#### Manufacturer:

Triner Scale and Manufacturing Company  
of Canada Limited  
150 Telson Road  
Markham, Ontario

#### Apparatus:

Computing Postal Scale

Avoirdupois Model AA-12

Metric Models ME-4 and ME-5

#### Rating or Capacity:

Model AA-12 12 pounds x 1/4 ounces

Model ME-4 4 kilograms x 10 grams

Model ME-5 5 kilograms x 10 grams

#### Application:

Mail weighing and the determination of postal charges.

#### Description:

This device is a single steelyard type scale with the platform maintained in a horizontal position by a checking device. The beam is notched to accommodate the poise dog. The steel beam is of hollow construction and the balance bell, within the beam, is operated by a slotted screw located at the beam tip. The general design is similar to scales listed on SD-WA. 76 except that it is equipped with a hanger located near the beam tip which may accommodate two proportional weights, each representing 4 lbs. of weight on the platform.
