## NOTICE OF APPROVAL

E-118

OTTAWA December 7, 1972.

### PLASTIC COVERS FOR SANGAMO SINGLE PHASE WATTHOUR METERS

Manufacturer	Sangamo Electric, Springfield, Illinois, U.S.A.
Material	LEXAN (R)
Temperature Range	-40°C to 100°C
Ring and Clips	Attached to cover by Sangamo Company

### DESCRIPTION

These covers are moulded from "LEXAN" (R) which is a registered trade name for a polycarbonate resin. This material is transparent, impact resistant and flame retardant, although it will burn if exposed to a naked flame. It can also be drilled fairly readily.

These covers may be cleaned with warm water and soap or a mild detergent, but they may be damaged by some chemical solvents.

They may be installed on Sangamo types "KS-" and "K2S" single phase watthour meters in locations where frequent breakage of glass covers occurs due to vandalism or other causes.

Approval granted to:

Sangamo Company Limited  
Leaside,  
Toronto 17, Ontario.
