Trademarks Journal

Vol. 69 No. 3548

General Information

The *Trademarks Journal* (the “*Journal*”) is published on the website of the Canadian Intellectual Property Office (<http://cipo.gc.ca>). The *Journal* lists trademark applications advertised under subsection 37(1) of the *Trademarks Act* (the “*Act*”), public notices of prohibited marks under section 9 of the *Act*, statements of the Minister in respect of geographical indications under subsection 11.12(2) of the *Act*, as well as erratums to previous volumes.

Electronic *Trademarks Journal*

The *Journal* is available in PDF format and can be downloaded free of charge and viewed and printed with Adobe Acrobat Reader. The *Journal* is also available in a printable HTML format as an alternate official version that contains a search function to narrow and customize the content. The electronic form of the *Journal* is the official version.

Official Languages

The *Journal* is available in English and French. The details displayed for each application are based on the language of the application. If the language of the application is English, the goods, services, or other text and description appearing in the English version of the *Journal* are in the language filed by the applicant. If the language of the application is French, the goods, services, or other text and description appearing in the English version of the *Journal* have been translated. Any registration resulting from the application will be restricted to these goods or services as described in the language of the application.

Filing Dates

The filing date of each trademark application (including those to extend the statement of goods or services of an existing registration) is shown in the YYYY-MM-DD format.

Nice Classification

Where applicable and required, the *Journal* lists the goods or services of each application grouped according to the classes of the Nice Classification, each group being preceded by the number of the class of the Nice Classification to which that group of goods or services belongs and presented in the order of the classes of the Nice Classification.

Opposition

Any person who has a valid ground of opposition (see section 38 of the *Act* for the grounds of opposition) to any application for registration of a trademark or to any application for registration of a trademark extending the statement of goods or services advertised in this *Journal* may file a statement of opposition with the Registrar of Trademarks within two months from the date of issue of this publication. The prescribed fee must accompany the statement of opposition.

Combat management systems for ships, submarines and motor vehicles comprising computer software and hardware for managing the data that allows a ship, submarine or motor vehicle to operate, and managing control devices for ships, submarines and motor vehicles; computer hardware, and parts and fittings for all of the aforesaid; computer software for managing the data that allows a ship, submarine or motor vehicle to operate, and for managing control devices for ships, submarines and motor vehicles, as part of a combat management system; computer software for command and control systems within ships, submarines and motor vehicles; computer hardware for combat systems, and parts and fittings for all of the aforesaid; computer hardware for combat management systems, and parts and fittings for all of the aforesaid; weapon control systems, namely, computer software for controlling and operating deployment of missiles and projectiles; datalinks, namely, radio receivers and radio transmitters for installation within a ship, submarine or motor vehicle for wirelessly transmitting and receiving information and data about the vehicle, its occupants, and its environment, global positioning system (GPS) consisting of computers, computer software, transmitters, receivers, and network interface devices; weapon fire systems, namely, computer hardware and computer software for controlling and operating the deployment of missiles and projectiles; satellite navigation systems for ships and submarines; software and hardware for satellite navigation systems for ships and submarines; software and hardware for the integration of data that allows a ship or submarine to operate; computer software for the detection, identification and aural and electronic contact of targets; computer software for controlling the movement of a water vehicle, ship or submarine; computer software for controlling the operation of a water vehicle, ship or submarine; driver systems for autonomous vehicles;

