

CANADA
DEPARTMENT OF TRADE AND COMMERCE
STANDARDS DIVISION

OTTAWA, December 22nd, 1950.

NOTIFICATION OF LISTING

Under the provisions of the appropriate Act, the apparatus specified and illustrated herein has been listed as a Class A device, and may be used in Canada in accordance with the conditions stated herein.

Authority: Weights and Measures Act, Chapter 212, R.S. 1927, and Regulations thereunder (P.C. 3459).

Apparatus Listed: Beam type, platform or scoop, counter scale.
Models 88, 89 and 89K - 1lb. Capacity, $\frac{1}{2}$ oz. graduations.
Models 90, 91, 92, 93, 94 - Capacities: 2 lb. x $\frac{1}{4}$ oz.,
2 lb. x $\frac{1}{2}$ oz., 2 lb. x $\frac{3}{4}$ oz., 4 lb. x $\frac{1}{2}$ oz., 4 lb. x $\frac{3}{4}$ oz.,
respectively, manufactured by Triner Scale and Manufacturing
Company, 2714 West 21st. Street, Chicago, Illinois, U.S.A.

Rating of Apparatus: As detailed above.

Application: Weighing confectionery and similar commodities.

Conditions: As prescribed in P.C. 3459.

Description: The device is a simple lever beam type scale, with the platform or scoop support, as the case may be, being maintained in a horizontal position by a checking device. The beam is notched and the beam poise is fitted with a dog for engaging in the beam notches. The beam is steel, of hollow construction, and the balance ball within the beam is operated by a screw located within the beam and operated from the beam tip by a tool. An over and under knife edge indicator is inserted in the beam near the tip. Pivots and bearings are hardened steel and are self-aligning.
The platform or scoop, casing, and base, are manufactured from pressed sheet metal. Models listed are of identical design except that the commodity platform may vary in shape and design, and color of casing may also vary.

Testing: The standard tests for a counter scale of the simple lever non-computing type shall apply.
