OTTAWA, March 21, 1949

NOTIFICATION OF TYPE LISTING

Under the provisions of the appropriate Act the apparatus specified and illustrated herein has been listed as a Class A device, and may be used in Canada in accordance with the conditions applicable to this classification.

Authority: Weights and Measures Act, Chapter 212, R.S. 1927, and Regulations thereunder (P.C. 3459).

Apparatus Listed: Portable-Platform Beam Scale, manufactured by the Renfrew Machinery Company, Limited, Renfrew, Ont.

Rating of Apparatus: 1200 lb capacity.

Application: Weighing of commodities in general trade.

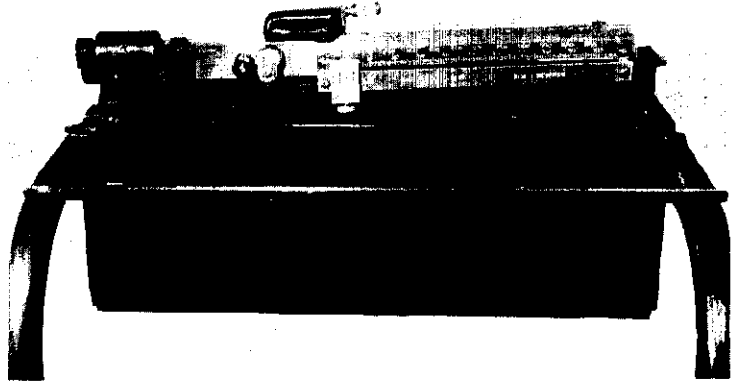

Conditions: As prescribed in P.C. 3459.

Description: This scale is built in the style of an industrial two-wheel, hand truck. The platform is made of wood, cross-braced and is mounted on a combination steel and cast iron framework which is equipped with hardwood handles and mounted on a two-wheel axle. The platform has four-point support. Hardened steel bearings and knife-edges are provided. A lever mechanism transmits motion. The scale has a notched, cast iron main beam which is fitted with a large cast iron poise, and a graduated brass beam which is fitted with a sliding brass poise having a set-screw locking device.

Testing: The standard tests for a portable-platform-beam scale will apply.

J. L. Stiver,  
Acting Director,  
Standards Division.
