Canadian Meter Co.
3037 Derry Road, West
Milton, Ontario
L9T 2X6
Attn.: Mr. G. Wilson

Dear Mr. Wilson,

This is in response to your recent notification given in accordance with the Electricity and Gas Inspection Regulations, Section 13, regarding devices approved under Notices of Approval G-205, G-233 and G-238. It is noted that these devices are to be modified as follows:

- The 1.2 software package, previously approved for use in ELSA Electronic Volume Correctors, has had the value of the high pressure alarm setting increased from 184.5 psig to 194.5 psig. This modified software package is identified by Canadian Meter Co. as #1.3. The modification does not, in any way, influence the calculation of corrected volume by the Electronic Volume Corrector.

I am advised by the Gas Metrology Laboratory that their evaluation of the proposed modifications indicates that they may be regarded as immaterial in relation to the approval provisions of the Act. Accordingly, your notification is acknowledged and the modifications are accepted as being included within the above-noted approval. All recipients of the approval notice are being informed by copy of this letter.

Yours truly,

W.R. Virtue, Chief
Legal Metrology Laboratories
