DATE	April 18, 1972

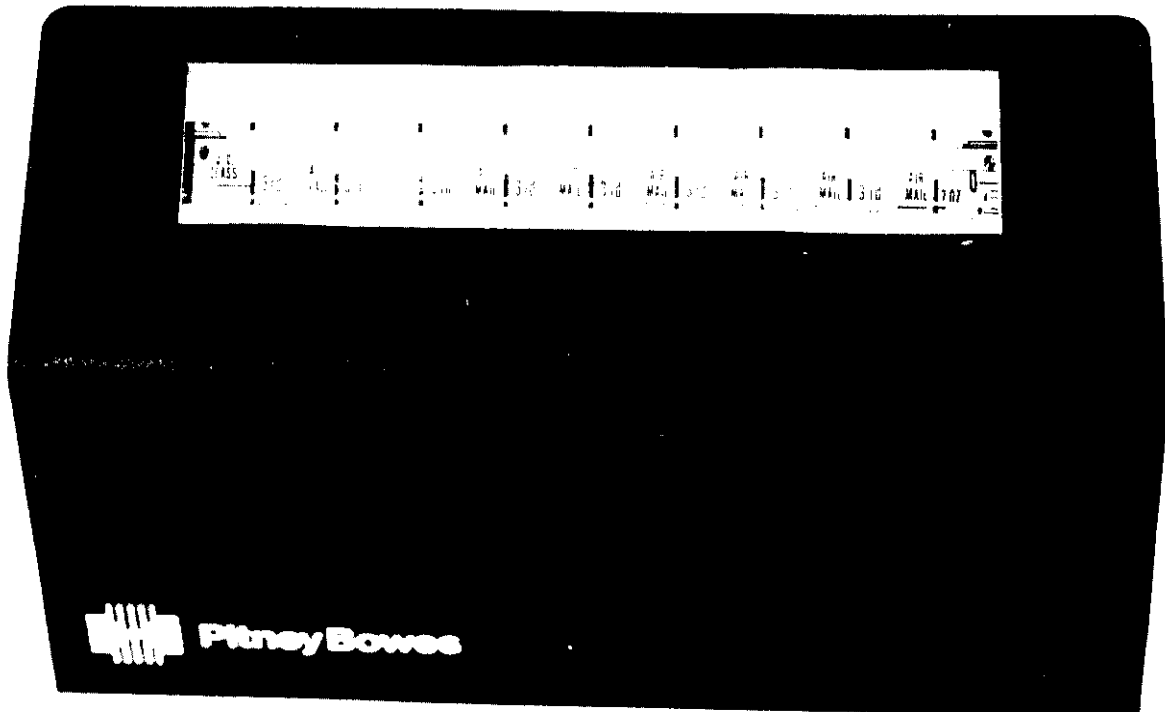

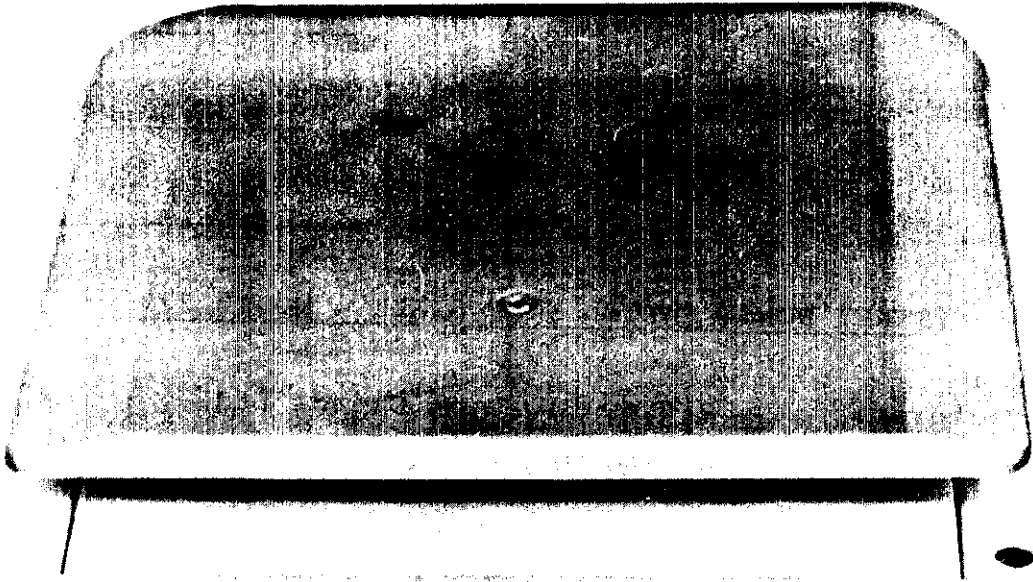

PITNEY BOWES PARCEL POST SCALE - MODEL 3735

- Manufacturer: Pitney Bowes of Canada Ltd.
909 Yonge St.,
Toronto, Ontario
- Apparatus: Parcel Post Computing Scale, Model 3735
- Rating: Capacity - 40 pounds
- Application: The weighing of parcels and the computation of parcel post charges.
- Description: This scale is equipped with a single load lever of cast construction. Ball bearings are installed at all pivoting points. Load resistance is by means of a pair of helical tension springs, mounted in parallel.
- Lever motion is transmitted to a revolving chart cylinder by means of a rack and pinion drive assembly. The chart is printed with weight and price values.
- The scale has a frame of cast aluminum with a sheet metal housing. The load platter is of stainless steel. The scale is equipped with levelling feet.
- Testing: The standard tests for computing counter scales shall apply.
