OTTAWA, July 13, 1955.

APPROVAL LISTING

Butter Testing Steelyard - Manufactured by Gurney
Scale Co., 6 Colborne Street, Hamilton, Ontario.

Under the provisions of the Weights and Measures Act, Chapter 292,
R.S.C. 1952, and Regulations thereunder (P.C. 6894), the apparatus specified
and illustrated herein has been listed as an approved device and may be used
in Canada in accordance with the conditions applicable.

Apparatus Listed: Steelyard Type Butter Testing Scale, Model 55J.

Capacity: 4 lbs.

Application: Weighing of butter.

Conditions: As prescribed in P.C. 6894

Description: This device is a suspended type steelyard with sliding poise
and two ratio poise weights. The beam is graduated and notched
from 0 to 17½ ounces X 1/8 ounce graduations. The bearings are
closed type hardened steel stirrups. Attached to the fulcrum
stirrup is the suspension ring. Pivots are pear shaped cross
section of hardened steel, ground and pressed in.

A pointed indicator is inserted in the top of the beam above
the fulcrum pivot and a small hole is drilled through the
fulcrum bearing stirrup. The beam is in balance when the
indicator appears centrally in the sighting hole.

The balance is adjusted by means of a split type balance ball.

Testing: The standard tests for a trade steelyard shall apply.