mission planning software, namely, computer application software for route planning and driver assistance for use in ships, submarines and motor vehicles; weapon management systems, namely, computer hardware and computer software for controlling and operating deployment of missiles and projectiles; command and control systems, namely, computer hardware and computer software for controlling and operating ships, submarines and motor vehicles; electronic interface circuits, cards and boards for interfacing weapons to onboard control systems of marine vehicles, allowing the control and operation of weapons via control software; electrical and electronic sensors, namely, proximity sensors, temperature sensors, motion sensors, optical sensors, and parts and fittings for all of the aforesaid; sensors for determining the position of ships, submarines, vehicles, weapons, missiles and torpedoes, and parts and fittings for all of the aforesaid; infrared sensors, and parts and fittings for all of the aforesaid; ultrasonic sensors, and parts and fittings for all of the aforesaid; optical sensors, and parts and fittings for all of the aforesaid; sonar equipment, and parts and fittings for all of the aforesaid; meteorological instruments, and parts and fittings for all of the aforesaid; radio transmitters and receivers, and parts and fittings for all of the aforesaid; transmitters and receivers for transmission of and receipt of radio signals, and parts and fittings for all of the aforesaid; electronic data recorders for water and land vehicles, and parts and fittings for all of the aforesaid; software for data processing, namely, processing text and graphics; software for satellite navigation signal processing; data management systems, namely, computer hardware and software for database management; databuses, namely, computer subsystem that allows for the transferring of data from one component to another on a motherboard or system board; data processing apparatus for combat management, namely, central processing units and computer hardware, and parts and fittings for all of the aforesaid; computer software for making combat decisions; computer software for supporting the making of combat decisions; training simulators for submarine, ship and motor vehicle weapons systems, and parts and fittings for all of the aforesaid; computer software and hardware for tracking and locating the positions of motor vehicles, ships, submarines, weapons, missiles and torpedoes; computer hardware and software for visually identifying motor vehicles, ships, submarines, weapons, missiles and torpedoes; computer hardware and software for collating and displaying real time status of multiple data sets, aiding the making of combat decisions; computer hardware and software for use in the control and subsequent deployment of weapons aboard ships, submarines and motor vehicles; apparatus for recording, transmission or reproduction of sound, images or data, namely, digital sound and video recorders, signal processors, radar transmitters and satellite transmitters, and parts and fittings for all of the aforesaid; display monitors for displaying images or data, and parts and fittings for all of the aforesaid; multi-function displays, namely, display screens and electronic touch screen displays, and parts and fittings for all of the aforesaid; data display controllers, namely, computer software and hardware for manipulating the data displayed on display screens and electronic touch screen displays; heads-up displays for ships, submarines and motor vehicles, and parts and fittings for all of the aforesaid; radars, and parts and fittings for all of the aforesaid; radars for ships, and parts and fittings for all of the aforesaid; radars for submarines, and parts and fittings for all of the aforesaid; radar detectors, and parts and fittings for all of the aforesaid; radar jammers, and parts and fittings for all of the aforesaid; local area network operating software and access points for ships and submarines; missile trackers, and parts and fittings for all of the aforesaid; missile decoys, and parts and fittings for all of the aforesaid; accelerometers, and parts and fittings for all of the aforesaid; ship and submarine control panels, and parts and fittings for all of the aforesaid; laser warning receivers, and parts and fittings for all of the aforesaid; laser decoys, and parts and fittings for all of the aforesaid; radio frequency decoys, and parts and fittings for all of the aforesaid; intercoms for ships and submarines, and parts and fittings for all of the aforesaid; computer software for managing communication networks within or between ships or submarines; computer

software for training users in the maintenance of water vehicles, ships or submarines; computer software for training users in the use of water vehicles, ships or submarines; computer software for generating digital maps and terrain; computer software for testing electrical circuits, outlets and power.

