Re: SL-100-3131 - two only (SL-100-3131)  
Type "SL-15" Outdoor Composite Oil-filled current  
transformers - special order SL-100-3131-1-1024

Dear Sirs:

This is to advise that special approval has been granted by the Standards Branch for use in Canada for the only type "SL-15" SL-15/3000, 3000 volt outdoor composite oil-filled transformers. The order reference, serial numbers SL-100-3131-1-1024 are for the outdoor composite tower to be used on the SL-100-3131, 3000.

The characteristics of each secondary tap are substantially the same as those of the primary secondary, 1150 volts with a tap ratio approved under SL-100-3131 (Canada). The design is the same, but the tap ratio above turns are 1150 instead of 1150 and the same tap ratio is increased to compensate for the increase in voltage turns. The secondary accuracy is 0.3%, 0.1, 0.5, 0.2, 0.1 (0.2), 0.2 at 1150 volts and the tap ratio of the nameplate is marked 0.2%.

Very truly yours,

W. H. ...  
S. J. ...
