1993-03-23

Dear M. Chevalier:

This is in response to your recent notification given in accordance with the Electricity and Gas Inspection Regulations, Section 13, regarding devices approved under Notice of Approval E-280. It is noted that these devices are to be modified as follows:

- Meters may include a modified demand reset mechanism. The effect of the modification is to prevent access to the alternate display mode of the meter when the meter cover is in place.

I am advised by the Electrical Metrology Laboratory that their evaluation of the proposed modifications indicates that they may be regarded as immaterial in relation to the approval provisions of the Act. Accordingly, your notification is acknowledged and the modifications are accepted as being included within the above-noted approval. All recipients of the approval notice are being informed by copy of this letter.

Yours truly,

H. L. Fraser,
Chief, Electricity and Gas