Services

Class 37

(1) Construction, servicing, installation, maintenance, repair, re-fitting, refurbishment, renovation and upgrading of combat management systems for ships, submarines and motor vehicles comprising computer hardware for managing the data that allows a ship, submarine or motor vehicle to operate, and managing control devices for ships, submarines and motor vehicles, computer hardware, and parts and fittings for all of the aforesaid, computer hardware for combat systems, and parts and fittings for all of the aforesaid, computer hardware for combat management systems, and parts and fittings for all of the aforesaid, datalinks, namely, radio receivers and radio transmitters for installation within a ship, submarine or motor vehicle for wirelessly transmitting and receiving information and data about the vehicle, its occupants, and its environment, global positioning system (GPS) consisting of computers, transmitters, receivers, and network interface devices, weapon fire systems, namely, computer hardware for controlling and operating the deployment of missiles and projectiles, satellite navigation systems for ships and submarines, driver systems for autonomous vehicles, weapon management systems, namely, computer hardware for controlling and operating deployment of missiles and projectiles, command and control systems, namely, computer hardware for controlling and operating ships, submarines and motor vehicles, electrical and electronic sensors, namely, proximity sensors, temperature sensors, motion sensors, optical sensors, and parts and fittings for all of the aforesaid, electronic data recorders for water and land vehicles, and parts and fittings for all of the aforesaid, data management systems, namely, computer hardware for database management, signal processors, and parts and fittings for all of the aforesaid, databuses, namely, computer subsystem that allows for the transferring of data from one component to another on a motherboard or system board, data processing apparatus for combat management, namely, central processing units and computer hardware, and parts and fittings for all of the aforesaid, electronic interface circuits, cards and boards for interfacing weapons to onboard control systems of marine vehicles, allowing the control and operation of weapons via control software, training simulators for submarine, ship and motor vehicle weapons systems, and parts and fittings for all of the aforesaid, computer hardware for tracking and locating the positions of motor vehicles, ships, submarines, weapons, missiles and torpedoes, and parts and fittings for all of the aforesaid, computer hardware for visually identifying motor vehicles, ships, submarines, weapons, missiles and torpedoes, and parts and fittings for all of the aforesaid, computer hardware for collating and displaying real time status of multiple data sets, aiding the making of combat decisions, and parts and fittings for all of the aforesaid, computer hardware for use in the control and subsequent deployment of weapons aboard ships, submarines and motor vehicles, and parts and fittings for all of the aforesaid, apparatus for recording, transmission or reproduction of sound, images or data, namely, digital sound and video recorders, signal processors, radar transmitters and satellite transmitters, and parts and fittings for all of the aforesaid, display monitors for displaying images or data, and parts and fittings for all of the aforesaid, multi-function displays, namely, display screens and electronic touch screen displays, and parts and fittings for all of the aforesaid, data display controllers, namely, computer hardware for manipulating the data displayed on display screens and electronic touch screen displays, heads-up displays for ships, submarines and motor vehicles, and parts and fittings for all of the aforesaid, radars, and parts and fittings for all of the aforesaid, radars for ships, and parts and fittings for all of the aforesaid, radars for submarines, and parts and fittings for all of the

aforesaid, radar detectors, and parts and fittings for all of the aforesaid, radar jammers, and parts and fittings for all of the aforesaid, missile trackers, and parts and fittings for all of the aforesaid, missile decoys, and parts and fittings for all of the aforesaid, accelerometers, and parts and fittings for all of the aforesaid, ship and submarine control panels, and parts and fittings for all of the aforesaid, laser warning receivers, and parts and fittings for all of the aforesaid, laser decoys, and parts and fittings for all of the aforesaid, radio frequency decoys, and parts and fittings for all of the aforesaid, intercoms for ships and submarines, and parts and fittings for all of the aforesaid, sensors for determining the position of ships, submarines, vehicles, weapons, missiles and torpedoes, and parts and fittings for all of the aforesaid, infrared sensors, and parts and fittings for all of the aforesaid, ultrasonic sensors, and parts and fittings for all of the aforesaid, optical sensors, and parts and fittings for all of the aforesaid, sonar equipment, and parts and fittings for all of the aforesaid, meteorological instruments, and parts and fittings for all of the aforesaid, radio transmitters and receivers, and parts and fittings for all of the aforesaid, transmitters and receivers for transmission of and receipt of radio signals, and parts and fittings for all of the aforesaid, computer hardware for satellite navigation systems for ships and submarines, and parts and fittings for all of the aforesaid, computer hardware for the integration of data that allows a ship or submarine to operate, and parts and fittings for all of the aforesaid, and information, advice and consultancy relating to all of the aforesaid.

