Attention: Mr. A.L. Dudiak  
Canadian Works Director,

Re: Application for Approval of Modified "Orifice Valve" sizes 2, 3 and 4 inch

Dear Mr. Dudiak:

This letter is in response to your letter dated December 14, 1984, regarding a modification to the type/models of meters described above, which are currently approved in Notice of Approval G-28. I am advised that the Gas Laboratory has evaluated the modification, of incorporating an internal ball stop, consisting of (i) Two  $\frac{1}{2}$  inch - 20 NF set screws, with locking pellets;

(ii) Two  $\frac{1}{2}$  inch - 20 UNF end plugs, drilled for sealing purposes;

(iii) Additional locating pin on the by-pass ball; and

(iv) Indicator ball stop plate.

The conclusion is that it may be regarded as insignificant, in relation to the approval provisions of the Gas Inspection Act.

Accordingly, pursuant to the authority delegated to me by the Director under section 7 of the Gas Inspection Regulations;

1. your letter is hereby acknowledged as satisfying the notification requirements of subsection 7(2) of the regulations; and
2. the proposed alteration is hereby accepted, in accordance with subsection 7(3) of the Regulations, as being an immaterial one and hence included within the approval.

All recipients of Notices of Approval under the Gas Inspection Act are being informed of this decision by copy of this letter. For our records you are requested to advise us of the starting serial numbers when the change is initiated in production.

Yours truly,

W.R. Virtue

Attn: Mr. A.L. Dudiak, Canadian Works Director

Re: Inclusion of an Addition Working Pressure Rating for the Camco Orifice Valve and Orifice Door Models of Approved Orifice Fittings

Dear Mr. Dudiak:

This letter is in response to your letter dated May 22, 1985, regarding a modification to the type/models of meters described above, which are currently approved in Notices of Approval G-28, dated August 4, 1966. I am advised that the Gas Laboratory has evaluated the modification, of including a pressure rating of 2500 LB. A.N.S.I. - 6000 p.s.i. C.W.P. for the 2 inch size of meters. The conclusion is that it may be regarded as insignificant, in relation to the approval provisions of the Gas Inspection Act.

Accordingly, pursuant to the authority delegated to me by the Director under section 7 of the Gas Inspection Regulations;

1. your letter is hereby acknowledged as satisfying the notification requirements of subsection 7(2) of the regulations; and
2. the proposed alteration is hereby accepted, in accordance with subsection 7(3) of the Regulations, as being an immaterial one and hence included within the approval.

All recipients of Notices of Approval under the Gas Inspection Act are being informed of this decision by copy of this letter. For our records you are requested to advise us of the starting serial numbers of both models/types of meters having the new pressure rating.

Yours truly,

W.R. Virtue  
Chief,  
Legal Metrology Laboratories
