards for a minimum of two years. The word DEMETER indicates to the purchaser of the specific listed goods that biodynamic agricultural methods, in accordance with the teachings of Dr. Rudolf Steiner, have been applied in the production and processing of those goods under the guidance of Demeter Canada in such a way that the trust of the purchaser in the biodynamic method and in the Demeter products is confirmed and justified that the goods are of a standard and quality that is in accordance with the Demeter International Standards. A copy of the Demeter International Standards (revised as of 2022) has been provided to the Canadian Intellectual Property Office and is available for inspection on request. The Biodynamic agricultural methods consist of practising agriculture in such a manner that it cares for the fertility of the soil, the plants, the seeds and propagating material, and the animals, and it is generally in harmony with local

conditions. Biodynamic production and processing standards require transparent product history from creation through to final product. Processed products include agricultural and animal products which originate from certified DEMETER biodynamic farms, and during processing the biodynamic qualities of the raw materials are maintained or enhanced. Additives and processing aids are generally avoided and if Demeter quality raw materials are not available then products inspected and certified by recognised organic associations and certification bodies may be used or products with a basic certification for common organic legal norms, such as the EU Regulation on organic farming, the National Organic Program (NOP), Japan Agricultural Standard (JAS) or equivalent organic legal norms.
