Attention: Mr. Carl Beaton
Engineering Department

Dear Mr. Beaton:

This is in response to your letter of March 7, 1985, regarding the modifications to the Type ETR Magnetic Tape Recorder, previously approved under Notice of Approval E-200. I am advised that the Electrical Laboratory has evaluated the modifications to be carried out by the equipment owners, namely the addition of two capacitors and a varistor and the adjustment in values of two original resistors and two capacitors as well as the manufacturer's use of a re-designed main circuit board, and concluded that they may be regarded as insignificant in relation to the approval provisions of the Electricity Inspection Act.

Accordingly, pursuant to the authority delegated to me under the said Act:

- (1) your letter is hereby acknowledged as satisfying the notification requirements of subsection 6(4)(a) of the Electricity Meter Regulations C.R.C. 1978, chapter 561, and
- (2) the proposed alteration is hereby accepted, in accordance with the aforementioned subsection as being an immaterial one and hence included within the approval.

All recipients of Notices of Approval under the Electricity and Gas Inspection Act are being informed of this decision by a copy of this letter.

Yours truly,

W.R. Virtue
Chief
