NOTICE OF APPROVAL

FOR

ROCKWELL, MODEL 23-1, CHART DRIVE

Apparatus

Wind period ..... 8 days  
Period of revolution of output shaft ..... 24 hours

Description

This spring driven chart drive has a standard clock mechanism and is supplied with a non-jewelled escapement. It has a base plate drilled for mounting in standard instrument and orifice meter cases. The model number, period of rotation of output shaft, wind period and the makers name are permanently marked on the timing device.

This approval covers the use of this chart drive mechanism in any suitable approved circular chart recording instrument.

Approval granted to:- Rockwell Manufacturing Company Ltd., Guelph, Ontario.
