

SFG-32

SR-16-1
SL-100-SFG

OTTAWA, September 29, 1969.

TEMPORARY SPECIAL APPROVAL

Granted to: Northern & Central Gas Corp. Ltd.,
P.O. Box 1040,
North Bay, Ontario.

Subject: Metal sealing caps for use on meters manufactured
by Canadian Meter Company.

Attention: Mr. K. Crown,
Measurement Superintendent,
Northern & Central Gas Corp.

Temporary Special Approval is hereby granted by the Standards Branch to Northern and Central Gas Corp. Ltd., to use a metal cap on certain screws on domestic type gas meters as part of the means of sealing the meters against tampering. This approval is granted with the following limitations:

- (1) A period terminating June 30, 1970, shall be considered a trial period for this method. Some time prior to the end of this period the method will be re-evaluated and the approval will be extended or rescinded as the facts warrant.
- (2) The metal cap seal shall only be applied to appropriately shaped screws on the main body of the meter. The hand-hole in the top of the meter and the register cover shall together be sealed by means of a separate wire and lead seal.
- (3) The caps and screws used in this method shall be supplied by and applied in the manner prescribed by Canadian Meter Company.
- (4) This method shall only be used on designated types of meters manufactured by the Canadian Meter Company. A list of suitable types of meters will be furnished to the district office.

W. J. S. Fraser,
Chief, Electricity and Gas Division,
Standards Branch.
