Attention: Mr. C.L. Gardiner

Dear Mr. Gardiner:

This is in response to your letter dated December 22, 1986, regarding the types "KYW-", "KYL-" combination meters currently approved in Notices of Approval E-65 to E-65-8 inclusive and E-66 to E-66-5 inclusive, and your intention to make available L.E.D. potential indicating lamps powered by a flat inductive printed circuit board assembled integrally with the potential coils, as an option applicable to any rating or configuration of meters covered by the aforementioned types.

I am advised that, upon evaluation of the proposed modifications, the Electrical Laboratory has concluded that they may be regarded as insignificant in relation to the approval provisions of the Electricity and Gas Inspection Act. Accordingly, persuant to the authority delegated to me under the said Act:

- 1. your letter is hereby acknowledged as satisfying the notification requirements of section 13, Part III of the Electricity and Gas Inspection Regulations, SOR/86-131, 16 January, 1986, and
- 2. the proposed alteration is hereby accepted, in accordance with the aforementioned section, as being an immaterial one and hence included within the approval.

All recipients of Notices of Approval under the Electricity and Gas Inspection Act are being informed of this decision by copy of this letter.

Yours truly,

W.R. Virtue

Chief
