STANDARDS DIVISION

OTTAWA March 2, 1959.

MODIFICATION OF TYPE APPROVALROCKWELL TYPES #250 AND #310
POSITIVE DISPLACEMENT GAS METERS

The modification to the apparatus specified herein has been duly approved by the Standards Division under the provisions of the Gas Inspection Act, Chapter 129, R.S. 1952, and the modified apparatus may be admitted to verification in Canada.

Apparatus Modified: Rockwell Types #250 and #310 Positive Displacement Gas Meters, manufactured by the Rockwell Manufacturing Company of Canada Ltd., Guelph, Ontario.

Modification: Permission has been granted to discontinue the use of the guard in the inlet opening on the above-noted types of meters. The tangent in these meters is more centrally located and does not pass under the inlet ferrule. These meters, therefore, do not require either the guard or the previously-approved wire screen.

E. F. Power,
Assistant Director (E&G),
Standards Division.

R. W. MacLean,
Director,
Standards Division.
