NOTICE OF APPROVAL  
AVIS D'APPROBATION

G-39-2

Ottawa, May 6, 1976

CANADIAN METER COMPANY, BASE PRESSURE INDEX  
TYPE 5

This approval is supplementary to Circulars G-39, dated January 30, 1969 and G-39-1, dated April 11, 1973.

Apparatus

Canadian Meter Company Base Pressure Index, as covered under Notices of Approval G-39 and G-39-1. Except for the modification described below, all details of the apparatus, as outlined in the aforementioned Circulars, still apply.

Modification

The Notice of Approval G-39-1 delineates various changes that were introduced in 1973 to the Base Pressure Index Type 4. At that time the manufacturer did not consider changing the type designation of the device. Some modified instruments carrying the Type 4 designation have been manufactured and sold since then. However, with further modifications in sight the manufacturer has recently decided to change the type designation of this device.

All Base Pressure Indices manufactured with a transparent Lexan door and carrying serial numbers from 12711 through 13099 inclusive have been released from production with Type 4 designation. This type designation will be changed to Type 5 when the above devices are brought in for overhaul, repair or re-verification. The manufacturer has advised pertinent utilities accordingly.
