Approved Accessories: These units can be used with any approved compatible accessory.

Application: The weighing of commodities in trade.

Device Description: These devices are electronic self-contained dormant platform scales utilizing one(1) bending beam load cell which is connected to a parallel plate design assembly which supports the load receiving element. These devices are designed for flush floor mounting.

The basic model is a 70-4100-2 which is supplied with a steel pit form, checkered steel deck plate and a standard steel scale understructure. The model H70-4100-2 is designed as a hostile environment scale and is supplied in stainless steel.

Special Conditions:

- (1) This approval covers 10 devices only. Each device sold must be reported to the Chief, Weights and Measures by the manufacturer or distributor.
- (2) No device shall be sold for use in trade without written disclosure to the purchaser prior to the sale, that the device has received only temporary approval.
- (3) This approval to expire one year from date of issue.
