Weight Printer.

Single or Double Beam with counterpoise weights.

Full Capacity Beam.

Type Registering Beam.

Rating: Maximum capacities are as listed above.

Application: The weighing of commodities in trade.

Description: These scales are equipped with two load levers of "A" shape and cast construction. Scale load is applied to the lever system by means of self-aligning suspension links, designated as Fairbanks Morse Type "S".

Lever systems are supported and enclosed in a sheet steel housing. On models 12138 to 12142 inc., the housing is extended to provide a common mounting structure for the levers and indicator. These models can be mounted on the floor or in a pit.

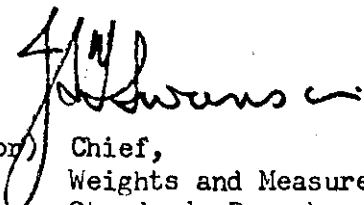

Models 12143 to 12147 inc. have the indicator mounted separately from the lever housing, and are intended for pit installation only.

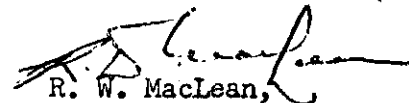

Testing: The standard tests for platform floor scales shall apply.
