Ottawa, January 18, 1967.

The Toronto Hydro Electric System,  
14 Carlton Street,  
Joseph Gibbons Building,  
TORONTO 2, Ontario.

Attention: Mr. A. D. Macpherson,  
Engineer, Meter Department.

SPECIAL APPROVAL - Sangamo Type "WH-11" Time Switch

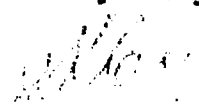

Dear Sirs:

This is to advise that Special Approval has been granted by the Standards Branch for use in Canada for billing purposes to a Sangamo type "WH-11" Time Switch and a Struthers-Dunn type "SABXD-111" Relay in a dual-rate metering circuit which includes a Sangamo type "ED-30" polyphase demand-energy meter, a Sangamo type "S-3" polyphase watt-hour meter and a Sangamo type "SC-1" graphic meter.

The approval covers the use of these devices in the specific circuit and in the specific manner as outlined by the Toronto Hydro Electric System to the Toronto District Office. Substitution of any components in the circuit or changes in the operating details will invalidate the approval.

It is required also that the Time Switch and Relay be provided with means for sealing by a utility seal.

Yours very truly,

  
K. Cryer, Chief,  
Electricity and Gas Division,  
Standards Branch.
