TOLEDO AIRLINE BAGGAGE SCALE

Manufacturer: Toledo Scale,  
Division of Reliance Electric Ltd.,  
Windsor, Ontario

Apparatus: Airline Baggage Scale, Model 2023

Rating: Capacity - Avoirdupois, 300 pounds.  
- Metric, 136 kilograms.

Application: The weighing of baggage, express parcels, and freight, for the purpose of establishing carrying charges when transported by airlines, railways and other types of conveyance.

Description: This scale is equipped with two L-shaped load levers of welded steel construction. The head mechanism is spring resistance type, utilizing a pair of helical springs connected in tandem, with rack and pinion drive to the chart. The weight chart rotates, the weight being observed by reference to a stationary indicator mark. The chart is graduated in avoirdupois and in metric units, and a separate indicator mark is provided for each set of graduations. Avoirdupois chart and indicator markings are coloured black. The metric chart and indicator markings are coloured red. Load platforms and housings are of welded sheet steel with enamel finish. The scale may be equipped with a conveyor section.

Testing: The standard tests for platform floor scales shall apply.
