CHAUS OVER-UNDER BENCH SCALES - SERIES 8800

Manufacturer: Chaus Scale Corporation  
Florham Park, New Jersey,  
U.S.A.

Apparatus: Over-Under Scales, with graduated beam and chart indication, model series 8800. The indicating chart may be graduated and printed with either avoirdupois or metric weight values. A tare beam is optional.

Rating: Maximum capacity - 10 pounds.  
5 kilograms.

Application: The weighing of commodities in trade.

Description: This scale is equipped with an equal arm cast alloy lever connected to the over-under indicator by means of a pullrod. Platform load is resisted by means of balancing weights, in conjunction with a graduated beam and poise.

Scale adjustment is effected by adjusting the lever applied by a coil spring which is connected to the scale lever. The scale is equipped with a magnetic dampening system.

Scale housings are of cast alloy construction. Load and weight platters are of stainless steel.
