STANDARDS DIVISION

OTTAWA, April 28, 1949

## NOTIFICATION OF TYPE LISTING

Under the provisions of the appropriate Act the apparatus specified and illustrated herein has been listed as a Class A device, and may be used in Canada in accordance with the conditions applicable to this classification.

Authority: Weights and Measures Act, Chapter 212, R.S. 1927, and Regulations thereunder (P.C. 3459).

Apparatus Listed: Model ZN Counter-Computing-Platform-Fan Chart Scale, manufactured by Berkel Products Company, Limited, Toronto, Ont.

Rating of Apparatus: 15 lbs. maximum with 0 to 1 lb on the chart.

Application: Weighing of commodities in general trade.

Conditions:- As prescribed in P.C. 3459.

Description: The scale is a Counter-Computing-Platform-Fan Chart type, operated on the Roberval principle by a combination lever-pendulum mechanism. The mechanism is provided with agate main bearings and hardened steel knife edges. An oil dashpot, balance ball, levelling feet and alcohol level permit adjustment. The chart dial faces the commodity platter. The weight chart is visible on both sides of the dial whereas the money chart is visible only on the merchant's side. The metal casings and the platters are finished in enamel.

Testing: The standard tests for a Counter-Computing-Platform-Fan Chart scale will apply.