Class 42

(2) Design, development, integration and testing of combat management systems for ships, submarines and motor vehicles comprising computer software and hardware for managing the data that allows a ship, submarine or motor vehicle to operate, and managing control devices for ships, submarines and motor vehicles, computer hardware, and parts and fittings for all of the aforesaid, computer hardware for combat systems, and parts and fittings for all of the aforesaid, computer hardware for combat management systems, and parts and fittings for all of the aforesaid, weapon control systems, namely, computer software for controlling and operating deployment of missiles and projectiles, datalinks, namely, radio receivers and radio transmitters for installation within a ship, submarine or motor vehicle for wirelessly transmitting and receiving information and data about the vehicle, its occupants, and its environment, global positioning system (GPS) consisting of computers, computer software, transmitters, receivers, and network interface devices, weapon fire systems, namely, computer hardware and computer software for controlling and operating the deployment of missiles and projectiles, satellite navigation systems for ships and submarines, driver systems for autonomous vehicles, weapon management systems, namely, computer hardware and computer software for controlling and operating deployment of missiles and projectiles, command and control systems, namely, computer hardware and computer software for controlling and operating ships, submarines and motor vehicles, electrical and electronic sensors, namely, proximity sensors, temperature sensors, motion sensors, optical sensors, and parts and fittings for all of the aforesaid, electronic data recorders for water and land vehicles, and parts and fittings for all of the aforesaid, data management systems, namely, computer hardware and software for database management, signal processors, and parts and fittings for all of the aforesaid, databuses, namely, computer subsystem that allows for the transferring of data from one component to another on a motherboard or system board, data processing apparatus for combat management, namely, central processing units and computer hardware, and parts and fittings for all of the aforesaid, electronic interface circuits, cards and boards for interfacing weapons to onboard control systems of marine vehicles, allowing the control and operation of weapons via control software, training simulators for submarine, ship and motor vehicle weapons systems, and parts and fittings for all of the aforesaid, computer hardware for tracking and locating the positions of motor vehicles, ships, submarines, weapons, missiles and

torpedoes, and parts and fittings for all of the aforesaid, computer hardware for visually identifying motor vehicles, ships, submarines, weapons, missiles and torpedoes, and parts and fittings for all of the aforesaid, computer hardware for collating and displaying real time status of multiple data sets, aiding the making of combat decisions, and parts and fittings for all of the aforesaid, computer hardware and software for use in the control and subsequent deployment of weapons aboard ships, submarines and motor vehicles, apparatus for recording, transmission or reproduction of sound, images or data, namely, digital sound and video recorders, signal processors, radar transmitters and satellite transmitters, and parts and fittings for all of the aforesaid, display monitors for displaying images or data, and parts and fittings for all of the aforesaid, multi-function displays, namely, display screens and electronic touch screen displays, and parts and fittings for all of the aforesaid, data display controllers, namely, computer software and hardware for manipulating the data displayed on display screens and electronic touch screen displays, and parts and fittings for all of the aforesaid, heads-up displays for ships, submarines and motor vehicles, and parts and fittings for all of the aforesaid, radars, and parts and fittings for all of the aforesaid, radars for ships, and parts and fittings for all of the aforesaid, radars for submarines, and parts and fittings for all of the aforesaid, radar detectors, and parts and fittings for all of the aforesaid, radar jammers, and parts and fittings for all of the aforesaid, local area network operating software and access points for ships and submarines, missile trackers, and parts and fittings for all of the aforesaid, missile decoys, and parts and fittings for all of the aforesaid, accelerometers, and parts and fittings for all of the aforesaid, ship and submarine control panels, and parts and fittings for all of the aforesaid, laser warning receivers, and parts and fittings for all of the aforesaid, laser decoys, and parts and fittings for all of the aforesaid, radio frequency decoys, and parts and fittings for all of the aforesaid, intercoms for ships and submarines, and parts and fittings for all of the aforesaid, sensors for determining the position of ships, submarines, vehicles, weapons, missiles and torpedoes, and parts and fittings for all of the aforesaid, infrared sensors, and parts and fittings for all of the aforesaid, ultrasonic sensors, and parts and fittings for all of the aforesaid, optical sensors, and parts and fittings for all of the aforesaid, sonar equipment, and parts and fittings for all of the aforesaid, meteorological instruments, and parts and fittings for all of the aforesaid, radio transmitters and receivers, and parts and fittings for all of the aforesaid, transmitters and receivers for transmission of and receipt of radio signals, and parts and fittings for all of the aforesaid, computer hardware for satellite navigation systems for ships and submarines, and parts and fittings for all of the aforesaid, computer hardware for the integration of data that allows a ship or submarine to operate, and parts and fittings for all of the aforesaid, and information, advice and consultancy relating to all of the aforesaid; design, development, installation, integration, testing, maintenance, support, repair, updating and upgrading of computer software for managing the data that allows a ship, submarine or motor vehicle to operate, and for managing control devices for ships, submarines and motor vehicles, as part of a combat management system, software for satellite navigation systems for ships and submarines, software for the integration of data that allows a ship or submarine to operate, software for the detection, identification and aural and electronic contact of targets, software for controlling the movement of a water vehicle, ship or submarine, software for controlling the operation of a water vehicle, ship or submarine, mission planning software, namely, computer application software for route planning and driver assistance for use in ships, submarines and motor vehicles, software for data processing, namely, processing text and graphics, software for satellite navigation signal processing, software for making combat decisions, software for supporting the making of combat decisions, software for tracking and locating the positions of motor vehicles, ships, submarines, weapons, missiles and torpedoes, software for visually identifying motor vehicles, ships, submarines, weapons, missiles and torpedoes, software for collating and displaying real time status of multiple data sets, aiding the making of combat decisions, software for use in the control

