STANDARDS DIVISION

OTTAWA, October 3, 1955.

TYPE APPROVAL

CANADIAN GENERAL ELECTRIC
TYPE "CT-O" CURRENT TRANSFORMER

The apparatus specified and illustrated herein has been duly approved by the Standards Division under the provisions of the Electricity Inspection Act, Chapter 94, R.S. 1952, and may be admitted to verification in Canada.

Apparatus Approved: Type "CT-O" Current Transformer, manufactured by the Canadian General Electric Company Limited, Toronto, Ontario.

Rating of Apparatus:

Primary Current 400 amperes
 Secondary Current 5 amperes
 Accuracy Class ASA 0.3B0.2
 Rated Voltage 600 volts
 Wire 2
 Phase 1
 Frequency 25-60 cycles
 Style Dry Indoor

Description: These current transformers are designed for indoor service and are of wound secondary construction with primary window opening or bar and single 5-ampere secondary. The manufacturer specifies high grade silicon steel used in the core. The entire core and coil assembly is impregnated with, and moulded in, a thermosetting plastic material of high mechanical and electrical strength. Secondary terminals are solderless connectors.
