DEPARTMENT OF TRADE AND COMMERCE
STANDARDS DIVISION

OTTAWA, December 7th, 1950.

NOTIFICATION OF TYPE LISTING

Under the provisions of the appropriate Act, the apparatus specified and illustrated herein has been listed as a Class A device, and may be used in Canada in accordance with the conditions applicable to this classification.

Authority: Weights and Measures Act, Chapter 212, R.S. 1927, and Regulations thereunder (P.C. 3459).

Apparatus Listed: Model K, Eureka "O.K." Bagging Scale, manufactured by the S. Hewes Company, Incorporated, Silver Creek, N.Y., U.S.A.

Rating of Apparatus: 200 lbs. maximum capacity.

Application: Bagging rough ground or granular material.

Conditions: As prescribed in P.C. 3459, with the additional condition that the device be not used for bagging weights of less than 50 lbs.

Description: The device is basically a simple steelyard type with a beam of 25 lbs. capacity, graduated in $\frac{1}{4}$ lb. graduations and an ungraduated tare beam. The beam is equipped with counterpoise hanger and poise weights and an over and under indicator is mounted on the side of the hopper at eye level. The indicator is of conventional design and is actuated by a connection to the butt of the beam. Pivots and bearings are hardened and ground and are provided with dust excluders. The bell shaped chute is suspended by arms from the load pivots and is provided with a circular bag holding ring. The shut off gate is manually operated and swings in an arc about an axis point near the top of the hopper.

Testing: The standard tests for steelyard type scale shall apply and notice should be taken of the requirements of Part VI, Section 28, of P.C. 3459, respecting prepackaging tolerances.
