OTTAWA.....April 27th, 1950.

NOTIFICATION OF TYPE LISTING

Under the provisions of the appropriate Act, the apparatus specified and illustrated herein have been listed as Class A devices, and may be used in Canada in accordance with the conditions stated herein.

Authority: Weights and Measures Act, Chapter 212, R.S. 1927, and Regulations thereunder (P.C. 3459).

Apparatus Listed: Models VS 12; PV 24; 100 A; 120 A; 200 B; 300 BW; 500 B; and 800 AS Linear Measuring Machines manufactured by Marvel Rack Manufacturing Company, Minneapolis, Minn.

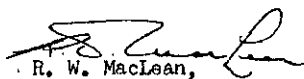

Rating of Apparatus: 12 ft. maximum registration.

Application: Measuring of screening materials in general trade.

Conditions: As prescribed in P.C. 3459 and provided that the rated capacity is permanently marked on the measuring head and the proper direction for rotation of the head is shown by an arrow.

Description: These measuring machines are wire screen racks equipped with a Marvel No. 63 Measuring Head. This measuring head consists of a serrated measuring wheel with an attached pinion which drives two indicating drums through a small gear train. One drum records the inches and is graduated in 1/8 in. divisions from 0 to 12 inches. The opposite drum records the feet and is graduated in 1 inch divisions from 0 to 12 feet.

Testing: The standard tests for a cylindrical, linear measuring device will apply.
