APPROVAL LISTINGEASTERN SCALE -- WESTERN SCALERAILWAY TRACK SCALES

Under the provisions of the Weights and Measures Act, Chapter 292, R.S.C. 1952, and Regulations thereunder (P.C. 6894), the apparatus specified and illustrated herein have been listed as approved devices and may be used in Canada in accordance with the conditions applicable.

Apparatus Listed: Four Section Railway Track Scales, Models 12050-RS, 12056-RS, 12060-RS, 15050-RS, 15051-RS, 15052-RS, 15053-RS, 15056-RS, 15057-RS, 15058-RS, 15059-RS, 15060-RS, 20050-RS, 20051-RS, 20052-RS, 20053-RS, 20056-RS, 20060-RS, 20066-RS, 20072-RS, 20073-RS, 20074-RS, equipped with beam, manufactured by Eastern Scale Works Limited, 30 Carnforth Road, Toronto 16, Ontario, and Western Scale Company Limited, 680 Industrial Avenue, Vancouver 10, B.C.

When the symbol C.D. is used after the model number, it indicates cabinet dial head.

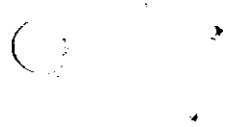

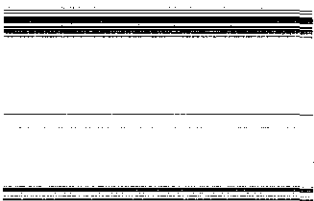

Rating of Apparatus: from 100 to 250 tons.

Application: Static weighing of railway rolling stock and weighing of loaded or unloaded vehicles in general trade use.

Conditions: As prescribed in P.C. 6894.

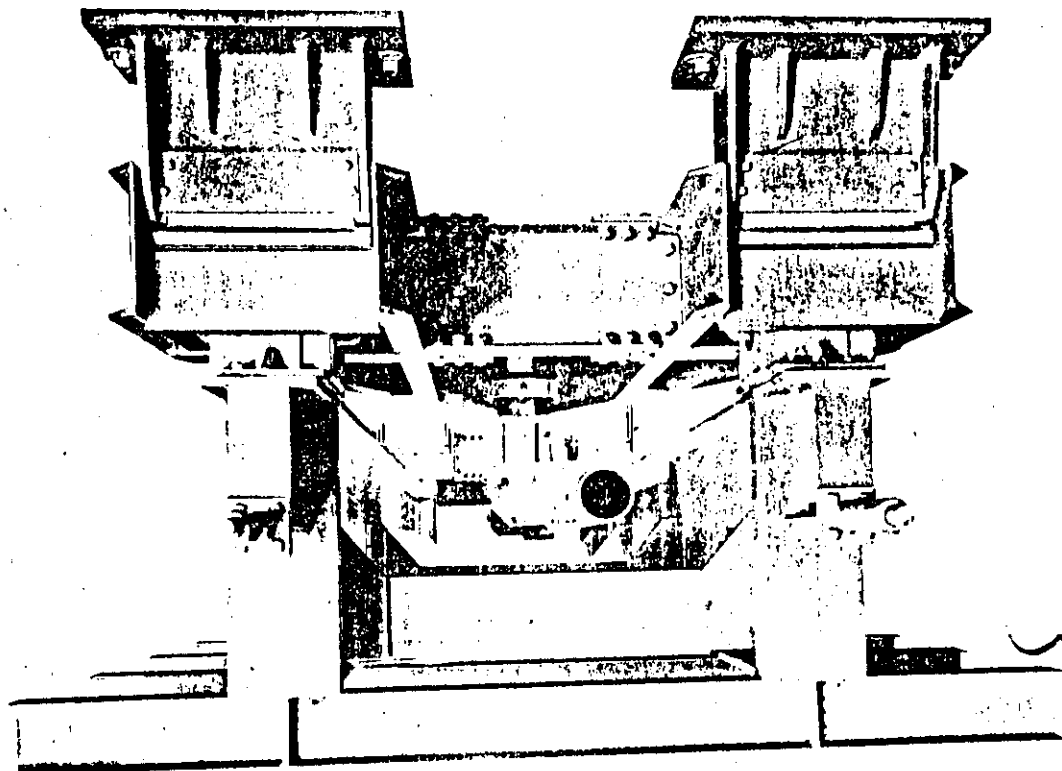

Description: These devices are four section railway track scales with four main levers and one transverse lever. The main levers are constructed of fabricated structural steel and are of the A type design. The platform bearings are of the double link suspension type. The transverse lever pivot heads are attached to extra heavy steel seamless tubing and the load pivot ways are designed for adjustment at this point. The levers are equipped with machined pivot ways and interchangeable machined and ground pivots and bearings. Each main lever is fitted with a nose iron for adjustment. The deck shall be of the full floating platform type or the rails only may form the line or weighing platform. The deck surface may be constructed of concrete, timber or steel. The balance ball adjustment is operated by a separate tool.
