DEPARTMENT OF TRADE AND COMMERCE  
STANDARDS DIVISION

OTTAWA August 16th, 1950.

NOTIFICATION OF TYPE LISTING

Under the provisions of the appropriate Act, the apparatus specified herein has been listed as a Class A device, and may be used in Canada in accordance with the conditions applicable to this classification.

Authority: Weights and Measures Act, Chapter 212, R.S. 1927, and Regulations thereunder (P.C. 3459).

Apparatus Listed: Type C.S., Model 3000, a Contractor's Portable Motor Truck Scale, equipped with Model D weighbeam, manufactured by Winslow Government Standard Scale Works, Inc., Terre Haute, Indiana.

Rating of Apparatus: 15 ton, 18 ton, 20 ton, and 30 ton Capacities.

Application: To weigh vehicles carrying such commodities as sand and gravel.

Conditions: As prescribed in P.C. 3459.

Description: Type C.S. scale is similar in general design to Type P except that the torque tube extends beyond the main bearing about 15" so as to allow plenty of clearance between the lever extensions and the steel frame surrounding the scale. The two ends of the frame are composed of 15" channel irons, the sides are formed of angle irons stiffened with diagonal members. The main bearings are bolted to heavy plates which are bolted to the corners of the steel frame. The scale is equipped with a Capacity beam and fractional bar, Model D beam. This scale is designed for temporary installation on ties or cement slabs and is equipped with a steel deck.

Testing: The standard tests for a motor truck scale will apply.

  
R. W. MacLean,  
Director,  
Standards Division.
