APPLICATION: The weighing of commodities in trade.

DESCRIPTION: All scales in this model series are equipped with two load levers of welded steel construction, being fabricated of pipe and structural sections. Platform load is transferred to the lever system by means of self-aligning suspension links.

Indicating and weight printing equipment may be of any approved Fairbanks type with which the scale is compatible, including mechanical dials, beams and electronic indicators, the latter being used in conjunction with a load cell installed in the steelyard of the scale. Notice of Approval No. S.WA-917 refers.

These scales are self-contained units, with the lever system installed in a supporting steel framework. Scales may be furnished

DESCRIPTION: (continued)

in open frame construction suitable for installation in a pit or with an enclosed frame for on-floor mounting.

TESTING: Refer to Examination Procedure Outline No. 14 of the Inspector's Procedure Manual.
