

The recorder may be used for flush or yoke mounting and is available in die-cast aluminum case, either round or rectangular.

Mechanical or electrical clocks provide the chart drive. An eccentric screw on one mounting post of the drive permits adjustment of pen arcing. A collapsible push-pull type of hub attaches a recording chart to the driving mechanism.

Application: Measurement in distribution service of gas.

NOTE: This circular replaces circular SD-GA.136 previously issued on March 11, 1958.
