**NOTICE OF APPROVAL
AVIS D'APPROBATION**

G-69-2 and
G-70-1

OTTAWA June 28, 1973

MODIFICATION TO
ROCKWELL EMCORECTOR TYPES I AND T

Approval Circulars G-69-1, dated May 10, 1972 and G-70, dated December 22, 1970 remain in force.

Description

Rockwell Manufacturing Company has introduced a new type of clutch for the above instrument.

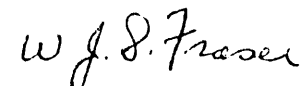

The mounting bracket of the new clutch is cast aluminum. The sleeve bearings and the spring have been replaced by roller bearings and ball thrust race. The new clutch is somewhat smaller in size.

Attached illustration shows both versions of the clutch.

Approval granted to:

Rockwell Manufacturing Company,
Guelph, Ontario.

J.S.T. Swanson, P. Eng.,
Chief, Standards Laboratory,
Standards Branch.

W.J.S. Fraser,
Chief, Electricity & Gas Division,
Standards Branch.

Ref: G 1147-57/R2-771
