Attention: Mr. G. Wilson

Dear Mr. Wilson:

This is in response to your letter dated June 20, 1988, regarding Notice of Approval G-205 dated December 11, 1987 and proposing to modify the Elsa Electronic Volume Corrector approved therein by installing a "data storage module" directly into the ELSA housing. This modular addition does not, in any way, interfere with the approved operation of the device. The module stores all input data, including corrected volume, uncorrected volume, average pressure and average temperature. The latter two can be computed and stored hourly for up to 8 days or daily for up to 40 days. The stored data can be downloaded into a compatible handheld terminal for future use, NOT INCLUDING customer billing.

I am advised that, upon evaluation of the proposed modifications, the Gas Laboratory has concluded that they may be regarded as immaterial in relation to the approval provisions of the Electricity and Gas Inspection Act. Accordingly, pursuant to the authority delegated to me under the said Act:

1. your letter is hereby acknowledged as satisfying the notification requirements of section 13, Part III of the Electricity and Gas Inspection Regulations, SOR/86-131, 16 January, 1986, and
2. the proposed alteration is hereby accepted, in accordance with the aforementioned section, as being an immaterial one and hence included within the approval.

All recipients of Notices of Approval under the Electricity and Gas Inspection Act are being informed of this decision by copy of this letter.

Yours truly,

W.R. Virtue
Chief