and subsequent deployment of weapons aboard ships, submarines and motor vehicles, software for managing communication networks within or between ships or submarines, software for training users in the maintenance of water vehicles, ships or submarines, software for training users in the use of water vehicles, ships or submarines, software for generating digital maps and terrain, software for testing electrical circuits, outlets and power, and information, advice and consultancy relating to all of the aforesaid; construction, servicing, installation, maintenance, repair, re-fitting, refurbishment, renovation and upgrading of combat management systems for ships, submarines and motor vehicles comprising computer software for managing the data that allows a ship, submarine or motor vehicle to operate, and managing control devices for ships, submarines and motor vehicles, weapon control systems, namely, computer software for controlling and operating deployment of missiles and projectiles, global positioning system (GPS) consisting of computer software, weapon fire systems, namely, computer software for controlling and operating the deployment of missiles and projectiles, weapon management systems, namely, computer software for controlling and operating deployment of missiles and projectiles, command and control systems, namely, computer software for controlling and operating ships, submarines and motor vehicles, data management systems, namely, software for database management, data display controllers, namely, computer software for manipulating the data displayed on display screens and electronic touch screen displays, heads-up displays for ships, submarines and motor vehicles, local area network operating software for ships and submarines, and information, advice and consultancy relating to all of the aforesaid.

Colour Claim

Colour is claimed as a feature of the trademark. The trademark combines with 3 blocks. Facing to the front, from the left to the middle and to the right, the color of the blocks like this: For the left side's block, the top surface's color is green and combined with blue color pattern. The bottom part are 2 surfaces with orange color. For the middle side's block, it only shows the top surface. The surface's color is green and combined with blue color pattern. For the right side's block, the top surface's color is green and combined with blue color pattern. The bottom part are 2 surfaces with orange color. For those three top surfaces of the blocks: The color are connected together, the blue color represents the land and the green color represents the ocean. The divided lines connected those 3 blocks are white color. There are another 3 divided white line on the top surface area of the right side's block. It looks similarly like a upside down "Y". It is the diagonal of that surface area. The diagonal line starts from the vertex, it passes half way of the surface area, but it does not go all the way to the end. It becomes two bifurcated line and end to reach two edges of the surface area. These 3 white lines divide the surface area into three parts: two same size right-angled trapezoids and one small square. The color of the character "Wil-Can" is orange.

Erratum

The following issues of the Trademarks Journal contained errors which could not be corrected before publication.

2022-09-21**Application Number** 1,946,440

The trademark was incorrectly advertised in the Trademarks Journal dated September 21, 2022, Vol. 69 Issue 3543. The visual representation of the trademark should have been advertised in colour.
