TOLEDO PARCEL POST SCALE - MODEL 779

- Manufacturer: Toledo Scale Co. of Canada Ltd.,  
Windsor, Ontario.
- Apparatus: Computing Parcel Post Scale - Model 779.
- Rating: Maximum capacity - 40 pounds (20 Kg.)  
Metric graduations shall be clearly  
identified and coloured red.
- Application: Parcel weighing and the determination  
of postal charges.
- Description: This device is a fan-type parcel post  
counter scale with a hairline indicator  
actuated by a cam and pendulum assembly.  
The leverage system is of the cast iron  
single lever type, the pivots are of  
tool steel with turned shanks which are  
a press fit into reamed holes in the  
lever. The bearings are V-type tool  
steel self-aligning. The chart is  
printed with both weight and money  
values based on the parcel post rates.  
The scale is equipped with a single  
stainless steel notched beam.
- The scale base and chart housing are of  
cast construction with painted finish.  
The commodity platter is of rectangular  
stainless steel.

Testing: The standard tests for computing counter scales shall apply.
