SD-WA.130

STANDARDS DIVISION

OTTAWA, October 7th, 1952.

NOTIFICATION OF TYPE LISTING

Under the provisions of the Weights and Measures Act, Chapter 36, S.C. 1951, and Regulations thereunder (P.C.6894), the apparatus specified and illustrated herein have been listed as approved devices and may be used in Canada in accordance with the conditions applicable.

Apparatus Listed: A Prepackaging Computing Spring and Lever Counter Scale of the cylindrical chart type, Models 1653 and 1663, manufactured by the Hobart Manufacturing Company, Ltd., Toronto, Ont.

Rating of Apparatus: Both Models - 15 lbs. capacity.

Application: Weighing of commodities for prepackaging purposes.

Conditions: As prescribed in P.C.6894 with the added mandatory requirement that these scales shall not be used on the retail premises of any business enterprise.

Description: These devices are similar in general design and construction to the models listed on SD-WA.129, except that: the charts of these models are graduated in $\frac{1}{4}$ ounce graduations, no customer read window is provided, weight values are shown at each end of the chart, a taring device is provided, price range of chart is from .19¢ to \$1.00 per lb. by 1 cent values, above \$1.00 and up to \$1.80 per lb. by 2 cent values. These models are also equipped with a selector which blocks off 4 prices on each side of the one selected and is operated by a knob on the right hand side of the scale. The selector is provided with an additional magnifying glass which raises the magnification to 2.2.

The two models listed differ from one another in that Model 1653 is equipped for angle reading and Model 1663 is equipped for straight reading.

Testing: The standard tests for a counter computing cylinder chart type scale shall apply.
