STANDARDS DIVISION

OTTAWA, August 16th, 1950.

NOTIFICATION OF TYPE LISTING

Under the provisions of the appropriate Act, the apparatus specified herein has been listed as a Class A device, and may be used in Canada in accordance with the conditions applicable to this classification.

Authority: Weights and Measures Act, Chapter 212, R.S. 1927, and Regulations thereunder (P.C. 3459).

Apparatus Listed: Type (S) Model 1000, Motor Truck Platform Scale equipped with capacity weighbeam Model (C) or Model (D) manufactured by Winslow Government Standard Scale Works, Inc., Terre Haute, Indiana.

Rating of Apparatus: 15 ton, 20 ton, and 30 ton Capacities.

Application: To weigh merchandise carrying vehicles.

Conditions: As prescribed in P.C. 3459.

Description: The Type (S) truck scale is of torsion lever design with center extension arm and transverse lever. There are two main levers. The torque tube and pivot housings are cast in one piece and the center extension of the main lever is bolted and keyed to a boss at the center of the torque tube. The center extension lever is made up of cast iron arms on a very heavy mild steel torque tube. The transverse lever is so shaped that it lays under and clear of the weighbridge. The scale is equipped with roller checks which lie in grooves in plates immediately above the main bearings. Both (C) and (D) type weighbeams are notched and main poise is fitted with ball bearing rollers and has a simple type of direct action latch.

Testing: The standard tests for a motor truck scale will apply.
